### **Indicator 7: Preschool Outcomes**

### **Definition**

Percent of preschool children aged three through five with individualized education programs (IEPs) who demonstrate improved:

- A. Positive social-emotional skills (including social relationships);
- **B.** Acquisition and use of knowledge and skills (including early language/communication and early literacy); and
- **C.** Use of appropriate behaviors to meet their needs (20 U.S.C.1416 (a)(3)(A)).

### **SPP/APR Measurement**

### **Summary Statement 1:**

Percent= [# of preschool children reported in progress category  $\mathbf{C}$  (+) # of preschool children reported in category

### **Monitoring Cycle**

Assessments are completed within six weeks of a student entering an early childhood program and upon exit. Testing outcomes are submitted to the Indiana Department of Education (IDOE) from the assessment vendor following the school year and are stored in the IDOE data warehouse. Data is analyzed for assignment to the reporting category as described in the following section.

# **State Targets**

IDOE utilizes the Indiana Student Performance Readiness and Observation of Understanding Tool (ISPROUT) assessment as the measure for preschool outcomes. This tool aligns with the <u>Indiana Early Learning Foundations</u> and includes: mathematics, English/language arts, physical development, science, social studies, and social and emotional skills. Teachers or speech-language pathologists (SLPs) complete the online assessment within six weeks of entrance into an early childhood program and upon exit of the program to assess growth.

Based on the student data, scores are assigned based on two summary statements, as listed below:

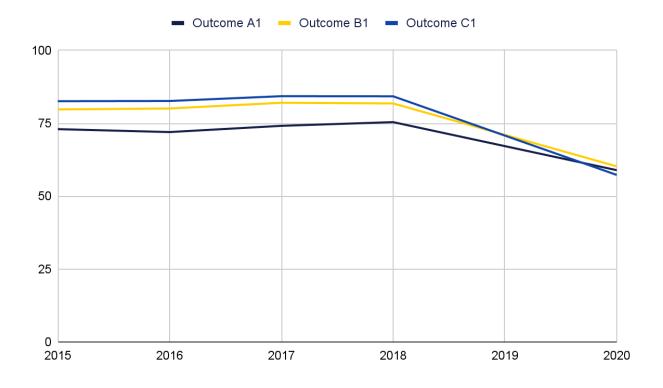

- 1. Of those children who entered or exited the program below age expectations in each outcome category, the percent who substantially increased their rate of growth by the time they turned six years of age or exited the program.
- 2. The percent of preschool children who were functioning within age expectations in each outcome category by the time they turned six years of age or exited the program.
