

## **DNR 30-DAY PUBLIC NOTICE**

The Department of Natural Resources serves the DNR 30-Day Public Notice in order to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3.

The DNR 30-Day Public Notice is published weekly to serve notice of the latest permit applications received at the DNR, Division of Water. This Notice can be viewed on the web at <http://www.in.gov/dnr/water/> and can be provided by email upon written request. To receive the DNR 30-Day Public Notice as a weekly email attachment, email your full name and a valid email address to [DNRPublicNoticeRecipient@dnr.IN.gov](mailto:DNRPublicNoticeRecipient@dnr.IN.gov).

The permit applications and supporting documentation is available for public viewing on-line at <https://dowunity.dnr.in.gov/#>. For questions concerning a permit application, contact the Division of Water, Technical Services Section, at (317) 232-4160 or toll free at 1-877-928-3755 and select 1 during the recorded menu narrative.

---

### **Petition for Public Hearing**

A pre-action public hearing on an application may be requested by filing a written petition. For a petition to be considered valid it must:

1. contain the typed or legibly printed name and complete mailing address of each petitioner;
2. be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
3. affirm that each signatory to the petition satisfies the requirements of item 2; and
4. identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted. To request a pre-action public hearing, send the petition by email to [water\\_inquiry@dnr.in.gov](mailto:water_inquiry@dnr.in.gov) or by mail to:

IDNR, Division of Water  
Technical Services Section  
402 West Washington Street, Room W264  
Indianapolis, Indiana 46204-2641

### **Notification of Department Action**

A person may request that the Department notify them when a Department Action is issued. To be notified of a Department Action, send a request that includes the permit application number or the applicant name, project description and county to email address [water\\_inquiry@dnr.in.gov](mailto:water_inquiry@dnr.in.gov) or by mail to the address above.

Permit Application Numbers with a prefix of:

FW are being reviewed under the Flood Control Act, IC 14-28-1 and the Flood Plain Management Rule, 312 IAC 10  
PL are being reviewed under the Lake Preservation Act, IC 14-26-2 and the Public Freshwater Lake Rule, 312 IAC 11  
DR are being reviewed under the Lowering of the Ten Acre Lake Act, IC 14-26-5  
NW are being reviewed under the Navigable Waterways Act, IC 14-29-1  
LM are being reviewed under the Navigable Waterways Act, IC 14-29-1 related to Lake Michigan  
SG are being reviewed under the Sand and Gravel Permits Act, IC 14-29-3  
AC are being reviewed under the Construction of Channels Act, IC14-29-4

**DNR 30-DAY PUBLIC NOTICE**

Date: 12/17/2025

**Application #: FW-33538-0**

Waterbody: Unnamed Tributary Clear Creek

Applicant: Indiana University, Mia Williams, 2901 East Discovery Parkway, , , Bloomington, IN, 47408

Received Date: 11/14/2025

County: Monroe

Project Description: Approximately 1,030' of the bank of an unnamed tributary of Clear Creek will be stabilized across 8 sites. The improvements will include excavation of debris and unstable earth, regrading bank slopes, replacing riprap boulders from existing stabilization, construction of stacked stone head walls, and the addition of new toe protection along the bank. Stacked stone walls, outlet protection, and exposed root protection will consist of roughback sandstone. The sandstone blocks will be sized 24"-48" long. The riprap toe will consist of 12"-18" diameter stones installed at 3:1 slope. The project will also include removal and replacement of the concrete bridge approaches. Tree and invasive species removal will occur during construction. An aggregate access drive that is 150' long, 20' wide, and 12" thick will be in use temporarily through construction.

Project Location: Beginning at the North Indiana Avenue stream crossing and extending approximately 1,030' upstream near Bloomington

**Application #: FW-33541-0**

Waterbody: Cicero Creek

Applicant: BW Construction, Damon Hood, 615 Russell Avenue, , , Indianapolis, IN, 46225

Received Date: 11/18/2025

County: Tipton

Project Description: The Tipton Park Baseball Design project involves replacing the existing baseball diamonds located in Tipton Park. The new condition will be located within the limits of the existing facility. Three baseball diamonds will be constructed. The largest field will be in the same location as the larger of the existing diamonds. The two additional diamonds will be in different locations, but still within the limits of the existing facility. Restroom and concession buildings will be less than 400 square feet and will be constructed in the existing limits. Approximately 7.22 acres will be disturbed by the project work and approximately 0.05 acres of non-wetland wooded habitat removal will be required.

Project Location: Approximately 500' west of State Road 19 and 1,500' north of Fairgrounds Road near Tipton

**Application #: FW-33544-0**

Waterbody: Stockfleith Ditch

Applicant: Blankenberger Brothers, Inc., Jason K Fox, 11700 Water Tank Road, , , Cynthiana, IN, 47612

Received Date: 11/21/2025

County: Vanderburgh

Project Description: Clean fill from various private construction, municipal road construction, and INDOT road construction projects will be placed into the existing borrow pit. The clean fill will be disposed of up to the level just below the ordinary high-water mark of the former borrow pit. Filling the existing borrow pit with approximately 141,047 cubic yards of clean material below the ordinary high-water mark would result in an estimated 6.10 acres of impact to the floodway. No material will be removed from the floodway. In addition, a portion of Intermittent Stream #1 will be restored through the borrow pit as it is filled in. Permanent impacts other than clean fill will also include the conversion of the low lying area of the borrow pit into a possible wetland over time, and restoring the original route of Intermittent Stream #1 through the northern end of the former borrow pit, approximately 390' long, reconnecting to Intermittent Stream #3 that flows into Stockfleith Ditch. This restored reach will be located within the floodway. No permanent wetland impacts within the floodway are proposed for this project. No tree clearing in wetlands and no wetland woody vegetation clearing within the floodway is proposed for this project. No tree clearing will be conducted for the filling of the existing borrow pit below the ordinary highwater mark. In addition, there will be a temporary construction entrance that will be a minimum of 50' long, 12' wide, and constructed at grade.

Project Location: Approximately 1,500 southwest of the intersection of North Burkhardt Road and Hirsch Road at Evansville

**Application #: FW-33546-0**

Waterbody: Unnamed Tributary Treaty Creek

Received Date: 11/21/2025

Applicant: Double J Dairy, LLC, John Roeloffs, 1858 East 800 South, , , La Fontaine, IN, 46940

County: Wabash

Project Description: Approximately 2,400' of the existing channel was filled in and the new channel is approximately 3,780' long. It varies between 6' to 14' deep, with a 3' bottom width and 2-3:1 sideslopes. A sediment trap was not constructed at the downstream end of the new channel. The channel was excavated "in the dry" and was not connected to the existing channel until the excavation was stabilized per IDEM 401 WQ certification approval. Material excavated from the construction of the new channel was stockpiled and used as fill for the old channel. Additional fill material was not brought onsite from an outside source. Additionally, approximately 0' of existing channel immediately upstream of the realigned section was cleared of brush and debris, as it was at the head end of the channel.

Project Location: Approximately 825' northeast of the intersection of South State Road 15 and East 800 South near La Fontaine

**Application #: FW-33547-0**

Waterbody: St. Joseph River

Received Date: 12/11/2025

Applicant: John and Christine Tirotta, 315 Edgewater Drive, Mishawaka, IN, 46545

County: St. Joseph

Project Description: A new set of treated wood stairs will be installed in the St. Joseph River floodway. The stairs will be elevated on 6x6 posts set in concrete footers that are 42" below grade. There will be a 4' by 4.5' landing with stairs stretching 11' down the embankment.

Project Location: 315 Edgewater Drive near Mishawaka

**Application #: FW-33549-0**

Waterbody: Ohio River

Received Date: 11/24/2025

Applicant: IMI Aggregates - New Albany Sand and Gravel, Rich Beitman, 6501 Indiana 111, , , Elizabeth, IN

County: Floyd

Project Description: An approximately 5220' x 140' area and an approximately 5220' x 90' will be filled in the east floodplain of the Ohio River for the IMI New Albany mining operations. The fill will vary in depth from 28' on the landward side to approximately 35' on the streamward side. It will be set 240' back from the top of the bank and will have 3:1 sideslopes. The finished elevation of the fill will be approximately 447.00' NGVD29. Nothing will be constructed on top of the completed fill. The fill material will be obtained by excavating a borrow pit approximately inside of the fill area. The pit will be approximately 5220' x 340' with an average depth of 27'.

Project Location: 6501 Indiana 111 at New Albany

**Application #: FW-33551-0**

Waterbody: St. Marys River

Applicant: Fort Wayne City Utilities, Veronika Meyer, 200 East Berry Street, Suite 250, , Fort Wayne, IN, 46802

Received Date: 11/25/2025

County: Allen

Project Description: The proposed project includes the installation of a 423 linear feet of 12" storm sewer pipe, a 120" by 120" stormwater special structure, and outfall for the Fort Wayne City Utilities. An approximately 450' wide by 5' deep area will be cut and Grasscrete pavers will be placed on top below the ordinary high water mark (OHWM).

Project Location: 300' downstream of the crossing of W Jeferson Boulevard and Saint Marys River at Fort Wayne

**Application #: FW-33552-0**

Waterbody: Wabash River

Applicant: City of Engineer City of Lafayette, Jeromy Grenard, 20 North 6th Street, Lafayette, IN, 47901

Received Date: 11/26/2025

County: Tippecanoe

Project Description: The John T. Myers Pedestrian Bridge will be repaired. Repairs include fixing structural steel framing and bearings, repairs to the concrete substructure and superstructure components, the replacement of selected unit pavers comprising the deck surface, joint repairs and cleaning, repainting the bridge steel, and electrical repairs. No trees will be removed.

Project Location: The John T. Myers Pedestrian Bridge, carrying the Riehle Plaza, located at 200 North 2nd Street, over the Wabash River near Lafayette

**Application #: FW-33556-0**

Waterbody: Oliver Ditch

Applicant: William Risner, 440 East Wood Road, , , Rensselaer, IN, 47978

Received Date: 12/1/2025

County: Jasper

Project Description: A new 200' long by 20' wide private fishing pond will be constructed on the west side of the property.

Project Location: Approximately 1300' southeast of the bridge carrying State Road 14 over Oliver Ditch near Rensselaer

**Application #: PL-25334-0**

Waterbody: Simonton Lake

Applicant: Joe Miller, 51185 Aqua Drive, , , Elkhart, IN, 46514

Received Date: 10/30/2025

County: Elkhart

Project Description: An existing concrete seawall will be refaced across 106' of frontage on Simonton Lake. The refacing will consist of 6' vinyl sheet piling which will be driven and anchored to deadman anchors 12' into the property. The refacing will have a maximum thickness of 12". The vinyl sheets will have a 2' exposure. The area behind the wall will be backfilled with clean peastone that will measure approximately 106'x 2'x 2'.

Project Location: 51185 Aqua Drive

parcel:20-02-16-276-001.000-026

Legal Description: DAWNS EDGE LOT 23 at Elkhart

**Application #: PL-25335-0**

Waterbody: Lake Manitou

Applicant: Philip Beer, 1711 Mitchell Drive, , , Rochester, IN, 46975

Received Date: 10/30/2025

County: Fulton

Project Description: An existing concrete seawall will be refaced across 50 ft frontage of the applicant's property on Manitou Lake to prevent deterioration. The refacing will consist of 6 ft vinyl sheet piling which will be driven and anchored to deadman anchors 12 ft into the property. The refacing will have a maximum thickness of 12 inches. The vinyl sheets will have a 3 ft exposure. The area behind the wall will be backfilled with clean peastone (50'x 3'x 3').

Project Location: 1711 Mitchell Drive

Parcel: 25-07-09-005.000-009

Legal Description: LOT 5 MITCHELL'S 1ST at Rochester

**Application #: PL-25340-0**

Waterbody: Sylvan Lake

Applicant: Cynthia Boggs, 1050 West Pleasant Point, Rome City, IN, 46784

Received Date: 11/17/2025

County: Noble

Project Description: An existing underwater beach will be improved to prevent further beach erosion. A 6" layer of 7/64" clean, washed pea gravel will be placed directly on top of the remaining sand. A 20' by 40' underwater beach will be constructed across 20' of the applicant's 40' frontage. The placement will begin at the northern property line and extend south approximately 20'. In addition, the sand will be placed 10' lakeward of the existing concrete seawall, and then extend 40' toward the lake. The beach will project lakeward for the lesser of 40' or a depth of 6' below the average normal level of the lake. The previously approved permit for the beach at this site is PL-23932.

Project Location: 1050 West Pleasant Point at Rome City

**Application #: PL-25343-0**

Waterbody: Lake Wawasee

Applicant: Wawasee Yacht Club, , 6338 East Trusdell Avenue, , , Syracuse, IN, 46567

Received Date: 11/25/2025

County: Kosciusko

Project Description: An existing concrete seawall will be refaced across 13' of 70' on Lake Wawasee. The refacing will consist of concrete with a maximum thickness of 12" and will be sloped on the lakeward side. A 36" wide concrete walkway will be constructed on top and landward of the lakeward face of the refaced wall.

Project Location: 6338 East Trusdell Avenue near Syracuse

**Application #: PL-25345-0**

Waterbody: Dallas Lake

Applicant: Barbara Shoudel, 310 West 510 South, Wolcottville, IN, 46795

Received Date: 12/1/2025

County: Lagrange

Project Description: A new vinyl seawall will be constructed across 188 ft of the frontage of the applicant's property along Dallas Lake to deter further shoreline erosion. The wall will consist of 8 ft vinyl sheets anchored to deadman anchors 12 ft into the yard. Vinyl sheets will be driven with 3.5 ft exposed. The maximum thickness of the wall will be 6 inches. The area behind the wall will be backfilled with clean peastone (188'x 3'x 3.5').

Project Location: 310 West 590 South

Parcel: 44-11-24-400-040.011-005

Legal Description: LOT 63 LESS e 10' &amp; LOT 62 DALLAS BAY PHASE II near Wolcottville
