**Commendations**

- \* It should be noted that the food service staff has done a terrific job continuing to manage school nutrition programs during the pandemic. The food service director was well organized and prepared for the administrative review. It was obvious that the food service staff at the Junior High work well together. The serving lines were eye appealing with several choices for entrees, fruits, and vegetables. The kitchen workspaces and food storage areas were very clean. The food service staff were friendly to students.

**Technical Assistance**

- \* The declined food from the student's tray may go to a share table only if the county board of health allows it. This school does have the offer verses serve allowance, so there isn't a lot of waste. Adults should not be taking food and eating it for their own consumption. This is a federal funded program for students. The food may be designated for the nurse or proper staff to have for students that may need something to eat during the day or it may be donated to another federal program, like a food bank. A written procedure should be in place and discussed with all managers as to how to handle leftover food.
- \* The reviewer questioned the amount of shredded cheese to place on the salad. Cheese should be weighed and then a measuring device may be used. It was determined that two scoops of the 1/4 cup was the correct amount for 2 ounces of cheese. The recipe would be more user friendly to read that 2 oz of cheese equals two 1/4 cups.
