## C. Site Visits

| Date and Location of Each Visit | October 16, 2019 – Owen-Putnam State Forest  
October 17, 2019 – Morgan-Monroe and Yellowwood State Forests  
October 18, 2019 – Greene-Sullivan State Forest  
October 22, 2019 – Francis Slocum and Salamonie River State Forests |

## D. Audit Results

### Auditor Recommendation

- ✗ Grant, maintain or renew certification
- □ Grant, maintain or renew certification pending closure of CARs
- □ Grant, maintain or renew certification pending follow-up assessment
- □ Do not grant, maintain or renew certification (notify NSF office immediately)

### Number and Summary of Findings of “Exceeds the Requirements”

- 3.1.3 *The BMP monitoring program is the most robust known to the audit team.*
- 6.1.1 *Indiana DOF has an exceptional cultural resources identification and protection program including employing a full-time archaeologist.*
- 15.1.1 *The DOF system is strong and works well.*

### Number and Summary of Findings of “Opportunity for Improvement”

None

### Number and Summary of Findings of “Minor Nonconformity”

None
### Number and Summary of Findings of “Major Nonconformity”

| None |

### Summary of review of nonconformities from previous audit(s)

| NA |

### Notes from Opening and Closing Meetings

An opening meeting was conducted with IN DOF staff and the two auditors covering the standard procedures involved in the audit. Field sites were selected and the timeline was agreed upon. Confidentiality and conflict of interest were discussed.

The closing meeting was attended by IN DOF staff and the two auditors. Several commendable practices were acknowledged. Timing of the audit report and next steps were discussed. The preferred timing for next year’s audit is October 5-7, 2020.

### All logos and/or labels, including ANSI, ANAB, SFI, PEFC, ATFS, etc. are utilized correctly in accordance with NSF policies.

- [x] Yes
- [ ] No (a finding of nonconformity should be issued)
- [ ] N/A (not using any labels or logos on any marketing materials, website, finished products, etc.)

### E. Recertification Review

Auditors are required to review the reports from all audits in the current certification period, starting with the certification or recertification audit and including all surveillance or other audits. The auditor shall consider the performance of the program over the cycle through a review of internal audits, management reviews, corrective actions, continual improvement, and NSF audit findings, to determine if there is evidence of:

- An effective interaction between all parts of the program and its overall effectiveness?
- An overall effectiveness of the system in its entirety in light of internal and external changes?
- A demonstrated commitment by top management to maintain the effectiveness and improvement of the system to enhance overall performance?
- Continual improvement over the cycle?
- The program contributing to the achievement of the client’s policy and objectives, and the intended results?
- Repeated audit findings during the audit cycle that would indicate systemic issues?

**Answer**: NA - Surveillance

Audit Notification Letter

October 9, 2019

Brenda Huter, Forest Stewardship Coordinator
Indiana Division of Forestry
402 W. Washington Street, Rm 296 W
Indianapolis, IN 46204

RE: Confirmation of SFI 2019 Surveillance Audit, Indiana DNR

Dear Ms. Huter:

As we discussed, I will be conducting the annual SFI surveillance portion of your joint (with FSC) audit as described in the attached itinerary. This letter is intended to meet the SFI audit planning requirements and will therefore focus on the SFI part of the work. A separate FSC audit plan will be provided by SCS Global.

As agreed, October 16-18, 2019 is scheduled for the 2019 audit of Indiana DNR Division of Forestry’s conformance to the SFI 2015-2019 Standards and Rules®, Section 2 - Forest Management Standards. Please confirm that these dates are still appropriate.

The audit team will consist of:

- Ruthann Schulte – SFI Lead Auditor
- Ciara McCarthy – FSC Lead Auditor

Preparing for the Audit

A key part of the audit is a review of selected evidence related to your program, which may include:

- Approval for logo usage (if used)
- Internal Audit records
- Management Review records
- Training records
- Documentation for operation of complaint procedure
- Documentation for subcontracting/outsourcing
- Policies regarding certification, health, and safety

Please have this information available for me during the audit.

Role of SFI Inc. Office of Label Use and Licensing

As a reminder, your organization is responsible for contacting SFI, Inc. and complying with all requirements before using or changing any SFI label or logo. Your contact is:

Courtney Guillen, Coordinator, Office of Statistics and Label Use
Sustainable Forestry Initiative, Inc.
202-719-1391 ext. 338
courtney.guillen@sfiprogram.org
SFI Audit Scope

The Sustainable Forestry Initiative program including land management operations on approximately 158,264 acres of Indiana State Forests and related sustainable forestry activities. The 2019 SFI Surveillance Audit is a review of Objectives 3, 8, 10, 12, 14, and 15 of your SFI Program to confirm that it is in conformance with the SFI 2015-2019 Standards and Rules®, Section 2 - Forest Management Standards. The State Forests to be visited are Owen-Putnam, Greene-Sullivan, Morgan-Monroe, Yellowwood, Salomonie River/Francis Slocum as illustrated in the table below.

Agenda for Review

Attached for your review is the tentative agenda that will guide the conduct of the audit. Please contact me via email or phone if you would like to recommend changes or have any questions regarding what is needed for the audit.

Audit Schedules and Travel Logistics

The overall schedule shown below was agreed to by all parties. More detailed daily schedules are to be developed as we finalize the site selection process. Upon receiving the list of activities for the past two years I will randomly select site for the two State Forests identified for site visits this year. The schedules will be reviewed and adjusted as needed during the opening meeting or in the field to accommodate any special circumstances.

Thank you for selecting NSF to provide your audit services.

Sincerely,

Ruthann M. Schulte

Ruthann M. Schulte

Appendix 2

Indiana Department of Natural Resources – Division of Forestry
2019 SFI Forest Management Public Summary Audit Report

Introduction
The SFI program of Indiana Department of Natural Resources Division of Forestry (DOF) has demonstrated conformance to SFI® 2015-2019 Standard and Rules, Section 2 – Forest Management Standard in accordance with the NSF certification process.

Forest Management on Indiana State Forests
Source: https://www.in.gov/dnr/forestry/9656.htm

The Indiana Department of Natural Resources Division of Forestry has managed state forest lands for more than 100 years, during which time once abused and abandoned land has been restored to nearly 160,000 acres of lush and healthy forests seen in Indiana today.

Indiana law dictates that DNR Forestry “protect and conserve timber, water resources, wildlife and topsoil in forests owned and operated by the division of forestry” and use “good husbandry” to remove timber that has substantial commercial value “in a manner that benefits the growth of saplings.”

There are those who object to this public policy and repeatedly demand DNR Forestry stop doing its job. In contrast, a Purdue University public opinion survey of Indiana residents found that 95 percent of Hoosiers approve of removing trees to protect woodlands from disease and fire.

DNR Forestry – staffed by professional foresters and other scientists with a combined 500-plus years of field experience – is evaluated annually by the Forest Stewardship Council® and the Sustainable Forestry Initiative® program. For 10 consecutive years, these two independent audits have certified DNR Forestry meets nationally and internationally recognized standards for sustainable forestry management.

The audit was performed by NSF on October 16-18, 2019 by an audit team headed by Ruthann Schulte, Lead Auditor. Audit team members fulfill the qualification criteria for conducting audits contained in SFI 2015-2019 Standards and Rules, Section 9 - Procedures and Auditor Qualifications and Accreditation.

The objective of the audit was to assess conformance of the firm’s SFI Program to the requirements of the SFI 2015-2019 Standard and Rules, Section 2 – Forest Management.

The scope of the audit included forest management operations. Forest practices that were the focus of field inspections included those that have been under active management over the planning period of the past 3 years. In addition, practices conducted earlier were also reviewed as appropriate (regeneration and BMP issues, for example), SFI obligations to promote sustainable forestry practices, to seek legal compliance, and to incorporate continual improvement systems were also within the scope of the audit.

The SFI Standard was used without modifying any requirements.

Audit Process
The audit was governed by a detailed audit plan designed to enable the audit team to efficiently determine conformance with the applicable requirements. The plan provided for the assembly and review of audit evidence consisting of documents, interviews, and on-site inspections of ongoing or completed forest practices.

During the audit NSF reviewed a sample of the written documentation assembled to provide objective evidence of conformance. NSF also selected field sites for inspection based upon the risk of environmental impact, likelihood of occurrence, special features, and other criteria outlined in the NSF protocols. NSF selected and interviewed stakeholders such as contract loggers, landowners and other interested parties, and interviewed employees within the organization to confirm that the SFI Standard was understood and actively implemented.

The possible findings of the audit included conformance, major non-conformance, minor non-conformance, opportunities for improvement, and practices that exceeded the requirements of the standard.

Overview of Audit Findings
Indiana Division of Forestry’s SFI Program was found to be in conformance with the standard. NSF determined that there were no minor non-conformances or opportunities for improvement identified.
NSF also identified the following areas where forestry practices and operations of Indiana Division of Forestry’s SFI Program exceed the basic requirements of the standard:

3.1.3 Monitoring of overall best management practices implementation.

Finding: The BMP monitoring program is the most robust known to the audit team.

6.1.1 Use of information such as existing natural heritage data, expert advice or stakeholder consultation in identifying or selecting special sites for protection.

Finding: Indiana Division of Forestry has an exceptional cultural resources identification and protection program including employing a full-time archaeologist.

15.1.1 System to review commitments, programs and procedures to evaluate effectiveness.

Finding: The DOF system is strong and works well.

General Description of Evidence of Conformity

NSF’s audit team used a variety of evidence to determine conformance. A general description of this evidence is provided below, organized by SFI Objective.

Objective 1 Forest Management Planning

To ensure forest management plans include long-term sustainable harvest levels and measures to avoid forest conversion.

Summary of Evidence: The Indiana State Forest Strategic Plan 2015-2019, Indiana DNR State Forest Properties Report of Continuous Forest Inventory (CFI) Summary of years 2013-2017, state forest tract management plans, and the associated inventory data and growth models were the key evidence of conformance.

Objective 2 Forest Health and Productivity

To ensure long-term forest productivity, carbon storage and conservation of forest resources through prompt reforestation, afforestation, minimized chemical use, soil conservation, and protecting forests from damaging agents.

Summary of Evidence: Field observations and associated records were used to confirm practices. DOF has programs to ensure reforestation, for protection against damaging agents and wildfire, and for careful management of activities which could potentially impact soil and long-term productivity.

Objective 3 Protection and Maintenance of Water Resources

To protect the water quality of rivers, streams, lakes, wetlands and other water bodies through meeting or exceeding best management practices.

Summary of Evidence: A program of adherence to and monitoring of State BMPs coupled with field observations of a range of sites were the key evidence. Auditors visited the portions of field sites that were close to water resources.

Objective 4 Conservation of Biological Diversity

To manage the quality and distribution of wildlife habitats and contribute to the conservation of biological diversity by developing and implementing stand- and landscape-level measures that promote a diversity of types of habitat and successional stages, and the conservation of forest plants and animals, including aquatic species, as well as threatened and endangered species, Forests with Exceptional Conservation Value, old-growth forests and ecologically important sites.

Summary of Evidence: Use of the Natural Heritage Database, State Forest Procedure Manual, a comprehensive Environmental Assessment, the Nature Preserve program, State Wildlife Action Plan, State Forest Strategic Plan, field observations, policies for the conservation of the Indiana bat, and employment of an experienced wildlife biologist were the evidence used to assess the requirements involved in biodiversity conservation.

Objective 5 Management of Visual Quality and Recreational Benefits

To manage the visual impact of forest operations and provide recreational opportunities for the public.

Summary of Evidence: Indiana Division of Forestry provides excellent recreational opportunities for the public including walking, biking, and horse trails, camping and access to lakes and ponds. Records and field sites were reviewed to assess methods and results in visual management.
Objective 6  Protection of Special Sites
To manage lands that are geologically or culturally important in a manner that takes into account their unique qualities.

*Summary of Evidence*: Field observations of completed operations, records of special sites, interviews with staff archeologist, and visits to special sites were all factors in the strong finding for protection of special sites.

Objective 7  Efficient Use of Fiber Resources
To minimize waste and ensure the efficient use of fiber resources.

*Summary of Evidence*: Field observations of completed operations, contract clauses, and discussions with supervising field foresters provided the key evidence.

Objective 8  Recognize and Respect Indigenous Peoples’ Rights
To recognize and respect Indigenous Peoples’ rights and traditional knowledge.

*Summary of Evidence*: Policies and systems for receiving and responding to requests were used to determine conformance.

Objective 9  Legal and Regulatory Compliance
To comply with applicable federal, provincial, state and local laws and regulations.

*Summary of Evidence*: Field reviews of ongoing and completed operations and systems used to ensure conformance were the most critical evidence.

Objective 10  Forestry Research, Science and Technology
To invest in forestry research, science and technology, upon which sustainable forest management decisions are based and broaden the awareness of climate change impacts on forests, wildlife and biological diversity.

*Summary of Evidence*: DOF supports a variety of forestry research initiatives, including the Hardwood Ecosystem Experiment -- a collaborative research project that currently includes partnering organizations and agencies including researchers from six regional universities.

Objective 11  Training and Education
To improve the implementation of sustainable forestry practices through appropriate training and education programs.

*Summary of Evidence*: Training records of selected personnel, and records associated with harvest sites audited were the key evidence for this objective.

Objective 12  Community Involvement and Landowner Outreach
To broaden the practice of sustainable forestry through public outreach, education, and involvement, and to support the efforts of SFI Implementation Committees.

*Summary of Evidence*: Indiana Division of Forestry has annual state forest open houses that provide outreach, supplemented by the web site which has an on-line comment form.

Objective 13  Public Land Management Responsibilities
To participate and implement sustainable forest management on public lands.

*Summary of Evidence*: Indiana Division of Forestry seeks input into management decisions including the comment period for tract management plans, the most recent strategic plan, and the draft Indiana Bat Habitat Conservation Plan for State Forests. Each forest has annual state forest open houses that provide outreach.

Objective 14  Communications and Public Reporting
To increase transparency and to annually report progress on conformance with the SFI Forest Management Standard.

*Summary of Evidence*: Reports filed with SFI Inc. and the SFI Inc. website provided the key evidence.

Objective 15  Management Review and Continual Improvement
To promote continual improvement in the practice of sustainable forestry by conducting a management review and monitoring performance.

*Summary of Evidence*: Records of program reviews, agenda, and notes from management review meetings, and interviews with personnel from all involved levels in the organization were assessed.
Relevance of Forestry Certification

Third-party certification provides assurance that forests are being managed under the principles of sustainable forestry, which are described in the Sustainable Forestry Initiative Standard as:

1. **Sustainable Forestry**
   To practice **sustainable forestry** to meet the needs of the present without compromising the ability of future generations to meet their own needs by practicing a land stewardship ethic that integrates **reforestation** and the managing, growing, nurturing and harvesting of trees for useful products and **ecosystem services** such as the **conservation** of soil, air and water quality, carbon, **biological diversity**, **wildlife** and **aquatic habitats**, recreation and aesthetics.

2. **Forest Productivity and Health**
   To provide for regeneration after harvest and maintain the productive capacity of the forest land base, and to protect and maintain **long-term forest and soil productivity**. In addition, to protect forests from economically or environmentally undesirable levels of **wildfire**, pests, diseases, **invasive exotic plants and animals** and other damaging agents and thus maintain and improve **long-term forest health and productivity**.

3. **Protection of Water Resources**
   To protect water bodies and **riparian areas** and to conform with forestry **best management practices** to protect water quality.

4. **Protection of Biological Diversity**
   To manage forests in ways that protect and promote **biological diversity**, including animal and plant species, **wildlife habitats**, and ecological or natural community types.

5. **Aesthetics and Recreation**
   To manage the visual impacts of forest operations, and to provide recreational opportunities for the public.

6. **Protection of Special Sites**
   To manage lands that are ecologically, geologically or **culturally important** in a manner that takes into account their unique qualities.

7. **Responsible Fiber Sourcing Practices in North America**
   To use and promote among other forest landowners **sustainable forestry** practices that are both scientifically credible and economically, environmentally and socially responsible.

8. **Legal Compliance**
   To comply with applicable federal, provincial, state, and local forestry and related environmental laws, statutes, and regulations.

9. **Research**
   To support advances in sustainable forest management through forestry research, science and technology.

10. **Training and Education**
    To improve the practice of **sustainable forestry** through training and education **programs**.

11. **Community Involvement and Social Responsibility**
    To broaden the practice of **sustainable forestry** on all lands through community involvement, socially responsible practices, and through recognition and respect of **Indigenous Peoples’ rights and traditional forest-related knowledge**.

12. **Transparency**
    To broaden the understanding of forest certification to the **Fiber Sourcing** Standard by documenting certification audits and making the findings publicly available.

13. **Continual Improvement**
    To continually improve the practice of forest management, and to monitor, measure and report performance in achieving the commitment to **sustainable forestry**.

14. **Avoidance of Controversial Sources including Illegal Logging in Offshore Fiber Sourcing**
    Applies only to the SFI 2015-2019 Fiber Sourcing Standard
    To avoid wood fiber from illegally logged forests when procuring fiber outside of North America, and to avoid sourcing fiber from countries without effective social laws.

Notes: Not examined in 2019

Performance Measure 1.2

Program Participants shall not convert one forest cover type to another forest cover type, unless in justified circumstances.

1.2.1 Program Participants shall not convert one forest cover type to another forest cover type, unless the conversion:
   a. Is in compliance with relevant national and regional policy and legislation related to land use and forest management;
   b. Would not convert native forest types that are rare and ecologically significant at the landscape level or put any native forest types at risk of becoming rare; and
   c. Does not create significant long-term adverse impacts on Forests with Exceptional Conservation Value, old-growth forests, forests critical to threatened and endangered species, and special sites.

N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

1.2.2 Where a Program Participant intends to convert another forest cover type, an assessment considers:
   a. Productivity and stand quality conditions and impacts which may include social and economic values;
   b. Specific ecosystem issues related to the site such as invasive species, insect or disease issues, riparian protection needs and others as appropriate to site including regeneration challenges; and
   c. Ecological impacts of the conversion including a review at the site and landscape scale as well as consideration for any appropriate mitigation measures.

N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

Performance Measure 1.3

Program Participants shall not have within the scope of their certification to this SFI Standard, forest lands that have been converted to non-forest land use. Indicator:

1.3.1 Forest lands converted to other land uses shall not be certified to this SFI Standard. This does not apply to forest lands used for forest and wildlife management such as wildlife food plots or infrastructure such as forest roads, log processing areas, trails etc.

N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019
Objective 2  Forest Health and Productivity

To ensure long-term forest productivity, carbon storage and conservation of forest resources through prompt reforestation, afforestation, minimized chemical use, soil conservation, and protecting forests from damaging agents.

Performance Measure 2.1

Program Participants shall promptly reforest after final harvest. Indicators:

2.1.1 Documented reforestation plans, including designation of all harvest areas for either natural, planted or direct seeded regeneration and prompt reforestation, unless delayed for site-specific environmental or forest health considerations or legal requirements, through planting within two years or two planting seasons, or by planned natural regeneration methods within five years.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.1.2 Clear criteria to judge adequate regeneration and appropriate actions to correct understocked areas and achieve acceptable species composition and stocking rates for planting, direct seeding and natural regeneration.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.1.3 Plantings of exotic tree species should minimize risk to native ecosystems.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.1.4 Protection of desirable or planned advanced natural regeneration during harvest.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.1.5 Afforestation programs that consider potential ecological impacts of the selection and planting of tree species in non-forested landscapes.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

Performance Measure 2.2

Program Participants shall minimize chemical use required to achieve management objectives while protecting employees, neighbors, the public and the environment, including wildlife and aquatic habitats. Indicators:

2.2.1 Minimized chemical use required to achieve management objectives.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.2.2 Use of least-toxic and narrowest-spectrum pesticides necessary to achieve management objectives.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019

2.2.3 Use of pesticides registered for the intended use and applied in accordance with label requirements.

☐ N/A ☐ Conforms ☐ Exceeds ☐ O.F.I. ☐ Minor NC ☐ Major NC

Notes: Not examined in 2019
2.2.4 The World Health Organization (WHO) type 1A and 1B pesticides shall be prohibited, except where no other viable alternative is available.

</table>

2.2.8 Use of management practices appropriate to the situation, for example:

a. notification of adjoining landowners or nearby residents concerning applications and chemicals used;

b. appropriate multilingual signs or oral warnings;

c. control of public road access during and immediately after applications;

d. designation of streamside and other needed buffer strips;

e. use of positive shutoff and minimal-drift spray valves;

f. aerial application of forest chemicals parallel to buffer zones to minimize drift;

g. monitoring of water quality or safeguards to ensure proper equipment use and protection of streams, lakes and other water bodies;

h. appropriate transportation and storage of chemicals;

i. filing of required state or provincial reports; and/or

j. use of methods to ensure protection of threatened and endangered species.

Objective 3  Protection and Maintenance of Water Resources

To protect the water quality of rivers, streams, lakes, wetlands and other water bodies through meeting or exceeding best management practices.

Performance Measure 3.1

Program Participants shall meet or exceed all applicable federal, provincial, state and local water quality laws, and meet or exceed best management practices developed under Canadian or U.S. Environmental Protection Agency–approved water quality programs.

Indicators:

3.1.1  Program to implement federal, state or provincial water quality best management practices during all phases of management activities.

☐ N/A  ☒ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

The use of professional foresters to plan and oversee harvests, timber sale contracts with provisions to follow BMPs, pre-harvest meetings between foresters and logging contractors, sale supervision and weekly checklists signed by loggers, post-harvest inspections of all sites by a specialist, and the BMP audit system of every sale by a second-party comprise the program.

3.1.2  Contract provisions that specify conformance to best management practices.

☐ N/A  ☒ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: The Letter of Agreement for Sale of Timber on State Forest Land contains requirements regarding Indiana BMPs in items # 9, 10, 11, & 19. Review of timber sale agreements for harvest sites visited confirms that each has the BMP requirements.

3.1.3  Monitoring of overall best management practices implementation.

☐ N/A  ☐ Conforms  ☒ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: First party monitoring includes at least weekly site inspections with the results documented on the Timber Sale Visitation and Evaluations. Each sale is also officially “closed out” in regards to BMPs with an inspection by a BMP forester. Documentation was reviewed for the sites visited during the audit.

The BMP monitoring program is among the most robust known to the audit team. The report titled [1996 through 2018 Indiana Forestry Best Management Practices Audit Report: Monitoring Results State Forest Properties](https://www.in.gov/dnr/forestry/files/fo-2005_Forestry_BMP_Field_Guide.pdf) describes a long-term program of comprehensive second-party BMP audits that show high levels of implementation and effectiveness success protecting resources. The application and effectiveness rates for BMPs used to protect sites after timber harvests are excellent for the 656 sites monitored since 1996. The overall application rate is 86.04%, and the overall effectiveness rate is 92.02%.
**Performance Measure 3.2**

*Program Participants* shall implement water, *wetland* and *riparian protection* measures based on soil type, terrain, vegetation, ecological function, harvesting system, state *best management practices (BMPs)*, provincial guidelines and other applicable factors. Indicators:

<table>
<thead>
<tr>
<th>Indicator</th>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2.1</td>
<td></td>
<td>✓</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes: The use of BMPs, GIS, the design of all harvest projects by trained foresters, and the review of all projects by Central Office personnel comprise such a program. Further, there is an internal audit program for BMPs following all timber harvests (see 3.1.3 above). Harvest blocks (generally tracts), ridge-top roads, and skid road systems are designed to avoid stream crossings in harvests.

The first choice is to avoid stream crossings. However, that is not always possible. The discussion of careful planning and monitoring of stream crossings used on a tract adjacent to a site visit tract in Owen-Putnam illustrated the focus on this indicator.

<table>
<thead>
<tr>

<th>Major NC</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2.3</td>
<td></td>
<td>✓</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes: This process begins with the maps included with the management guide prescriptions and is followed by the more specific timber sale map, on-going timber sale inspections, and BMP monitoring.

Field observations confirmed protection of these features, including use of buffers, care taken to minimize stream crossings, but when necessary design proper stream crossings and to stabilize them following completion of work. Roads are well-designed and most are well-maintained.

<table>
<thead>
<tr>
<th>Indicator</th>
<th>N/A</th>

<th>Major NC</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2.4</td>
<td></td>
<td>✓</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes: Confirmed that the “BMP Field Guide – Road and Trail Maintenance” section provides general guidelines. Seller (DOF) has the authority to halt logging activities. According to the Timber Sale Contract item #22.

Interviews with Resource Specialists and review of completed Timber Sale Visitation and Evaluations indicate that they work with the loggers regarding expectations that harvesting is halted when wet weather becomes an issue.

Challenges exist at several of the State Forests because of interim bat restrictions which preclude harvesting during the summer and early fall, which are the driest periods.
### Objective 4  Conservation of Biological Diversity

To manage the quality and distribution of wildlife habitats and contribute to the conservation of biological diversity by developing and implementing stand- and landscape-level measures that promote a diversity of types of habitat and successional stages, and the conservation of forest plants and animals, including aquatic species, as well as threatened and endangered species, Forests with Exceptional Conservation Value, old-growth forests and ecologically important sites.

#### Performance Measure 4.1

Program Participants shall conserve biological diversity. Indicators:

<table>

Objective 6  Protection of Special Sites

To manage lands that are geologically or culturally important in a manner that takes into account their unique qualities.

Performance Measure 6.1

Program Participants shall identify special sites and manage them in a manner appropriate for their unique features. Indicators:

6.1.1  Use of information such as existing natural heritage data, expert advice or stakeholder consultation in identifying or selecting special sites for protection.

☐ N/A  ☐ Conforms  ☒ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: Cultural sites are considered in the Resource Management Guides.

There is an exceptional program for identifying and managing culturally important sites.

The Indiana State Forest Strategic Plan 2015-2019 has two goals regarding identifying special sites for protection and appropriate management:

“Continue to review projects by the DOF Archaeologist to conserve and avoid significant impact on cultural and archaeological resources.” And “Continue to review the heritage database in formulating forest management decisions or conducting forest management operations, and avoid impacts to ecologically significant resources.”

Indiana Division of Forestry has a robust cultural resources identification and protection program including employing a full-time archaeologist. Archaeological clearance is needed for all except the most minor ground disturbing activities. Any work on historic structures also requires clearance. Properties have awareness (lists) of cultural resources, and management activities avoid or buffer known cultural resource areas.

6.1.2  Appropriate mapping, cataloging and management of identified special sites.

☐ N/A  ☐ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: Not examined in 2019
Objective 7  Efficient Use of Fiber Resources

To minimize waste and ensure the efficient use of fiber resources.

Performance Measure 7.1

Program Participants shall employ appropriate forest harvesting technology and in-woods manufacturing processes and practices to minimize waste and ensure efficient utilization of harvested trees, where consistent with other SFI Standard objectives. Indicator:

7.1.1 Program or monitoring system to ensure efficient utilization, which may include provisions to ensure:

- a. management of harvest residue (e.g., slash, limbs, tops) considers economic, social and environmental factors (e.g., organic and nutrient value to future forests and the potential of increased fuels build-up) and other utilization needs;
- b. training or incentives to encourage loggers to enhance utilization;
- c. exploration of markets for underutilized species and low-grade wood and alternative markets (e.g., bioenergy markets); or
- d. periodic inspections and reports noting utilization and product separation.

☐ N/A  ☐ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: Not examined in 2019
Objective 8  Recognize and Respect Indigenous Peoples’ Rights

To recognize and respect Indigenous Peoples’ rights and traditional knowledge.

Performance Measure 8.1

Program Participants shall recognize and respect Indigenous Peoples’ rights. Indicator:

8.1.1  Program Participants will provide a written policy acknowledging a commitment to recognize and respect the rights of Indigenous Peoples.

☐ N/A  ☑ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: The Division of Forestry has a Cultural Resources Policy that includes acknowledging its commitment to recognize and respect the rights of Indigenous Peoples. Confirmed by review of the Cultural Resource Management Policy and Procedure that is maintained on the Division’s shared drive accessible by staff.

Performance Measure 8.2

Program Participants with forest management responsibilities on public lands shall confer with affected Indigenous Peoples with respect to sustainable forest management practices. Indicator:

8.2.1  Program that includes communicating with affected Indigenous Peoples to enable Program Participants to:
   a. understand and respect traditional forest-related knowledge;
   b. identify and protect spiritually, historically, or culturally important sites;
   c. address the use of non-timber forest products of value to Indigenous Peoples in areas where Program Participants have management responsibilities on public lands; and
   d. respond to Indigenous Peoples’ inquiries and concerns received.

☐ N/A  ☑ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: The Indiana Division of Forestry employs a full-time archaeologist who has knowledge about tribal history and tribal use of the lands in pre-historic times. The program for archaeological review includes on-site or records review of all land-disturbing activities, with field surveys for projects where potentially intact resources may be present. If evidence of an archeological site use is found, the archeologist submits a site form with the Indiana Division of Historic Preservation and Archaeology.

Interviewees in the Indiana Division of Forestry are aware of general aspects of past indigenous use of forests and resources, including hunting, gathering, and Wyandotte Chert which can be found in the Harrison-Crawford State Forest.

The Potawatomi tribe is the only federally recognized tribe that has land in the state. Existing groups are not known to be interested in gathering or using non-timber forest products from state forests. Any inquiries received would be responded to through normal processes. There is a policy and program for protecting all known historic and prehistoric archeological sites of potential significance, and most sites even if not significant and primary. Most known sites are historic (not tribal). Indiana Division of Forestry has contacted both local and federal tribes known to have been active in Indiana on two occasions, but not recently. Several responses were received but no concerns were voiced regarding the management of state forests.

Performance Measure 8.3

Program Participants are encouraged to communicate with and shall respond to local Indigenous Peoples with respect to sustainable forest management practices on their private lands. Indicators:

8.3.1  Program Participants are aware of traditional forest-related knowledge, such as known cultural heritage sites, the use of wood in traditional buildings and crafts, and flora that may be used in cultural practices for food, ceremonies or medicine.

☒ N/A  ☐ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: Indiana Division of Forestry is a public landowner; this Performance Measure does not apply.

8.3.2  Respond to Indigenous Peoples’ inquiries and concerns received.

☒ N/A  ☐ Conforms  ☐ Exceeds  ☐ O.F.I.  ☐ Minor NC  ☐ Major NC

Notes: Indiana Division of Forestry is a public landowner; this Performance Measure does not apply.
Objective 9  Legal and Regulatory Compliance

To comply with applicable federal, provincial, state and local laws and regulations.

Performance Measure 9.1

*Program Participants* shall comply with applicable federal, provincial, state and local forestry and related social and environmental laws and regulations. Indicators:

9.1.1  Access to relevant laws and regulations in appropriate locations.

**Objective 10 Forestry Research, Science and Technology**

To invest in forestry research, science and technology, upon which sustainable forest management decisions are based and broaden the awareness of climate change impacts on forests, wildlife and biological diversity.

**Performance Measure 10.1**

*Program Participants* shall individually and/or through cooperative efforts involving *SFI Implementation Committees*, associations or other partners provide in-kind support or funding for forest research to improve forest health, productivity and sustainable management of forest resources, and the environmental benefits and performance of forest products. Indicators:

10.1.1 Financial or in-kind support of research to address questions of relevance in the region of operations. Examples could include, but are not limited to, areas of forest productivity, water quality, biodiversity, community issues, or similar areas which build broader understanding of the benefits and impacts of forest management.

Notes: In 2018, DNR Forestry provided direct support to 14 research projects investigating the ecological effects of forest management on State Forests. All of this support went to researchers involved with the Hardwood Ecosystem Experiment (HEE, [www.heeforeststudy.org](http://www.heeforeststudy.org)), a long-term project based at Morgan-Monroe and Yellowwood. DNR Forestry provided support to nine graduate/post-graduate researchers in 2018, working on questions related to forest management and ecological impacts. DNR Forestry-supported researchers published eight articles in peer-reviewed scientific journals in 2018.

HEE accomplishments since 2006: 59 peer-reviewed research articles, 27 theses and dissertations, and six peer-reviewed extension publications and technical report collections.

10.1.2 Research on genetically engineered trees via forest tree biotechnology shall adhere to all applicable federal, state, and provincial regulations and international protocols ratified by the United States and/or Canada depending on jurisdiction of management.

<table>
<thead>
<tr>

<th>Major NC</th>
</tr>
</thead>
</table>

Notes: The Indiana Division of Forestry does not conduct research on genetically engineered trees.

**Performance Measure 10.2**

*Program Participants* shall individually and/or through cooperative efforts involving *SFI Implementation Committees*, associations or other partners develop or use state, provincial or regional analyses in support of their sustainable forestry programs. Indicator:

10.2.1 Participation, individually and/or through cooperative efforts involving *SFI Implementation Committees* and/or associations at the national, state, provincial or regional level, in the development or use of some of the following:

a. regeneration assessments;
b. growth and drain assessments;
c. best management practices implementation and conformance;
d. biodiversity conservation information for family forest owners; and
e. social, cultural or economic benefit assessments.

<table>
<thead>
<tr>

<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: a. regeneration assessments: U.S. Forest Service’s FIA; and CFI (based on FIA) on state forests – one fifth of the plots are visited each year

b. growth and drain assessments: Jeff Settle contributes data to the US Forest Service’s primary processing survey (timber product output survey every five years by mill, county, and species. The last survey was in 2013).

c. best management practices implementation and conformance: BMP surveys done on Indiana State Forests (every harvest) and on private Classified Forest Land (10% sample)
d. N/A
e. social, cultural or economic benefit assessments: found in the Indiana Statewide Forest Assessment. Indiana Division of Forestry White Paper “Forest Management and the Economy”.

---

Document #: 4742; Revision: 28; Status: Release; Release Date: 24 Jul 2019

This is a confidential document and may be reproduced only with the permission of NSF.
Performance Measure 10.3

Program Participants shall individually and/or through cooperative efforts involving SFI Implementation Committees, associations or other partners broaden the awareness of climate change impacts on forests, wildlife and biological diversity. Indicators:

10.3.1 Where available, monitor information generated from regional climate models on long-term forest health, productivity and economic viability.

- N/A
- Conforms
- Exceeds
- O.F.I.
- Minor NC
- Major NC

Notes: Confirmed by interview that Biologist Scott Haulton monitors the US Forest Service Clearing House Climate Change tab and emails staff when significant changes occur.
In addition, Purdue has produced a series of publications on how climate change will impact Indiana forests and one of the topics during the annual Division meeting was about climate change.

10.3.2 Program Participants are knowledgeable about climate change impacts on wildlife, wildlife habitats and conservation of biological diversity through international, national, regional or local programs.

- N/A
- Conforms
- Exceeds
- O.F.I.
- Minor NC
- Major NC

Notes: Confirmed by interview that Biologist Scott Haulton monitors the US Forest Service Clearing House Climate Change as well as the USGS bird atlas that monitors how climate change impacts birds. Also, one of the topics during the annual Division meeting was about climate change.
**Objective 11  Training and Education**

To improve the implementation of *sustainable forestry* practices through appropriate training and education *programs*.

**Performance Measure 11.1**

*Program Participants* shall require appropriate training of personnel and contractors so that they are competent to fulfill their responsibilities under the *SFI 2015-2019 Forest Management Standard*. Indicators:

11.1.1  Written statement of commitment to the *SFI 2015-2019 Forest Management Standard* communicated throughout the organization, particularly to facility and woodland managers, and field foresters.

Performance Measure 11.2

Program Participants shall work individually and/or with SFI Implementation Committees, logging or forestry associations, or appropriate agencies or others in the forestry community to foster improvement in the professionalism of wood producers.

Indicators:

11.2.1 Participation in or support of SFI Implementation Committees to establish criteria and identify delivery mechanisms for wood producer training courses and periodic continuing education that address:
   a. awareness of sustainable forestry principles and the SFI program;
   b. best management practices, including streamside management and road construction, maintenance and retirement;
   c. reforestation, invasive exotic plants and animals, forest resource conservation, aesthetics and special sites;
   d. awareness of responsibilities under the U.S. Endangered Species Act, the Canadian Species at Risk Act, and other measures to protect wildlife habitat (e.g., Forests with Exceptional Conservation Value);
   e. awareness of rare forested natural communities as identified by provincial or state agencies, or by credible organizations such as NatureServe, The Nature Conservancy, etc.
   f. logging safety;
   g. U.S. Occupational Safety and Health Administration (OSHA) and Canadian Centre for Occupational Health and Safety (CCOHS) regulations, wage and hour rules, and other provincial, state and local employment laws;
   h. transportation issues;
   i. business management;
   j. public policy and outreach; and
   k. awareness of emerging technologies.

N/A □ Conforms □ Exceeds □ O.F.I. □ Minor NC □ Major NC
Notes: Not examined in 2019

11.2.2 The SIC-approved wood producer training programs shall have a continuing education component with coursework that supports the current training programs, safety and the principles of sustainable forestry.

N/A □ Conforms □ Exceeds □ O.F.I. □ Minor NC □ Major NC
Notes: Not examined in 2019

11.2.3 Participation in or support of SFI Implementation Committees to establish criteria for recognition of logger certification programs, where they exist, that include:
   a. completion of SFI Implementation Committee recognized logger training programs and meeting continuing education requirements of the training program;
   b. independent in-the-forest verification of conformance with the logger certification program standards;
   c. compliance with all applicable laws and regulations including responsibilities under the U.S. Endangered Species Act, the Canadian Species at Risk Act and other measures to protect wildlife habitat;
   d. use of best management practices to protect water quality;
   e. logging safety;
   f. compliance with acceptable silviculture and utilization standards;
   g. aesthetic management techniques employed where applicable; and
   h. adherence to a management or harvest plan that is site specific and agreed to by the forest landowner.

N/A □ Conforms □ Exceeds □ O.F.I. □ Minor NC □ Major NC
Notes: Not examined in 2019
Objective 12  Community Involvement and Landowner Outreach

To broaden the practice of **sustainable forestry** through public outreach, education, and involvement, and to support the efforts of **SFI Implementation Committees**.

Performance Measure 12.1

*Program Participants* shall support and promote efforts by consulting foresters, state, provincial and federal agencies, state or local groups, professional societies, *conservation* organizations, *Indigenous Peoples* and governments, community groups, sporting organizations, labor, universities, extension agencies, the *American Tree Farm System®* and/or other landowner cooperative programs to apply *principles* of sustainable forest management. Indicators:

12.1.1 Support, including financial, for efforts of **SFI Implementation Committees**.

- **N/A**
- Conforms
- Exceeds
- O.F.I.
- Minor NC
- Major NC

Notes: There is no Indiana SFI Implementation Committee. The INDRN coordinates logger training events which involves 2 training events annually where usually all modules are offered, funds (via grants) the IN logger training program, and maintains the database.

The DOF annually participates in and supports the **Indiana Forestry Woodland Owners Association** that promotes forestry across the state and also supports the Indiana Forestry Educational Foundation which provides grants to land owners conducting forestry education events. Three DOF foresters are on the board.

12.1.2 Support, individually or collaboratively, education and outreach to forest landowners describing the importance and providing implementation guidance on:

- best management practices;
- reforestation and afforestation;
- visual quality management;
- conservation objectives, such as critical wildlife habitat elements, biodiversity, threatened and endangered species, and Forests with Exceptional Conservation Value;
- management of harvest residue (e.g., slash, limbs, tops) considers economic, social, environmental factors (e.g., organic and nutrient value to future forests) and other utilization needs;
- control of invasive exotic plants and animals;
- characteristics of *special sites*; and
- reduction of wildfire risk.

- **N/A**
- Conforms
- Exceeds
- O.F.I.
- Minor NC
- Major NC

Notes: IN Division of Forestry has developed the **Logging and Forestry Best Management Practices Field Guide**. The Indiana State Forest Strategic Plan 2015-2019 contains a section on public education about forestry and conservation. A new strategic plan is being developed. The agency is involved in considerable outreach and education for forest landowners, including information on its website and numerous brochures located at the state park offices and trail kiosks.

The Indiana Division of Forestry website [http://www.in.gov/dnr/forestry/2845.htm](http://www.in.gov/dnr/forestry/2845.htm) includes subpages or documents covering: getting help from a district forester, landowner grants and cost share assistance, tree planting, classified forests, and other topics.

DoF provided financial and in-kind support for the production of outreach/extension materials and a wildlife-oriented workshop tailored to private forest owners.

12.1.3 Participation in efforts to support or promote conservation of managed forests through voluntary market-based incentive programs such as current-use taxation programs, Forest Legacy Program or conservation easements.

<table>
<thead>
<tr>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: The state participates in the Forest Legacy Program but there hasn’t been a candidate for about six years. The ranking process makes it difficult for projects in Indiana to get funded.

The Indiana Division of Forestry has an active land acquisition program. Most acquisitions are to acquire inholdings, although there are some purchases of larger blocks to expand forests. One example is the Deveny/Chute Farm which is about 400 acres that was sold to the State under a Life Estate arrangement. That means that the current landowner maintains the property until death and then ownership is transferred to the Division of Forestry. The purchase was made through funding from the Indiana Heritage Trust (funded by environmental license plates), the Bicentennial Trust (was a State trust), and a sportsman’s group.

The Indiana State Forest Strategic Plan 2015-2019 states the following goal under the heading Land Ownership and Acquisitions: “Conserve important lands through strategic acquisitions, active resource management and boundary line management. Acquire 1,500 acres of lands of strategic and/or ecological importance to the long-term conservation of Indiana’s working forests in partnership with non-governmental organizations, the Bi-Centennial Nature Trust, the Indiana Heritage Trust, and State Forest timber revenue.”

Performance Measure 12.2

Program Participants shall support and promote, at the state, provincial or other appropriate levels, mechanisms for public outreach, education and involvement related to sustainable forest management. Indicator:

12.2.1 Periodic educational opportunities promoting sustainable forestry, such as

- field tours, seminars, websites, webinars or workshops;
- educational trips;
- self-guided forest management trails;
- publication of articles, educational pamphlets or newsletters; or
- support for state, provincial, and local forestry organizations and soil and water conservation districts.

<table>
<thead>
<tr>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: There are two Nature Centers/Forest Education Centers operated at state forests. A new welcome center with educational displays opened in May 2019 at the Morgan-Monroe State Forest headquarters. A forestry booth is set up at the Indiana State Fair. Property Newsletters and Annual Open Houses are important mechanisms to educate the public about sustainable forestry. Several forests have self-guided trails.

DoF provided financial and in-kind support for the production of outreach/extension materials and a wildlife-oriented workshop tailored to private forest owners.

The 2018 Division of Forestry Annual Report includes an EDUCATION/INFORMATION SECTION:

PROJECT LEARNING TREE

A total of 24 professional development workshops were conducted across the state in 2018 by 16 facilitators, training 320 participants. Included was the Natural Resources Teacher Institute, in which 18 educators completed a week-long immersion workshop that focused on Indiana forests and forestry.

In 2018, Indiana PLT staff:

- Conducted two facilitator trainings and trained three new facilitators.
- Awarded Facilitator of the Year to Brian Planks, environmental education consultant.
- Co-wrote article on PLT for The New Teacher Advocate, a publication of Kappa Delta Pi and facilitated sponsorship discussions between National PLT office and KDP.
- Conducted student programs on forests and forestry for more than 750 kids.
SIGNS, DISPLAYS, EXHIBITS

• Designed signs for Yellowwood and Jackson-Washington state forests and the Knobstone Trail:
  o Young Forest Demonstration Area
  o Yellowwood Storm Area
  o Knobstone Trail Southern Terminus

• Designed/worked with Communications on Morgan-Monroe State Forest Office:
  o Morgan-Monroe History Timeline (23 panels)
  o Wood Species Panels (21 species)
  o Forest Management: It’s For the Birds
  o Working on tickets for 6 more displays/exhibits

• Additional educational signs were developed and installed across all state forest properties. For example, Benefits of Forest Management and Pine Conversion.

NATIONAL FFA FORESTRY CAREER DEVELOPMENT EVENT

• Led planning for field practicum portion of event, held at Morgan-Monroe State Forest.
• Developed and implemented activities including Tree ID, timber cruising, wood products ID, compass and pacing, team activity and team interview.
• A total of 40 state teams participated on Oct. 25.

Performance Measure 12.3

Program Participants shall establish, at the state, provincial, or other appropriate levels, procedures to address concerns raised by loggers, consulting foresters, employees, unions, the public or other Program Participants regarding practices that appear inconsistent with the SFI Standard principles and objectives.

12.3.1 Support for SFI Implementation Committees (e.g., toll-free numbers and other efforts) to address concerns about apparent nonconforming practices.

- [ ] N/A    [ ] Conforms    [ ] Exceeds    [ ] O.F.I.    [ ] Minor NC    [ ] Major NC

Notes: There is no Indiana SIC, see below.

12.3.2 Process to receive and respond to public inquiries. SFI Implementation Committees shall submit data annually to SFI Inc. regarding concerns received and responses.

- [ ] N/A    [ ] Conforms    [ ] Exceeds    [ ] O.F.I.    [ ] Minor NC    [ ] Major NC

Notes: The Indiana Division of Forestry has a system to track comments, including a database and a written summary. The division’s web-site provides an e-form where the public can input a comment or concern. Public comment forms are available to visitors; most are filled out by recreation users.
Objective 13  *Public Land* Management Responsibilities

To participate and implement sustainable forest management on *public lands*.

**Performance Measure 13.1**

*Program Participants* with forest *management responsibilities on public lands* shall participate in the development of *public land* planning and management processes. Indicators:

Objective 14  Communications and Public Reporting

To increase transparency and to annually report progress on conformance with the SFI Forest Management Standard.

Performance Measure 14.1

A Program Participant shall provide a summary audit report, prepared by the certification body, to SFI Inc. after the successful completion of a certification, recertification or surveillance audit to the SFI 2015-2019 Forest Management Standard. Indicator:

14.1.1 The summary audit report submitted by the Program Participant (one copy must be in English), shall include, at a minimum,  
   a. a description of the audit process, objectives and scope;  
   b. a description of substitute indicators, if any, used in the audit and a rationale for each;  
   c. the name of Program Participant that was audited, including its SFI representative;  
   d. a general description of the Program Participant’s forestland included in the audit;  
   e. the name of the certification body and lead auditor (names of the audit team members, including technical experts may be included at the discretion of the audit team and Program Participant);  
   f. the dates the audit was conducted and completed;  
   g. a summary of the findings, including general descriptions of evidence of conformity and any nonconformities and corrective action plans to address them, opportunities for improvement, and exceptional practices; and  
   h. the certification decision.  

The summary audit report will be posted on the SFI Inc. website (www.sfiprogram.org) for public review.

### Objective 15  Management Review and Continual Improvement

To promote continual improvement in the practice of sustainable forestry by conducting a management review and monitoring performance.

### Performance Measure 15.1

*Program Participants* shall establish a management review system to examine findings and progress in implementing the *SFI 2015-2019 Forest Management Standard*, to make appropriate improvements in programs, and to inform their employees of changes. Indicators:

15.1.1 System to review commitments, programs and procedures to evaluate effectiveness.

<table>
<thead>
<tr>
<th></th>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: System includes an annual management review that covers the SFI Program. It also includes an annual internal audit. Confirmed by a review of agenda that an annual review occurred October 3, 2019 and was attended by the management team including the State Forester, Assistant State Forester, Forest Certification Coordinator, Forestry Wildlife Specialist, Property Program Specialist, and Forestry Archaeologist. The review included a review of the internal audit findings, staff concerns related to certification, and 2019 certification audit schedule.

The process appears to be robust and effective.

This program is modest in size, with a very “flat” organizational structure, and has a remarkable degree of contact between the central office management and staff specialists and the property managers and resource specialists (foresters). Specialists in silviculture/operations, wildlife, and archaeology review every proposed activity and provide input on many projects. The system is highly effective at ensuring consistency of operations while allowing for needed variation based on local conditions.

15.1.2 System for collecting, reviewing, and reporting information to management regarding progress in achieving SFI 2015-2019 Forest Management Standard objectives and performance measures.

<table>
<thead>
<tr>
<th></th>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: Central office personnel review and approve projects, ensuring consistency and that senior management understands progress. For example, John Friedrich, Property Program Specialist reviews all proposed timber sales for completeness of paperwork and overall compliance and maintains overall timber harvest records. An audit of ten percent of timber sales is conducted by counting stumps as a financial control measure, but one which provides an additional opportunity to view results of harvests. The system includes recordkeeping, reviewing, and reporting information to the SFI Team. Several examples arose during the audit that verified that the system is strong and works well. Potential issues that may have fallen through the cracks with a less robust system were caught early in the process and never became a problem.

15.1.3 Annual review of progress by management and determination of changes and improvements necessary to continually improve conformance to the SFI 2015-2019 Forest Management Standard.

<table>
<thead>
<tr>
<th></th>
<th>N/A</th>
<th>Conforms</th>
<th>Exceeds</th>
<th>O.F.I.</th>
<th>Minor NC</th>
<th>Major NC</th>
</tr>
</thead>
</table>

Notes: System includes an annual management review which covers the SFI Program. It also includes an annual internal audit. Confirmed by a review of agenda that an annual review occurred October 3, 2019 and was attended by the management team including the State Forester, Assistant State Forester, Forest Certification Coordinator, Forestry Wildlife Specialist, Property Program Specialist, and Forestry Archaeologist. The review included a review of the internal audit findings, staff concerns related to certification, and 2019 certification audit schedule.

The process appears to be robust and effective.

Management team internal audit review of property John, Scott, AJ, Brenda, and Brad. Review files, review field sites, and interact with Property staff.

Management team meets to discuss the findings and then presents those to Jack.

## Activities / notes

### Bear Wallow Tree Planting

4-acre afforestation site sponsored by the Clif Bar & Co Bakery. Site planted with a mixture of Red Oak, Walnut and White Oak that appeared to be establishing well. The site had an 8 ft fence to prevent deer access. The planting involved approximately 30 community members from the local Clif Bar Bakery.

### C12 T8

Timber sale site that produced approximately 540,000 board feet. Boundaries were clearly marked and mapped. Orange paint was used to mark boundaries with private land owners. Good neighbor letters were sent to the adjacent property owners prior to harvest. No comments were received for this particular timber sale.

Clear buffers were maintained on riparian zones where intermittent streams were mapped. The protected areas included rare plant values such as Yellow Lady Slippers.

A section of the harvest was shut down as the contractor had deviated from the harvest plan and caused extensive rutting in the harvest machine. This was a good example of harvest supervision and taking the correct actions to remedy the issue. A number of Shagbark Hickories were retained, along with Yellowwood species. The Tecumseh trail was re-routed for the duration of the harvest, and signage outlined the detour.

### Acquisition site – Girl Scout Camp

The acquisition was in excess of 300 acres in 3 parcels over the course of 10 years. The site includes a known Bat Roost Site. The State has plans to improve the site. Currently researchers have accommodations in the camp. There is scope to increase the recreation on site to include mountain bike access. In spring 2019, there was a 35-acre shelterwood harvest and burn. Discussion regarding Indigenous affairs and considerations. The Director of the Department of Natural Resources sits on the board of Indiana Native American and Indiana Affairs Commission. The DOF Archeologist liaises with the DHPA and attends meetings as necessary.

### Cultural Site

Turn of the century Milk Barn. This was located within a mile of adjacent harvest tract. Site contained the plant indicator species such as periwinkle and spice bush. Discussion on soil probe and soil sifting prior to any disturbance to ensure no sites are archaeological significance are damaged.

### C315 and C319

Two salvage harvest tracts adjacent to each other. The salvage harvest followed a 2017 storm. A small volume was extracted from a steep slope. Steep skid trail was well managed and the soil was largely undisturbed.

### HCVF site - Yellowwood

591-acre site with a 20- and 30-acre section in the Nature Preserve. INDNR will harvest to manage the Yellowwood as it is a rare and imperiled tree. The work to date to release the saplings has shown a good response rate. Each of the 819 yellowwood trees in the area are flagged and put in GPS. Yellowwood are shade intolerant and much work is being undertaken at a research level to enhance the presence of this species.

Hack and squirt chemical application was not considered so no collateral damage occurs through tree collapse.

### AmeriCorps Restoration Project

60-acre section of forest abutting the roadway, whereby invasive species were extracted. The species included Autumn olive and burning bush. A good neighbor letter was sent to adjacent landowners on 10/31/18 notifying them of the invasive control.
