**OUR STORY**

Willow Slough Fish & Wildlife Area provides quality outdoor recreational opportunities and a wide array of habitat types for countless plant and animal species. At the center of the property is the J.C. Murphey Lake and wetland complex. The lake comprises more than 1,200 acres and draws in thousands of waterfowl each year. Renovation on the lake was completed in 2024. The lake also provides quality fishing opportunities. Rolling dunes, oak savanna, marshes, flooded crop land and forest surround the lake.

Willow Slough began with the purchase of 7,800 acres in 1949 and is 10,175 acres today. J.C. Murphey Lake was completed in 1951. Parts of Willow Slough were formerly grazed, hayed, and cultivated. A railroad once ran through the property, and portions of an old station can be found in the area.

The property provides diverse habitat and ample opportunities for everyone to enjoy the outdoors.

FUNDING FOR FISH & WILDLIFE

The DNR Division of Fish & Wildlife sells hunting, fishing, and trapping licenses. All revenue is used for managing fish and wildlife resources in Indiana. No license money goes into the state general fund.

The Division also receives money from the federal Sport Fish and Wildlife Restoration programs (sometimes referred to as Dingell-Johnson and Pittman-Robertson funds). The funds are derived from excise taxes levied on sporting arms and ammunition, bows and arrows, fishing equipment and motor boat fuel. The funds are then returned to state fish and wildlife agencies using a formula that in part is based on the number of fishing and hunting license buyers.

**ACTIVITIES & FACILITIES**

• Look for these icons on the map.

ACCESSIBLE: Accessible hunting and fishing areas available. Ask for details.
