

# Potentiometric Surface Map of the Unconsolidated Aquifers of Grant County

## Shapefile

### Tags

Potentiometric surface, static water level, groundwater, water wells, water tables, Grant County, Indiana, USA

### Summary

Display and/or analyses requiring spatial distribution of potentiometric surface elevations in Grant County.

### Description

This file is a digital geospatial polyline coverage of the unconsolidated potentiometric surface elevations mapped for Grant County, Indiana.

### Credits

There are no credits for this item.

### Use limitations

See access and use constraints information.

### Extent

**West** -85.869096    **East** -85.438671  
**North** 40.656137    **South** 40.377240

### Scale Range

**Maximum (zoomed in)** 1:5,000  
**Minimum (zoomed out)** 1:150,000,000

## Data Quality ►

### SCOPE OF QUALITY INFORMATION ►

RESOURCE LEVEL    dataset

*Hide Scope of quality information ▲*

### DATA QUALITY REPORT - COMPLETENESS OMISSION ►

MEASURE DESCRIPTION    In conducting the mapping, the author(s) evaluated hundreds of water well records, especially those having relatively complete information on well location, static water level, well depth, ground elevation, and lithology. There were areas in the county with sparse information because of lack of well records or incomplete records.

*Hide Data quality report - Completeness omission ▲*

### DATA QUALITY REPORT - QUANTITATIVE ATTRIBUTE ACCURACY ►

MEASURE DESCRIPTION    The mapping was conducted after a thorough documentation of well locations and water well record details.

*Hide Data quality report - Quantitative attribute accuracy ▲*

### DATA QUALITY REPORT - ABSOLUTE EXTERNAL POSITIONAL ACCURACY ►

MEASURE DESCRIPTION    The locations of many wells were field checked and the locations posted on 7.5 minute topographic maps. Visual confirmation of wells was not always possible. Many locations were based only on the street address, driving directions, or other location information provided on the well record.

*Hide Data quality report - Absolute external positional accuracy ▲*

*Hide Data Quality ▲*

## Lineage ►

### PROCESS STEP ►

DESCRIPTION    After selection of water well records was complete, specific well data and other maps and reports were considered in the mapping process. For example, ground elevation, static water level, well depth, aquifer top and bottom elevation and lithology were obtained from well records. Other maps and reports included regional potentiometric surface elevations, hydrogeologic settings, groundwater availability, bedrock topography, and surface topography.

[Hide Process step ▲](#)

PROCESS STEP ►

**DESCRIPTION** Data were selected by careful evaluation of water well records to determine if the wells were field located and if they contained complete and reasonable information.

[Hide Process step ▲](#)

PROCESS STEP ►

**RATIONALE** A polyline coverage was created using the heads-up method and attributed by Glenn E. Grove. Attribute definitions are described below.
