Important Note

Unlike in previous deer management hunts at Turkey Run State Park, there will be “NO**” vehicle transportation or staff assistance given to hunters by park staff to extract deer from remote areas of the park. The hunter is responsible for retrieving deer and for its transportation to the park’s designated check station (**Nature Center**).**

Additionally, hunters will NOT be assigned to specific hunting areas. Hunters may hunt in any part of the park they choose (with the exception of safety zones) for the dates they have been drawn. Please read the procedures for checking-in and checking-out.

We appreciate your willingness to help manage the impact from deer browsing. For this management hunt to be effective, please harvest any deer that presents a safe and ethical shot (within established bag limits), especially those that are antlerless. Please make every effort to be present during the management hunt. The number of hunters allowed at each park is strategically calculated. Your absence affects how successfully we reach our objective of a balanced ecosystem. Our #1 concern during this hunt is safety. With this in mind, the following information and rules apply:

Turkey Run State Park's **Nature Center** will be utilized as the check station for the collection of biological data.

TAKING OF ANTLERED & ANTLERLESS DEER

Please keep in mind the purpose of your deer hunting opportunity on Division of State Parks properties is to reduce the deer herd in order to prevent overbrowsing and the resulting damage to the properties’ vegetation.

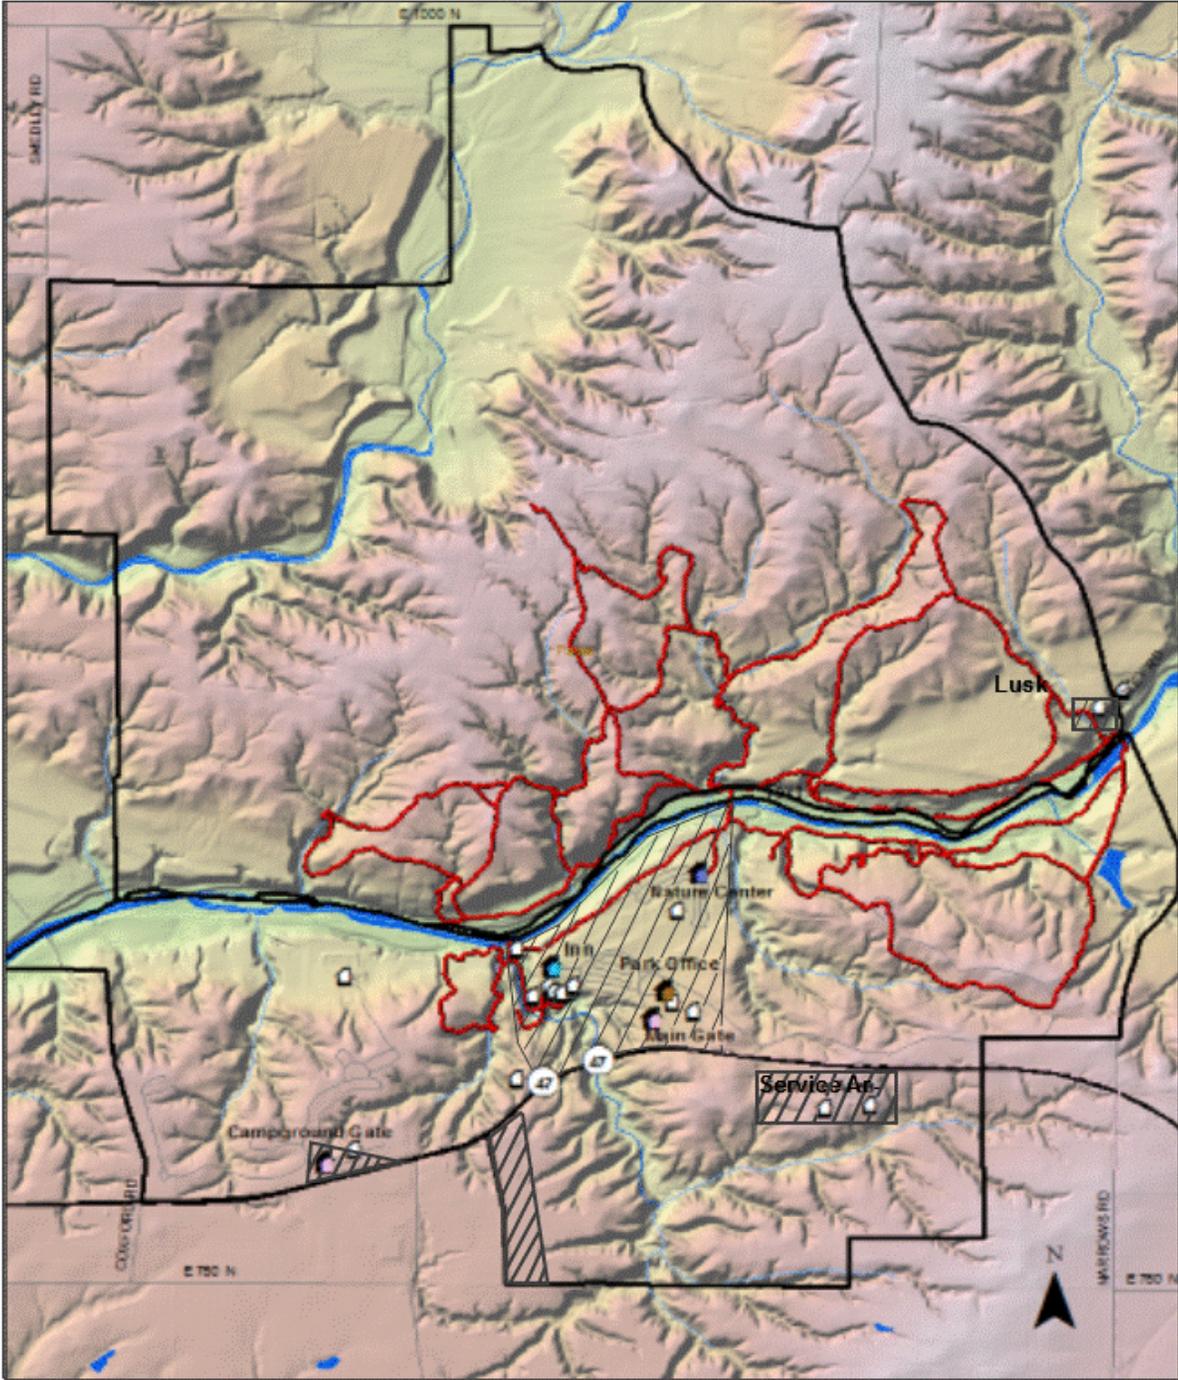

Our primary goal is to take does since they have the largest long-term impact on a population. However, we recognize that antlered deer also directly contribute to the grazing impacts on the properties and appreciate your help with their removal. We are concerned that some hunters may be passing up antlerless deer and deer with small antlers. Those hunters who pass on opportunities to remove deer with no or small antlers are actually hurting our ability to reduce the overbrowsing problem. Whenever you have an opportunity to safely make an accurate, well-placed shot, please help us by taking that deer, regardless of the antler size.

We may also have hunters passing up deer because they have filled their freezer. While we do not want deer to be taken that will be wasted, if you do not need the meat from the 2nd or 3rd deer, please consider trying to locate someone prior to our deer management hunt who needs additional deer meat.

We do not want to restrict your opportunity to take home a deer, including its antlers. However, we may be forced to do so in the future if today’s hunters pass up deer that need to be removed.

Thank you for your help in this important effort
