In its 1st year, GGS has made great progress in addressing its goals to:

- Establish habitat for birds and pollinators.
- Improve overall human health.
- Improve soil health and water quality.
- Increase recreational opportunities.

**Program Highlights**
- $2 Million for Conservation
- 3 New Grassland Biologists
- 2 New Habitat Teams to Assist Landowners
- Outreach to 850,000 Citizens

**Pollinators & Wildlife**
- 138 GGS Habitat Projects
- 1,820 Acres of Enhanced Habitat
- Establishing Native Grass, Wildflowers, & Shrub Species

**Gamebird Hunting**
- New “APPLE” Hunter Access Program Developed
- 114 New Hunting Opportunities
- 2,000 APPLE Acres Enrolled

**Bird Monitoring**
- 8 Grassland Bird Species Monitored to Assess Habitat Impacts
- 300 Surveys on 14,500 Acres Completed
- IN’s First National Bobwhite Conservation Initiative Focal Area

**OUR GOAL**
To develop or enhance 3,250 acres of beneficial grassland habitat on private land.
