Commendations

- * The Food Service Director was organized and prepared for the Administrative Review. There were several choices of fruit for the breakfast program. The kitchen workspaces and food storage areas were very clean. The kitchen was friendly and works well together.

Technical Assistance

- * The milk coolers should be moved inside the serving line and they were changed for lunch. This allows the cashier to ensure that a breakfast meal is reimbursable with offer vs serve.
- * The food safety plan should be reviewed by the FSD every year with signature and date. Any training for the employees should be included on the professional standard spreadsheet.
- * It was noted before lunch began that the peanut butter sandwiches did not meet the 2 oz requirement for meat/meat alternate. The foodservice worker measured the 4 Tbsp and now understands the amount that is needed.
- * There are so many nice choices for the children to select at breakfast. It appears it would be easier for signage to explain they may take up to two entrees and two within the fruit component. The Food Service Director stated that she would train her staff and have signage immediately.

No Findings during Review
