

INDIANA DEPARTMENT OF NATURAL RESOURCES
DIVISION OF STATE PARKS

2026 STATE PARK DEER MANAGEMENT HUNT INFORMATION SHEET

Indiana Department
of Natural Resources

Raccoon SRA (Cecil M. Harden Lake)
765-344-1412

THIS IS A FIREARMS ONLY HUNT

Please print a copy of this document for your reference. You are responsible for understanding all the following information.

Important Note

We appreciate your willingness to help manage the impact from deer browsing. For this management hunt to be effective, please harvest any deer that presents a safe and ethical shot (within established bag limits), especially those that are antlerless. Please make every effort to be present during the management hunt. The number of hunters allowed at each park is strategically calculated. Your absence affects how successfully we reach our objective of a balanced ecosystem. Our No. 1 concern during this hunt is safety. With this in mind, the following information and rules apply:

- General:** All DNR Property Rules and Indiana Hunting Regulations will be enforced. Hunters are permitted to harvest deer only. No other animals may be taken during the management hunt. Friends and family will not be permitted to wait for hunters on the property during the hunt periods.
- Date & Time:** The 2026 deer management hunts will be conducted on November 16 & 17 and on November 30 & December 1. The park will be closed to the general public starting from 8 p.m. ET (7 p.m., CT) on Sunday, November 15 before the first hunt period through 8 a.m. ET (7 a.m. CT) on Wednesday, November 18 and 8 p.m. on Sunday, November 29 before the second hunt period through 8 a.m. ET (7 a.m. CT) Wednesday, December 2 following the second hunt period. **ALL HUNTERS WILL NEED A PHOTO ID TO ENTER AND EXIT THE PROPERTY.**
- Hunt Hours:** Hunting hours are ½ hour before sunrise until 4 p.m. ET (3 p.m. CT) on the days of the hunt. Entry into the park will be permitted starting at 5:30 a.m. ET and hunters need to be out of the park no later than 5 p.m. ET.

- Open House: An informational open house will be held October 28, 2026, from 2 p.m. to 4 p.m. ET at the office. Attendance is not mandatory but is encouraged. For additional questions and information, please contact the property office.
- Hunter Sign-In: The hunter sign-in station will be located at the front gate from 5:30 a.m. to 5 p.m. ET. A photo ID and hunting license will need to be shown to enter the property.
- Bag Limit: During each hunt period for which you have been drawn you are allowed to take up to three deer, only one of which can be antlered. These deer do not count against your regular state deer hunting license or bag limit. Please do not pass on antlerless deer for deer with antlers.
- Firearms: Hunters are permitted to use firearms that meet the specifications set forth in IC 14-22-2-8 and described in the 2026-2027 Indiana Hunting & Trapping Guide). Archery equipment will NOT be permitted for these hunts, including the use of crossbows.
- Check Station: All deer must be transported to the check station in the designated location on the property for biological data collection prior to leaving the property. You will be asked the sex of the deer and whether it is antlered or antlerless. Legal check-in is the responsibility of the hunter and is described below. The check station is located at the front gate.
- Deer Check-In: Hunters who successfully harvest a deer at state park deer management hunts must bring the deer to the designated location on the property for biological information to be recorded. The deer must have a temporary transportation tag completed and attached immediately upon harvest. Temporary transportation tags are provided below. The deer must also be checked in through the online check-in system. Staff at parks are only keeping tallies of harvested deer, not checking them in. It is the hunter's responsibility to complete the legal check-in.

Deer can be checked in 3 ways:

- Online CheckIN Game System: GoOutdoorsIN.com
- Traditional check stations: <https://www.in.gov/dnr/fish-and-wildlife/hunting-and-trapping/hunting-trapping-guide/hunting-check-stations/>
- Phone-in option at 260-368-5880 (no fee)

To check in state park deer management harvests, use the following information:

- For county of harvest, please note that some properties span multiple counties
- You must select "Public – State" when asked for land type

- Select the appropriate property
- For license type, choose either “Early Park Reduction Hunt” or “Late Park Reduction Hunt.” Do not choose “Deer Reduction Zone.” The early hunt is November 16 & 17, and the late hunt is November 30 & December 1; choose accordingly.

After submitting your information, you will be given a Confirmation Number that must be recorded on your temporary transportation tag and kept on the carcass until processing.

If you need assistance checking in a harvested deer, please email INHuntFish@dnr.IN.gov.

Accessibility:	If you have special needs, you should call the property office before November 12, 2026, for the first hunt and before November 26, 2026, for the second hunt, so we can try to accommodate any special needs you may have. If desired, drawn hunters who possess a persons with disabilities hunting permit may bring a non-hunting individual at least 18 years of age by November 16, 2026, to assist them.
Tree Stands:	Portable tree stands may be used by those drawn for the hunts. The tree stand, steps, fasteners, and any other equipment, may not penetrate more than ½ inch into the tree. A safety harness is highly recommended. Any stand left overnight in the park must have the owner’s name, address, and phone number, or your DNR Customer ID number, attached to the stand in some manner. We strongly suggest you place a lock on your stand. The park does not provide security for tree stands and is not responsible for missing or damaged stands. Tree stands may be installed one week prior to the first day of the hunt period for which you were drawn. Tree stands must be removed by the end of the last day of the hunt period for which you were drawn.
Ribbon/Flagging:	The use of ribbons/flagging is NOT permitted.
Ground Blinds:	Ground blinds will not be allowed for these management hunts.
Non-Hunters:	If you encounter any non-hunters, other than those accompanying drawn hunters, please contact property personnel, and they will handle it.
Hunter Orange:	Hunters must wear both a solid hunter orange head covering (hat or cap) AND a solid hunter orange outer garment, such as vest, coat, or coveralls, during the time you are hunting in the park. This gear should be worn at all times.
Lodging:	All camping is SUSPENDED during the hunt.

Alcoholic Beverages: Absolutely NO ALCOHOLIC BEVERAGES shall be possessed or consumed in the park or during the hunt.

Scouting: Pre-hunt scouting will be allowed and is encouraged. All normal park fees apply. Trail cameras may not be used for the management hunts. Raccoon SRA is a state recreation area and DOES permit off-trail exploration, but caution should be taken whenever off trail.

Safety Zones: Safety zones have been established, and you may not enter these areas except to retrieve a deer. Loaded firearms are not permitted in safety zones, buildings, or service areas. Do not shoot toward the safety zones if you are hunting near the boundaries. Shooting is not permitted into or across roadways, into or across waterways, toward permanent man-made structures, or into or across private property. Refrain from hunting within 50 feet of property boundaries. Safety Zones will be marked by cones, signs, and/or reflective orange tape.

Park Boundaries: The park only has boundaries on the north end. The south, west and east are all bound by water. The northern most park boundary is US 36, the north-east boundary is the lost canyon, a ½ mile sandstone canyon with the property line down the middle. The western boundary will be marked with orange tape/flags. It is the responsibility of each hunter to know these boundaries and to safely confine all hunting activities to these prescribed areas. Public scrutiny demands you act as responsible hunters. Respect the property of adjacent landowners. Refrain from hunting within 50 feet of property boundaries.

Field Dressing: Please do not field dress deer in any mowed or public area; field dress at least 50 feet from any road or trail and cover the entrails with leaf litter. Field dressing should occur out of sight from trails, roads, and off property residences. All items and equipment used to dress a harvested deer must be removed by the hunter upon departure.

Retrieval: You are responsible for retrieving your deer from the field. All deer must be brought to the check station prior to leaving the park. Never leave a wounded deer down inside the property. DO NOT leave the property and trespass on private property in an attempt to retrieve a downed deer. Contact the check station, park personnel, or Law Enforcement personnel immediately. The property staff will NOT be helping with retrieval of deer.

Assigned Unit: There are no assigned hunting units for these management hunts. You may hunt anywhere, except safety zones.

Meat Handling: You must take possession of all deer you harvest. All hunters will be responsible for the processing of their own meat. No harvested deer should

be left at the park. Please consider donating your deer to Hunt for Hunger (on.IN.gov/huntforhunger) if your freezer is full by the time of the hunt. When leaving the property with harvested deer, please cover them with a tarp or other suitable material.

CWD: Chronic wasting disease (CWD) is a fatal infectious disease affecting the nervous systems of white-tailed deer. This untreatable disease is caused by misfolded prions shed from infected deer through bodily secretions like saliva and urine. CWD was first detected in Indiana in 2024. Since then, cases have been detected in multiple counties across the state. You can see up-to-date detections at on.IN.gov/CWD.

CWD prions are highly resistant to disinfectants, freezing, and heat; cooking or burning will not inactivate them. Although it is not currently known to infect humans, DNR recommends testing your harvested deer for CWD. If the deer tests positive, DNR suggests not eating the meat. If you would like to have your harvested deer tested for CWD you can:

- Submit your deer's head to a DNR drop-off cooler (all hunting seasons).
- Submit samples to select private businesses across the state (all hunting seasons).
- Submit samples directly to Purdue's Animal Disease Diagnostic Lab (ADDL) for a fee.
- See on.IN.gov/CWD for more details about CWD, where it has been found, and testing locations.

Hunter Image: Please leave a positive image of deer hunters for other park users by removing any trash at the conclusion of your hunt, picking up all spent shells and casings, and covering any harvested deer while leaving the property. As a general rule, please take out anything you bring into the park. Please practice "leave no trace" ethics to ensure a clean and high quality park.

Parking: You may park ONLY in designated areas. These areas include and are limited to: Bluebird Parking Lot (North), Beach Parking Lot (North), Office Parking Lot (Central), Camp Store Parking Lot (South), Main Ramp Parking Lot (South), and Berry Drive/Payne Shelter (South-East).

Other Information: The use of boats, ATVs, Off-Road Vehicles, Etc., is NOT permitted for these hunts. Property staff will be stationed at the Front Gate and at the Park Office in the case of an emergency. If you have a life-threatening emergency, call 911 and then notify park staff immediately.

TAKING OF ANTLERED & ANTLERLESS DEER

Please keep in mind the purpose of your deer hunting opportunity on Division of State Parks properties is to manage the deer herd in order to prevent overbrowsing and the resulting damage to the properties' vegetation.

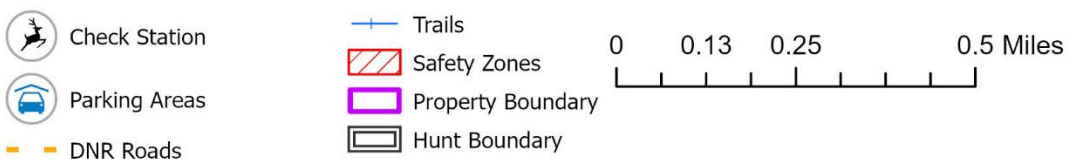

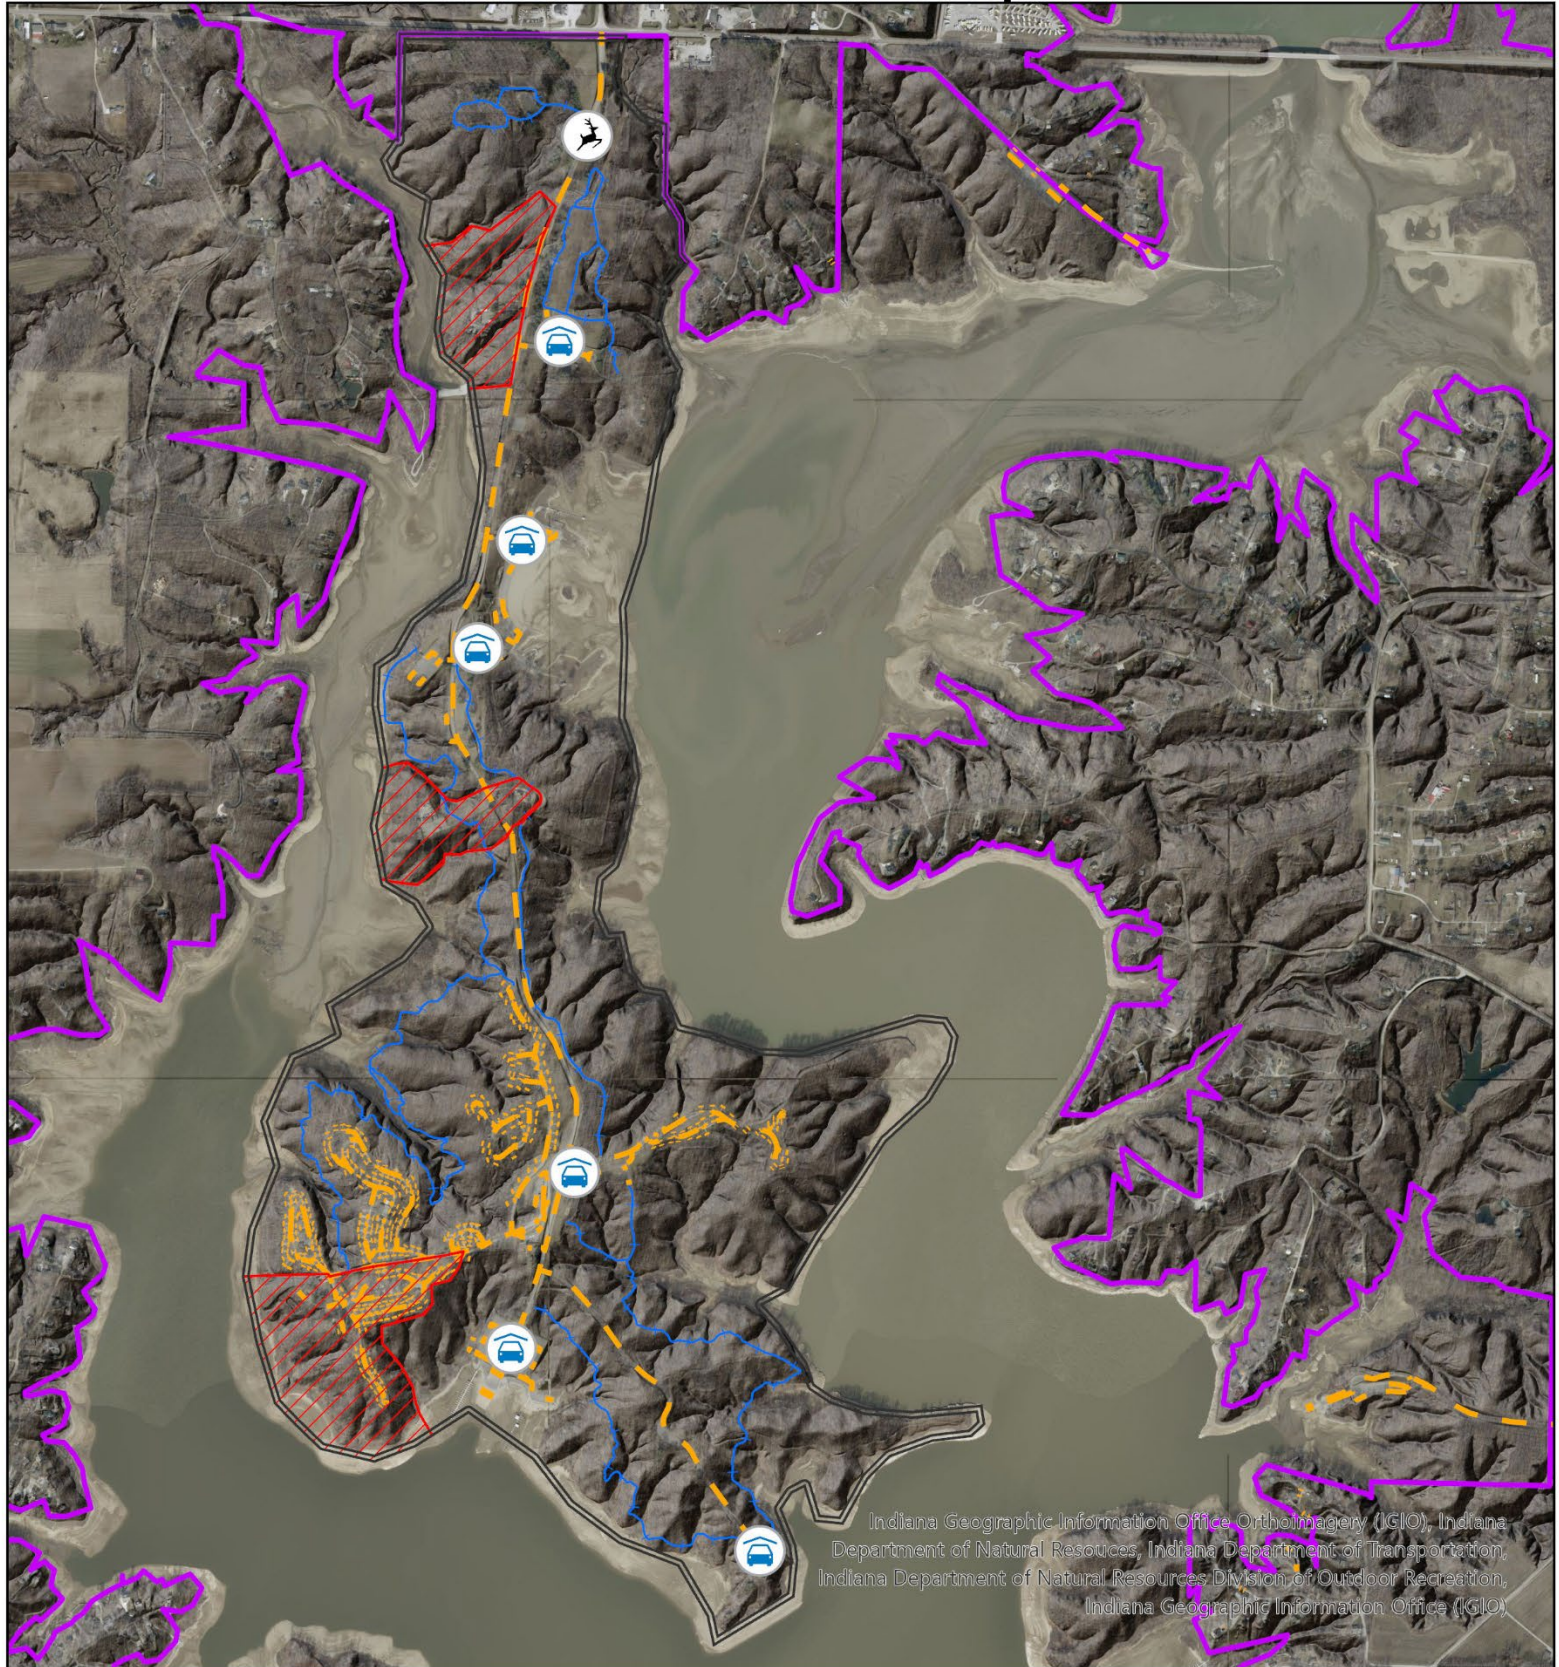

Our primary goal is to take does because they have the largest long-term impact on a population; however, we recognize that antlered deer also directly contribute to the grazing impacts on the properties and appreciate your help with their removal. We are concerned that some hunters may be passing up antlerless deer and deer with small antlers. Those hunters who pass on opportunities to remove deer with no or small antlers are actually hurting our ability to reduce the overbrowsing problem. Whenever you have an opportunity to safely make an accurate, well-placed shot, please help us by taking that deer, regardless of the antler size.

We may also have hunters passing up deer because they have filled their freezer. While we do not want deer to be taken that will be wasted, if you do not need the meat from your second or third deer, please consider trying to locate someone prior to our deer management hunt who needs additional deer meat.

Thank you for your help in this important effort.
