Indiana Department of Education

Dr. Katie Jenner, Secretary of Education

A Message from Dr. Katie Jenner

This was a big week in Indiana—I hope you enjoyed the eclipse on Monday afternoon and for those of you who stayed up to cheer on the Purdue Boilermakers in the National Championship, I hope you've now caught back up on your sleep! In March, we kicked-off a conversation about how we can and must seize the opportunity to redesign Indiana's high school diploma requirements, which have not changed significantly since the 1980s. If you missed it, or haven't had the chance to [watch the recording](#) of the March State Board of Education (SBOE) meeting, I encourage you to do so and engage in the [feedback process](#).

This week, I want to highlight three schools that are already leaning-in on rethinking high school, offering students the chance to experience careers, develop skills that will benefit them in the future, and ultimately, support them in finding their best path ahead. In many respects, we are just in the beginning of discovering what is possible with high school redesign and these represent just a few of many examples across the state (including in urban, suburban, and rural areas).

Duneland School Corporation (Porter County)

[Chesterton High School](#) has a goal that 50% or more of their seniors will participate in a career-related experience each year. To help reach this goal, the school has secured over 200 business partnerships, which provide students with opportunities to learn through internships, work study, Career and Technical Education (CTE), as well as Cadet teaching.

Beginning with five participating students in the 2019-2020 school year, just four years later, the program now has over 180 participants with available internships in areas ranging from agriculture and environmental science, to business, finance, and marketing, to childcare and education, and just about everything in between.

In 2022, senior Ella Girzadas expressed an interest in pursuing a career in sustainable fashion and was placed in an internship with a local apparel and gift brand in Chesterton. During her internship, she was able to learn about entrepreneurship, including creating her own line of loungewear and advising on everything from design to pricing structure. Ella is currently studying environmental science and business at Villanova University.

This is a great example of what is possible when we are willing to try something new (...and be willing to start somewhere and not delay), if it means improving outcomes for students. Their willingness to be bold has continued to pay off, with more businesses signing on and more students benefiting from these partnerships.

Washington Community Schools (Daviness County)

In December, [Washington High School](#) partnered with Reliable MicroSystems to launch a first-of-its-kind Microelectronics High School Student Internship, and earlier this year, senior Xavier Frank became the first student in the region (with more to come!) to serve as a staff engineer intern with Reliable MicroSystems.

This opportunity to learn in a hands-on environment, centered in Indiana's emerging semiconductor industry, is the result of collaboration between local, regional, and state entities. It is also funded in part

through a partnership with the Indiana Chamber of Commerce and the Institute for Workforce Excellence. Additional support comes from the SCALE K-12 project, which works to integrate new ideas and technologies into curriculum that will help students gain a better awareness of microelectronics in the world around them.

This future-focused example is particularly relevant because it supports the state's emerging semiconductor industry and illuminates the innovative, high-tech opportunities that exist for students right here in Indiana.

Randolph Eastern School Corporation (Randolph County) The team at Randolph Eastern School Corporation has been hard at work transforming the traditional high school experience into a journey that is more engaging, relevant, and student-centered. The push to bring work-based and project-based learning to life has allowed [Union City Junior-Senior High School](#) students to step into real-world scenarios, collaborate with local businesses and professionals to engage in projects that align with curriculum and coursework, and also instill essential skills regardless of their path ahead.

The learning framework at Union City Junior-Senior High School allows *all students...that's 100% of kids...in grades nine through 12* to participate in Workforce Wednesdays, an initiative dedicating one day each week to career exploration and skill development. Workforce Wednesdays connect students and staff with industry experts and community leaders to enrich students' understanding and curiosity about the career pathways that exist in and around their local community. In fact, this Wednesday, Superintendent Aaron Black shared a quote from a student who said, "I found myself liking school, and it was weird!"

This student-centered example represents a rural Indiana school corporation that is removing barriers and doing BIG things for kids!

The schools highlighted above are far from the only schools in Indiana that are leading this important work for students. Several others were also featured in a student video, which we shared at SBOE in March and in the weekly newsletter the following Friday. If you haven't yet, you should check it out!

Thank you to Duneland School Corporation, Washington Community Schools, Randolph Eastern School Corporation, and so many others for engaging in this work. Let's continue working together to ensure the high school experience is as valuable as possible for students, including ensuring our diploma requirements reflect the opportunity that exists for every Indiana student to graduate prepared to succeed.

Thank you, as always, for all that you do for our students.

Reminders for the Class of 2024

Armed Services Vocational Aptitude Battery (ASVAB) Graduation Pathway Requirements

Pursuant to Indiana Code (IC) 20-32-4-1.5, the Indiana State Board of Education (SBOE) established the use of the ASVAB to meet graduation pathway requirements. Beginning with the 2025 graduation cohort, HEA 1635 requires students electing to use the ASVAB as a means for meeting graduation pathway requirements to also fill out the [Military Enlistment Intent Form](#). Students graduating in the 2023 and 2024 cohorts who have earned a qualifying ASVAB score, as determined by SBOE, prior to July 1, 2023, will be able to utilize previously earned ASVAB scores without a signed Military Enlistment Intent Form to fulfill their graduation pathway requirements. Learn more [here](#). Contact IDOE's [Student Pathways team](#) with any questions.

Graduation Waiver Caps

As outlined in [Indiana Code \(IC\) 20-26-13-10](#), for purposes of calculating the [2024 graduation rate](#), Indiana schools may not count more than 9% of their graduation cohort as graduating if utilizing postsecondary ready competency waivers. Schools exceeding the 9% cap will receive an adjusted state graduation rate. Postsecondary ready competency graduation waivers will be capped at 6% for the 2025 cohort and 3% for the 2026 cohort and beyond. In December, schools received a letter with their 2023 graduation rates along their post-secondary competency waiver rates. The letter provided a breakdown of how the 9% cap would impact their graduation rate, which should be considered when helping the class of 2024 meet their graduation requirements. Contact IDOE's [Office of Student Pathways and Opportunities](#) with questions regarding postsecondary ready competency qualifications, or [Office of Accountability](#) with questions regarding the calculation of the graduation rate or the cohort report.
