

INDIANA DEPARTMENT OF NATURAL RESOURCES
DIVISION OF STATE PARKS

2026 STATE PARK DEER MANAGEMENT HUNT INFORMATION SHEET

Indiana Department
of Natural Resources

Prophetstown State Park
765-567-4919

THIS IS A FIREARMS ONLY HUNT

Please print a copy of this document for your reference. You are responsible for understanding all the following information.

Important Note

We appreciate your willingness to help manage the impact from deer browsing. For this management hunt to be effective, please harvest any deer that presents a safe and ethical shot (within established bag limits), especially those that are antlerless. Please make every effort to be present during the management hunt. The number of hunters allowed at each park is strategically calculated. Your absence affects how successfully we reach our objective of a balanced ecosystem. Our No. 1 concern during this hunt is safety. With this in mind, the following information and rules apply:

- General: All Indiana DNR Property Rules and Indiana Hunting Regulations will be enforced. Hunters are permitted to harvest deer only. No other animals may be taken during the management hunt. Friends and family will not be permitted to wait for hunters on the property during the hunt periods.
- Date & Time: The 2026 deer management hunts will be conducted on November 16 & 17 and on November 30 & December 1. The park will be closed to the general public starting from 8 p.m. ET (7 p.m., CT) on Sunday, November 15 before the first hunt period through 8 a.m. ET (7 a.m. CT) on Wednesday, November 18 and 8 p.m. on Sunday, November 29 before the second hunt period through 8 a.m. ET (7 a.m. CT) Wednesday, December 2 following the second hunt period. **ALL HUNTERS WILL NEED A PHOTO ID TO ENTER AND EXIT THE PROPERTY.**
- Hunt Hours: Hunting hours are ½ hour before sunrise until 4 p.m. ET (3 p.m. CT) on the days of the hunt. Hunters may enter the park beginning at 5:30 a.m. ET on hunt days. Each hunter will be required to show the gate attendant at the Main Gate a photo ID (driver's license). Hunters must be out of the park by 6 p.m. ET.

Open House:	An informational open house may be held at a date prior to the hunt. Information about the open house will be sent to drawn hunters. Attendance is not mandatory but is encouraged. For additional questions and information, please contact the property office.
Hunter Sign-In:	All entrances and exits to/from the park must be through the Main Gate located on Swisher Road. NOTE: Our entrance road veers to the right off of Swisher Road. No other entry/exit points will be allowed. All hunters will need to check-in and check-out when entering or exiting the property at the Main Gate. Only hunters who have been selected for the deer hunts will be allowed entry into the park. There will be no park entrance fee during the hunt period; however, those choosing to scout the area in advance of the hunt will be required to pay the gate fee if it is being collected. There will be no fee charged for those attending the informational open house. A photo ID and hunting license will need to be shown to enter the property.
Bag Limit:	During each hunt period for which you have been drawn you are allowed to take up to three deer, only one of which can be antlered. These deer do not count against your regular state deer hunting license or bag limit. Please do not pass on antlerless deer for deer with antlers.
Firearms:	Hunters are permitted to use firearms that meet the specifications set forth in IC 14-22-2-8 and described in the 2026-2027 Indiana Hunting & Trapping Guide). Archery equipment will NOT be permitted for these hunts, including the use of crossbows.
Check Station:	All deer must be transported to the check station in the designated location on the property for biological data collection prior to leaving the property. You will be asked the sex of the deer and whether it is antlered or antlerless. Legal check-in is the responsibility of the hunter and is described below. The Check Station will be the Main Gate from 9 a.m. to 6 p.m. ET on hunt days. Hunters must be out of the park by 6 p.m.
Deer Check-In:	Hunters who successfully harvest a deer at state park deer management hunts must bring the deer to the designated location on the property for biological information to be recorded. The deer must have a temporary transportation tag completed and attached immediately upon harvest. Temporary transportation tags are provided below. The deer must also be checked in through the online check-in system. Staff at parks are only keeping tallies of harvested deer, not checking them in. It is the hunter's responsibility to complete the legal check-in.

Deer can be checked in 3 ways:

- Online CheckIN Game System: GoOutdoorsIN.com

- Traditional check stations: <https://www.in.gov/dnr/fish-and-wildlife/hunting-and-trapping/hunting-trapping-guide/hunting-check-stations/>
- Phone-in option at 260-368-5880 (no fee)

To check in state park deer management harvests, use the following information:

- For county of harvest, please note that some properties span multiple counties
- You must select “Public – State” when asked for land type
- Select the appropriate property
- For license type, choose either “Early Park Reduction Hunt” or “Late Park Reduction Hunt.” Do not choose “Deer Reduction Zone.” The early hunt is November 16 & 17, and the late hunt is November 30 & December 1; choose accordingly.

After submitting your information, you will be given a Confirmation Number that must be recorded on your temporary transportation tag and kept on the carcass until processing.

If you need assistance checking in a harvested deer, please email INHuntFish@dnr.IN.gov.

Accessibility:	If you have special needs, you should call the property office before November 12, 2026, for the first hunt and before November 26, 2026, for the second hunt, so we can try to accommodate any special needs you may have. If desired, drawn hunters who possess a persons with disabilities hunting permit may bring a non-hunting individual at least 18 years of age by November 16, 2026, to assist them.
Tree Stands:	Portable tree stands may be used by those drawn for the hunts. The tree stand, steps, fasteners, and any other equipment, may not penetrate more than ½ inch into the tree. A safety harness is highly recommended. Any stand left overnight in the park must have the owner’s name, address, and phone number, or your DNR Customer ID number, attached to the stand in some manner. We strongly suggest you place a lock on your stand. The park does not provide security for tree stands and is not responsible for missing or damaged stands. Tree stands may be installed one week prior to the first day of the hunt period for which you were drawn. Tree stands must be removed by the end of the last day of the hunt period for which you were drawn.
Ribbon/Flagging:	Safety zones are marked with yellow flagging tape. The boundaries of the hunt zones will be marked with WHITE flagging tape. When hunting within 200 feet of the white flagged boundary, hunters MUST be facing away from this boundary. DO NOT SHOOT TOWARDS THE

BOUNDARY. Hunting beyond the white flagging tape will be considered trespassing.

- Ground Blinds: Ground blinds will not be allowed for these management hunts.
- Non-Hunters: If you encounter any non-hunters, other than those accompanying drawn hunters, please contact property personnel, and they will handle it.
- Hunter Orange: Hunters must wear both a solid hunter orange head covering (hat or cap) AND a solid hunter orange outer garment, such as vest, coat, or coveralls, during the time you are hunting in the park. This gear should be worn at all times.
- Lodging: Camping will be allowed at Prophetstown State Park during the hunt period. Call the office at (765) 567-4919 to place a reservation. Only registered hunters will be permitted to camp; non-hunting guests are not allowed. Alcohol is not permitted on the property during the deer hunt. Campsites available are electric only. Vault toilets will be available. If you choose to camp at the park, reservations must be made before October 28th for the first hunt and before November 18th for the second hunt. Hunters are not permitted to hang deer from the trees at the park. However, hunters are permitted to provide their own mechanism for hanging deer.
- Alcoholic Beverages: Absolutely NO ALCOHOLIC BEVERAGES shall be possessed or consumed in the park or during the hunt.
- Scouting: Pre-hunt scouting will be allowed and is encouraged. All normal park fees apply. Please stay within the park boundaries while scouting; going outside of park boundaries will be considered trespassing. Trail cameras may not be used for the management hunts.
- Safety Zones: Safety zones have been established, and you may not enter these areas except to retrieve a deer. Loaded firearms not permitted in safety zones, buildings, or service areas. Do not shoot toward the safety zones if you are hunting near the boundaries. Shooting is not permitted into or across roadways, into or across waterways, toward permanent man-made structures, or into or across private property. Refrain from hunting within 50 feet of property boundaries. Safety Zones are marked on your map, as well as in the field. Safety Zones are marked with yellow flagging tape on trees and/or vegetation along the boundaries. You may not enter these areas at any time unless you are retrieving a wounded deer.
- Park Boundaries: The boundaries of the hunt will be marked with WHITE flagging tape. When hunting within 200 feet of the white flagged boundary, hunters MUST be facing away from this boundary. DO NOT SHOOT TOWARDS THE BOUNDARY. Hunting beyond the white flagging tape

will be considered trespassing. It is the responsibility of each hunter to know these boundaries and to safely confine all hunting activities to these prescribed areas. Public scrutiny demands you act as responsible hunters. Respect the property of adjacent landowners. Refrain from hunting within 50 feet of property boundaries.

- Field Dressing: Please do not field dress deer in any mowed or public area; field dress at least 50 feet from any road or trail and cover the entrails with leaf litter. Field dressing should occur out of sight from trails, roads, and off property residences. All items and equipment used to dress a harvested deer must be removed by the hunter upon departure.
- Retrieval: You are responsible for retrieving your deer from the field. All deer must be brought to the check station prior to leaving the park. Never leave a wounded deer down inside the property. DO NOT leave the property and trespass on private property in an attempt to retrieve a downed deer. Contact the check station, park personnel, or Law Enforcement personnel immediately. If you are in need of assistance with deer retrieval due to a medical condition or physical impairment, please notify park personnel or inform the Main Gate at 765-320-1710 of your needs and refer to your location as indicated on the map. To retrieve a deer that has gone beyond the hunt boundary (white flagging tape), you must contact property personnel at the Main Gate/Check Station or a Conservation Office on the property. You will need to be escorted to the property in order to obtain permission to retrieve the deer. All harvested deer must be transported to the Deer Check Station at the Main Gate in order to be checked-in and have biological data collected. All harvested deer must be covered or in the bed of a truck or van for transport off the property. Hunters are permitted to harvest deer only. No other animals may be taken during the hunt period.
- Assigned Unit: There are no assigned hunting units for these management hunts. You may hunt anywhere, except safety zones.
- Meat Handling: You must take possession of all deer you harvest. All hunters will be responsible for the processing of their own meat. No harvested deer should be left at the park. Please consider donating your deer to Hunt for Hunger (on.IN.gov/huntforhunger) if your freezer is full by the time of the hunt. When leaving the property with harvested deer, please cover them with a tarp or other suitable material. Hunters staying overnight in the area will be able to hang deer in assigned areas on the property.
- CWD: Chronic wasting disease (CWD) is a fatal infectious disease affecting the nervous systems of white-tailed deer. This untreatable disease is caused by misfolded prions shed from infected deer through bodily secretions like saliva and urine. CWD was first detected in Indiana in 2024. Since then,

cases have been detected in multiple counties across the state. You can see up-to-date detections at on.IN.gov/CWD.

CWD prions are highly resistant to disinfectants, freezing, and heat; cooking or burning will not inactivate them. Although it is not currently known to infect humans, DNR recommends testing your harvested deer for CWD. If the deer tests positive, DNR suggests not eating the meat. If you would like to have your harvested deer tested for CWD you can:

- Submit your deer's head to a DNR drop-off cooler (all hunting seasons).
- Submit samples to select private businesses across the state (all hunting seasons).
- Submit samples directly to Purdue's Animal Disease Diagnostic Lab (ADDL) for a fee.
- See on.IN.gov/CWD for more details about CWD, where it has been found, and testing locations.

Hunter Image: Please leave a positive image of deer hunters for other park users by removing any trash at the conclusion of your hunt, picking up all spent shells and casings, and covering any harvested deer while leaving the property. As a general rule, please take out anything you bring into the park. Please practice "leave no trace" ethics to ensure a clean and high quality park.

Parking: You may park your vehicle in established parking lots or parking areas only. There will be no parking allowed along the road. There will be an additional temporary parking area that will be the map (attached). The campground area will be closed to vehicle traffic unless special needs apply or you are camping at the park for the duration of the hunt. Hunters wanting to hunt in this area will need to use the campground overflow parking area before the camp gate or the parking areas at Meadow or Prairie View Picnic areas. Access to the temporary parking area may not be available on the day of the hunt due to soil conditions and/or flooding. Do not park in front of gated roadways or access roads at any time and do not drive beyond AREA CLOSED SIGNS. You may park only in designated areas.

TAKING OF ANTLERED & ANTLERLESS DEER

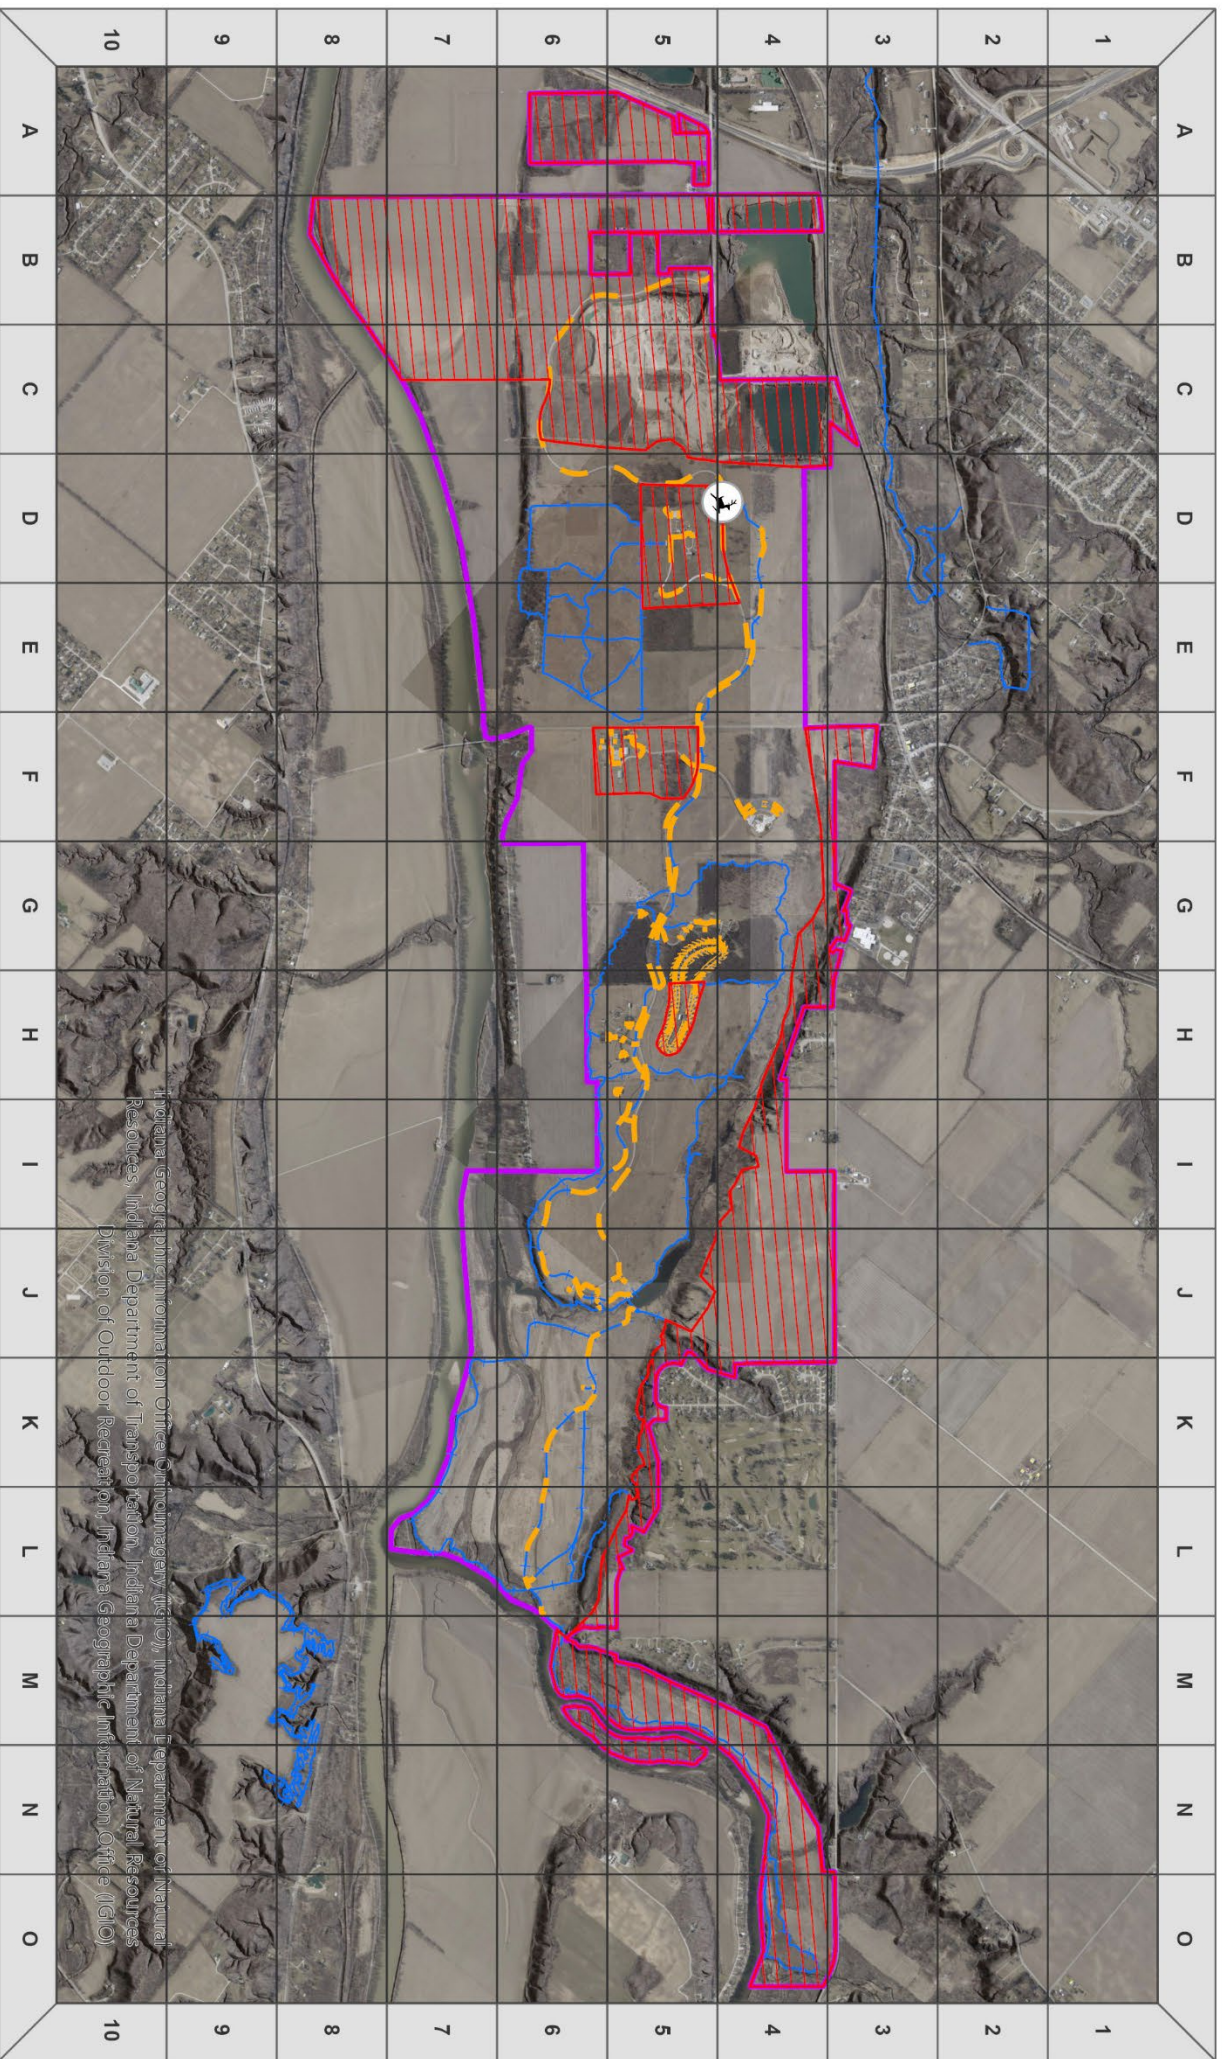

Please keep in mind the purpose of your deer hunting opportunity on Division of State Parks properties is to manage the deer herd in order to prevent overbrowsing and the resulting damage to the properties' vegetation.

Our primary goal is to take does because they have the largest long-term impact on a population; however, we recognize that antlered deer also directly contribute to the grazing impacts on the properties and appreciate your help with their removal. We are concerned that some hunters may be passing up antlerless deer and deer with small antlers. Those hunters who pass on opportunities to remove deer with no or small antlers are actually hurting our ability to reduce the overbrowsing problem. Whenever you have an opportunity to safely make an accurate, well-placed shot, please help us by taking that deer, regardless of the antler size.

We may also have hunters passing up deer because they have filled their freezer. While we do not want deer to be taken that will be wasted, if you do not need the meat from your second or third deer, please consider trying to locate someone prior to our deer management hunt who needs additional deer meat.

Thank you for your help in this important effort.
