## An Update From the Indiana Department of Education for June 14, 2024

Indiana Department of Education sent this bulletin at 06/14/2024 07:00 AM EDT

Indiana Department of Education

Dr. Katie Jenner, Secretary of Education

### A Message from Dr. Katie Jenner

From robotics...to artificial Intelligence...to computer science...technology is advancing at incredible rates, and I want to applaud educators all across Indiana for continuing to learn more about how we can best prepare students for these advancements.

A few FUN, FAST facts for each area...

#### Robotics

- Indiana is home to more elementary and middle school robotics teams than any other state in the nation!
- The largest robotics state championship in the U.S. is in Indiana with over 300 teams and 1,600 students competing.
- Indiana also received more team invitations to the VEX World Robotics Championship in 2023 than any other state or even country (163 Indiana teams)! (Fun fact...do you want to know who comes in second after Indiana? China! Followed by some of our largest U.S. states.)

#### Artificial Intelligence (AI)

- Over 45,000 students and 2,500 educators statewide took part in the [state's first AI-powered platform grant](#), which focused on student 1:1 high dosage tutoring, teacher administrative and pedagogical task support, as well as AI literacy for both teachers and students.
- In a recent survey of participants, 53% of teachers rated the overall impact of the AI platform on both their students' learning, as well as their teaching practices, as positive or very positive.

#### Computer Science...the BIG highlight for today!

- Just this week 404 educators, 277 schools, and 120 districts came together in Bloomington for Computer Science Professional Development Week!
- This annual, weeklong event, which is a partnership between Nextech and the Computer Science Teachers Association, has doubled attendance in just two years and is now a destination for computer science educators across all schools and grade levels.

Walking in, I met Brian Belch, a computer science teacher at **Decatur Central High School**. Brian was initially licensed in English and social studies and when the need for a dedicated computer science educator became apparent, he made the switch and now has 180 computer science students! He, like the over 400 educators in the room, was eager to learn new strategies to help students master computer science skills that will benefit them both now and in the future.

As career opportunities in STEM occupations continue to grow *exponentially*, the work of our educators to prepare students for success in an evolving economy is critically important. Yet, we also know that even if a student does not pursue a STEM career, a high-quality STEM education prepares them with the problem solving, critical thinking, and communication skills they will need regardless of their career path. Through STEM and computer science specifically, educators are preparing students to contribute to society as the next generation of thinkers, creators, and entrepreneurs...and as I saw someone say recently, these educators "are the architects of future technological advancements."

When it comes to computer science specifically, Indiana has made significant strides in expanding learning opportunities for students across all grades. This includes:

- Investing **over \$18 million** in computer science, including grants to schools, professional development for educators, and instructional materials for students;
- Earning [national recognition from Code.org](#) as one of the **top states in the nation for computer science**, with 91% of public high schools in Indiana offering a foundational computer science course (the national average is 57.5%);
- Becoming the 9th state in the nation to make computer science a **graduation requirement**; and
- Adopting **all 10 policies from the Code.org Advocacy Coalition**, helping students to be as prepared as possible for their future.

Shout out to Governor Holcomb and members of the Indiana General Assembly for continuing to invest in and support computer science in K-12 education! And thank you to all of our incredible STEM educators across Indiana who continue to prioritize their own learning and growth, including a special shout out to the **over 1,150 current and prospective educators** who have enrolled in the [I-STEM program](#) to help strengthen our STEM educator pipeline and ensure every Indiana student has access to high-quality STEM instruction.

Have a great weekend!
