

Grade 2 Mathematics

This document provides correlations between the 2023 Indiana Academic Standards and the 2020 Indiana Academic Standards for easy reference.

The 2023 Indiana Academic Standards resulted from the standards streamlining process required by Indiana Code 20-31-3-1(c-d) and were adopted by the Indiana State Board of Education in June 2023. Standards designated as essential (E) are shaded in gray and all standards were renumbered to avoid gaps in sequencing.

| 2023 Indiana Academic Standard | | 2020 Indiana Academic Standard | |
|--------------------------------|--|--------------------------------|---|
| Domain: Number Sense | | Domain: Number Sense | |
| Number | Text | Number | Text |
| 2.NS.1 | Count by ones, twos, fives, tens, and hundreds up to at least 1,000 from any given number. (E) | 2.NS.1 | Count by ones, twos, fives, tens, and hundreds up to at least 1,000 from any given number. |
| 2.NS.2 | Read and write whole numbers up to 1,000. Use words, models, standard form, and expanded form to represent and show equivalent forms of whole numbers up to 1,000. (E) | 2.NS.2 | Read and write whole numbers up to 1,000. Use words, models, standard form and expanded form to represent and show equivalent forms of whole numbers up to 1,000. |
| 2.NS.3 | Plot and compare whole numbers up to 1,000 on a number line. | 2.NS.5 | Determine whether a group of objects (up to 20) has an odd or even number of members (e.g., by placing that number of objects in two groups of the same size and recognizing that for even numbers no object will be left over and for odd numbers one object will be left over, or by pairing objects or counting them by 2s). |

2023-2020 Indiana Academics Standards Correlation Guide: Grade 2 Mathematics

| | | | |
|---|--|---|---|
| 2.NS.4 | Define and model a "hundred" as a group of ten tens. Model place value concepts of three-digit numbers, multiples of 100, and equivalent forms of whole numbers using objects and drawings. (E) | 2.NS.6 | Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones (e.g., 706 equals 7 hundreds, 0 tens, and 6 ones). Understand that 100 can be thought of as a group of ten tens - called a "hundred." Understand that the numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones). |
| 2.NS.5 | Use place value understanding to compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons. (E) | 2.NS.7 | Use place value understanding to compare two three-digit numbers based on meanings of the hundreds, tens, and ones digits, using $>$, $=$, and $<$ symbols to record the results of comparisons. |
| | | 2.NS.3 | Plot and compare whole numbers up to 1,000 on a number line. |
| | | 2.NS.4 | Match the ordinal numbers first, second, third, etc., with an ordered set up to 30 items. |

| | | | |
|---------------|---|---------------|--|
| | represent the problem). Use estimation to decide whether answers are reasonable in addition problems. (E) | | represent the problem). Use estimation to decide whether answers are reasonable in addition problems. |
| 2.CA.2 | Using number sense and place value strategies, add and subtract within 1,000, including composing and decomposing tens and hundreds. Use models, drawings, and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; describe the strategy and explain the reasoning used. | 2.CA.4 | Add and subtract within 1,000, using models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; describe the strategy and explain the reasoning used. Understand that in adding or subtracting three-digit numbers, one adds or subtracts hundreds and hundreds, tens and tens, ones and ones, and that sometimes it is necessary to compose or decompose tens or hundreds. |
| 2.CA.3 | Show that the order in which two numbers are added (commutative property) and how the numbers are grouped in addition (associative property) will not change the sum. These properties can be used to show that numbers can be added in any order. (E) | 2.CA.6 | Show that the order in which two numbers are added (commutative property) and how the numbers are grouped in addition (associative property) will not change the sum. These properties can be used to show that numbers can be added in any order. |
| 2.CA.4 | Create, extend, and give an appropriate rule for number patterns using addition and subtraction within 1,000. | 2.CA.7 | Create, extend, and give an appropriate rule for number patterns using addition and subtraction within 1000. |
| | | 2.CA.1 | Add and subtract fluently within 100. |
| | | 2.CA.3 | Solve real-world problems involving addition and subtraction within 100 in situations involving lengths that are given in the same units (e.g., by using drawings, such as drawings of rulers, and equations with a symbol for the unknown number to represent |

| Domain: Geometry | | Domain: Geometry | |
| Number | Text | Number | Text |
| 2.G.1 | Identify, describe, and classify two- and three-dimensional shapes (i.e., triangle, square, rectangle, cube, right rectangular prism) according to the number and shape of faces and the number of sides and/or vertices. Draw two-dimensional shapes. | 2.G.1 | Identify, describe, and classify two- and three-dimensional shapes (triangle, square, rectangle, cube, right rectangular prism) according to the number and shape of faces and the number of sides and/or vertices. Draw two-dimensional shapes. |
| 2.G.2 | Investigate and predict the result of composing and decomposing two- and three-dimensional shapes. | 2.G.3 | Investigate and predict the result of composing and decomposing two- and three-dimensional shapes. |
| 2.G.3 | Partition a rectangle into rows and columns of same-size (unit) squares and count to find the total number of same-size squares. | 2.G.4 | Partition a rectangle into rows and columns of same-size (unit) squares and count to find the total number of same-size squares. |
| 2.G.4 | Partition circles and rectangles into two, three, or four equal parts; describe the shares using the words halves, thirds, half of, a third of, etc.; and describe the whole as two halves, three thirds, or four fourths. Recognize that equal parts of identical wholes need not have the same shape. | 2.G.5 | Partition circles and rectangles into two, three, or four equal parts; describe the shares using the words halves, thirds, half of, a third of, etc.; and describe the whole as two halves, three thirds, four fourths. Recognize that equal parts of identical wholes need not have the same shape. |

| Domain: Measurement | | Domain: Measurement | |
| Number | Text | Number | Text |
| 2.M.1 | Describe the relationships among an inch, foot, and yard. Describe the relationship between a centimeter and meter. | 2.M.1 | Describe the relationships among inch, foot, and yard. Describe the relationship between centimeter and meter. |
| 2.M.2 | Estimate and measure the length of an object by selecting and using appropriate tools, such as rulers, yardsticks, meter sticks, and measuring tapes to the nearest inch, foot, yard, centimeter, and meter. (E) | 2.M.2 | Estimate and measure the length of an object by selecting and using appropriate tools, such as rulers, yardsticks, meter sticks, and measuring tapes to the nearest inch, foot, yard, centimeter and meter. |
| 2.M.3 | Estimate and measure volume (capacity) using cups and pints. Add and subtract to solve real-world problems involving capacities that are given in the same units or obtained through investigations. (E) | 2.M.4 | Estimate and measure volume (capacity) using cups and pints. |
| 2.M.4 | Tell and write time to the nearest five minutes from analog clocks, using a.m. and p.m. Solve real-world problems involving addition and subtraction of time intervals on the hour or half hour. (E) | 2.M.5 | Tell and write time to the nearest five minutes from analog clocks, using a.m. and p.m. Solve real-world problems involving addition and subtraction of time intervals on the hour or half hour. |
| 2.M.5 | Describe relationships of time, including seconds in a minute; minutes in an hour; hours in a day; days in a week; and days, weeks, and months in a year. | 2.M.6 | Describe relationships of time, including: seconds in a minute; minutes in an hour; hours in a day; days in a week; and days, weeks, and months in a year. |

2023-2020 Indiana Academics Standards Correlation Guide: Grade 2 Mathematics

| | | | |
|---------------------------------------|---|---------------------------------------|--|
| 2.M.6 | Find the value of a collection of pennies, nickels, dimes, quarters, and dollars. (E) | 2.M.7 | Find the value of a collection of pennies, nickels, dimes, quarters and dollars. |
| | | 2.M.3 | Understand that the length of an object does not change regardless of the units used. Measure the length of an object twice using length units of different lengths for the two measurements. Describe how the two measurements relate to the size of the unit chosen. |
| | | | |

| Domain: Data Analysis | | Domain: Data Analysis | |
| Number | Text | Number | Text |
| 2.DA.1 | Collect, organize, and graph data from observations, surveys, and investigations using scaled bar graphs and pictographs (limit scale to 2s, 5s, 10s, and 100s); interpret mathematical relationships within the data using grade-level addition, subtraction, and comparison strategies. (E) | 2.DA.1 | Draw a picture graph (with single-unit scale) and a bar graph (with single-unit scale) to represent a data set with up to four choices (What is your favorite color? red, blue, yellow, green). Solve simple put-together, take-apart, and compare problems using information presented in the graphs. |
