

Indiana Department of Education

Dr. Katie Jenner, Secretary of Education

To: Dr. Katie Jenner, Indiana Secretary of Education
Indiana General Assembly
Indiana Commission for Higher Education
Indiana State Board of Education

From: Lynn Schemel, Chief Academic Officer

Date: December 1, 2023

Subject: 2023 Computer Science Report

Since 2018, when Governor Holcomb and the Indiana General Assembly prioritized computer science coursework in schools, Indiana has seen a significant increase in student access and participation in computer science. This includes the integration of computer science in all K-8 Indiana Academic Standards for science, as well as the requirement for all Indiana high schools to offer a computer science course.

In 2017 (prior to the passage of SEA 295 in 2018), 39% of Indiana high schools had students taking a computer science course. Thanks to the work of educators, principals, superintendents, supportive communities, and other statewide partners, that number has grown to 75%. Indiana now leads the Midwest and was identified as one of the top states in the country for offering foundational computer science courses in schools.¹

Recently, Code.org, the Computer Science Teachers Association, and the Expanding Computing Education Pathways Alliance recently recognized Indiana as one of the top states in the nation for computer science in the [2023 State of Computer Science Education](#). Indiana ranked sixth in the nation in terms of access to computer science courses at the high school level, with 91% of public high schools in Indiana offering a foundational computer science course. Indiana has also adopted nine of the [10 policies](#) recommended by the [Code.org Advocacy Coalition](#).

Pursuant to [Indiana Code \(IC\) 20-30-5-23](#), the Indiana Department of Education (IDOE) is required to prepare an annual report on statewide school progress for the implementation of high school computer science courses. This report includes data highlighting the number and percentage of unique computer science enrollment and course completion. This data is disaggregated by student populations, including race, gender, grade, ethnicity, English language proficiency status, free or reduced lunch status, and special education eligibility. Data regarding computer science instructors and educators is also highlighted.

Indiana Department of Education

Dr. Katie Jenner, Secretary of Education

Developing educators to design and deliver foundational computer science courses to meet the demands of increasing high school enrollment has been a primary focus in Indiana since 2018. Participation in computer science has simultaneously increased year over year since 2018 among Indiana's K-8 student population. Based on [2023 student enrollment data](#), only 7% of Indiana high school students in grades 9-12 enrolled in a computer science course, indicating a clear need to maintain and expand upon current efforts to build capacity for and provide access to computer science education opportunities while supporting initiatives to increase participation in computer science education.

According to the Indiana Department of Workforce Development (DWD)², the number of jobs in the computer science and mathematical sector in Indiana are expected to grow to nearly 69,000 by 2028, an increase of approximately 7,000 from its 2018 base of 61,344 jobs. Furthermore, in 2023, Indiana averaged 5,623 open computing jobs with an average base salary of \$85,637.¹ Finally, Indiana's overall economic growth is directly tied to the availability of a technology-skilled workforce, as technology and technology-driven companies contribute \$51 billion in Indiana gross domestic product.³ Infrastructure is in place to support teacher capacity and expand student access to and participation in high-quality computer science education opportunities. Indiana's future investment in increasing participation of high school students beyond the current 7% enrolled in a computer science course will directly influence the technology talent pipeline and support economic growth in Indiana.

Through the ongoing collaboration with and commitment of school leaders, educators, state lawmakers, and industry partners, IDOE continues to support expanded computer science efforts for Hoosier students and maintain Indiana as a national leader in computer science education.
