

## **DNR 30-DAY PUBLIC NOTICE**

The Department of Natural Resources serves the DNR 30-Day Public Notice in order to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3.

The DNR 30-Day Public Notice is published weekly to serve notice of the latest permit applications received at the DNR, Division of Water. This Notice can be viewed on the web at <http://www.in.gov/dnr/water/> and can be provided by email upon written request. To receive the DNR 30-Day Public Notice as a weekly email attachment, email your full name and a valid email address to [DNRPublicNoticeRecipient@dnr.IN.gov](mailto:DNRPublicNoticeRecipient@dnr.IN.gov).

The permit applications and supporting documentation is available for public viewing on-line at <https://downunity.dnr.in.gov/#>. For questions concerning a permit application, contact the Division of Water, Technical Services Section, at (317) 232-4160 or toll free at 1-877-928-3755 and select 1 during the recorded menu narrative.

---

### Petition for Public Hearing

A pre-action public hearing on an application may be requested by filing a written petition. For a petition to be considered valid it must:

1. contain the typed or legibly printed name and complete mailing address of each petitioner;
2. be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. affirm that each signatory to the petition satisfies the requirements of item 2; and
4. identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted. To request a pre-action public hearing, send the petition by email to [water\\_inquiry@dnr.in.gov](mailto:water_inquiry@dnr.in.gov) or by mail to:

IDNR, Division of Water  
Technical Services Section  
402 West Washington Street, Room W264  
Indianapolis, Indiana 46204-2641

### Notification of Department Action

A person may request that the Department notify them when a Department Action is issued. To be notified of a Department Action, send a request that includes the permit application number or the applicant name, project description and county to email address [water\\_inquiry@dnr.in.gov](mailto:water_inquiry@dnr.in.gov) or by mail to the address above.

Permit Application Numbers with a prefix of:

FW are being reviewed under the Flood Control Act, IC 14-28-1 and the Flood Plain Management Rule, 312 IAC 10

PL are being reviewed under the Lake Preservation Act, IC 14-26-2 and the Public Freshwater Lake Rule, 312 IAC 11

DR are being reviewed under the Lowering of the Ten Acre Lake Act, IC 14-26-5

NW are being reviewed under the Navigable Waterways Act, IC 14-29-1

LM are being reviewed under the Navigable Waterways Act, IC 14-29-1 related to Lake Michigan

SG are being reviewed under the Sand and Gravel Permits Act, IC 14-29-3

AC are being reviewed under the Construction of Channels Act, IC14-29-4

**DNR 30-DAY PUBLIC NOTICE**

Date: 4/9/2025

**Application #: DR-587-0**

Waterbody: Mud Creek

Applicant: Fulton County Surveyor, Seth White, 125 East 9th Street, , , Rochester, IN, 46975

Received Date: 3/6/2025

County: Fulton, Fulton

Project Description: The project will consist of dipping out sand bars along Mud Creek. The purpose of this project is to remove sandbars and other obstructions in multiple areas within the Mud Creek ditch bed. The ditch bottom will not be excavated below its original elevation. Excavation will remove a maximum of 2 feet of material from the ditch bottom. Some tree removals will occur.

Project Location: The project begins at the outlet of Nyona Lake and extends downstream to Mud Creek's confluence with the Tippecanoe River. near Rochester

**Application #: FW-33176-0**

Waterbody: West Fork Blue River

Applicant: City of Salem, Justin L Green, 201 East Market Street, Salem, IN, 47167

Received Date: 3/14/2025

County: Washington

Project Description: Des 2002977 roadway will be improved, by adding pedestrian sidewalks, improving storm water drainage, and improve street lighting. Existing sidewalks will be reconstructed to meet ADA standards and new ADA-compliant sidewalks will be constructed where none currently exist. The drainage system of the project corridor will be improved by replacing or adding drainage inlets and storm sewers where needed. The Jackson Street intersection will be modernized and the entrance to the JayC shopping center will be updated. Old and non-uniform lighting along South Main Street will be updated and South Main Street will have 1.5" of milling overlaid by 1.5" of hot mix asphalt (HMA). The sidewalks will be approximately 7' wide, 4" in depth, and will extend approximately 134' within the floodway. The improvements include a new stormwater outfall with riprap stabilization in the floodway of West Fork Blue River (above OHWM). The pipe will be 2' in diameter and will extend approximately 69' within the floodway. On the west bank of the river, riprap will be added 18" in depth at the outlet and 2' in depth at the toe. Within the floodway, there will be a total of 55.73 CY of permanent fill over 0.025 acre. No temporary impacts are proposed since most work is on existing pavement with exception to the outfall installation in the grass.

Project Location: Approximately 100' north of the intersection of South Main Street and Old State Road 60 at Salem

**Application #: FW-33177-0**

Waterbody: East Fork White River

Applicant: Indiana American Water, Jared Burnett, 153 North Emerson Avenue, , , Greenwood, IN, 46143

Received Date: 3/14/2025

County: Jackson

Project Description: A new water main will be constructed to convey raw ground water from existing wells to a water treatment plant in Indiana American Water's Seymour water system. The raw water main will be installed approximately 5' to 8' below grade. Existing grade and cover materials will be restored to pre-construction conditions. A 24" diameter raw water line will be placed by the open-cut method and it will have a minimum 4' of cover below grade. In addition, a temporary construction entrance will be constructed. It will be approximately 20' wide, 50' long, and 6" in depth.

Project Location: Approximately 415' southeast of the intersection of East Reddington Street and North County Road 760 East near Seymour

**Application #: FW-33179-0**

Waterbody: Wabash River

Applicant: Indiana Department of Transportation, Jacob Burskey, 100 North Senate Avenue, Room N758-ES, , Indianapolis, IN, 46204

Received Date: 3/14/2025

County: Miami

Project Description: The existing bridge carrying South Broadway Avenue over the Wabash River will be rehabilitated (Str. No. 019-52-06617) (Des. No. 2002005). The existing 3-span bridge has a length of 365.5' and an out-to-out width of 64'. The primary rehabilitation work will be to construct a rigid deck overlay, convert the end bents to semi-integral, replace the bridge railings and approach guardrail, and paint the existing steel girders. The new structure dimensions will match the existing. Riprap splash pads measuring 4' long by 4' wide by 2' deep will be constructed and will be installed flush with the existing ground underneath the structure to prevent erosion. Disturbed areas will be seeded with the INDOT standard floodplain seed mixture. Permanent impacts will total approximately 0.0016 acres due to the use of the riprap splash pads. Total temporary impacts will total approximately 0.114 acres for a temporary causeway that will measure approximately 30' long by 92' wide by 5' deep and consisting of riprap will be placed at the northeast stream bank to remove the timber debris at the north pier and will be in place for approximately 4 weeks. No tree removal will be required.

Project Location: At the stream crossing of South Broadway Avenue over the Wabash River at Peru

**Application #: FW-33180-0**

Waterbody: Ohio River

Applicant: Mulzer Crushed Stone, Inc., Wenona Fosselman, 534 Mozart Street, , Tell City, IN, 47586

Received Date: 3/17/2025

County: Clark

Project Description: Maintenance dredging activities will consist of the removal of sand, silt, sediment and mud from the bottom of the channel of the Ohio River extending approximately 4,200'. The Ohio River area to be dredged is parallel to the site frontage along a path that generally is 60' or less in width. Beginning at the shoreward limit of each dredge area, a 3:1 slope will be used to transition away from the shore until reaching elevation 408' NGVD29. Dredging will then continue horizontally away from the shore tie in with that elevation along the river bottom is achieved. An estimated 1,000 cubic yards of material will be removed. The dredge material will be removed for the existing barge loading and maneuvering/fleeting area by using mechanical or hydraulic means. The dredge material will be disposed of landward of the floodway in the incised pits located at the quarry site. A temporary floating turbidity curtain will be used during the dredging process.

Project Location: Approximately 7,000' south of the intersection of Rocket Plant Road and Limestone Branch Road and extending east approximately 4,400' near Charlestown

**Application #: FW-33212-0**

Waterbody: Ohio River

Applicant: Summit Terminal, LLC, Richard Lloyd, 1183 Canvasback Drive, , Terre Haute, IN, 47802

Received Date: 4/2/2025

County: Spencer

Project Description: An existing barge loading/offloading facility will be converted into a new dry fertilizer storage facility. Demolition activities will include the removal of the following items; concrete block walls and foundations, portable building and concrete pad, outhouse structure, and conveyor belts systems, including flat work, foundations, utilities, and barge connections. New construction activities will include; site grading and foundation sub-grade preparation, erection of dry fertilizer storage building, concrete loading pad, conveyor system and associated foundations, and final grading for control of site surface runoff. The new 328' long by 235' wide dry fertilizer storage building will be constructed out of concrete/timber walls with a timber roof and will have continuous wall footings poured in place with a soul supported slab-on-grade floor. The lowest floor of the building will have a finished elevation of 395.00' NAVD88, which is above the flood protection grade of 394.6' NAVD88. A 261' long by 190' parking lot will also be installed. Additionally, elevated outhouse structures, portable water and electrical services will also be installed.

Project Location: 2483 East State Road 66 at Rockport

**Application #: FW-33215-0**

Waterbody: Silver Creek

Applicant: Ecosystems Connections Connections, Herb F Manifold, 9130 North 600 East, , , Denver, IN, 46926

Received Date: 4/4/2025

County: Floyd

Project Description: The Blackiston Mill Low Head Dam will be removed to restore the natural flow of Silver Creek, and the streambank on the south side of the Blackiston Mill Road crossing over Silver Creek will be restored to the original channel shape underneath the bridge. Riprap will be temporarily placed to access the stream with removal equipment. All temporary fill will be removed after the dam removal process has been completed.

Project Location: The Blackiston Mill Dam is located just upstream (east) of the Blackiston Mill Road crossing at Clarksville

**Application #: PL-25176-0**

Waterbody: Syracuse Lake

Applicant: Charles Stump, 13295 North East Shore Drive, , , Syracuse, IN, 46567

Received Date: 3/17/2025

County: Kosciusko

Project Description: An existing concrete seawall will be refaced across 50' of shoreline along Syracuse Lake. The refacing will consist of re-enforced concrete which will be tied to the existing wall with 1/2" re-rod. The refacing will have a maximum thickness of 12" and will be sloped on the lakeward side. A 36" wide concrete walkway will be constructed on top and landward of the lakeward face of the refaced wall.

Project Location: 13295 North Eastshore Drive at Syracuse
