

Emergency Assistance for Nonpublic Schools (EANS)
(January 29, 2021)

The following planning allocations reflect the total amount of services and support that will be made available to eligible nonpublic schools through the EANS fund. The Indiana Department of Education is finalizing the administrative structure that will allow nonpublic schools to request allowable services and supports and will share those details as soon as they are available.

Eligibility: The Indiana Department of Education has determined that all state accredited nonpublic schools or nonpublic schools accredited by a state-approved third party accreditation body serving grades K-12 are eligible to receive services and supports under the EANS program in Indiana.

Allocation Formula: In an effort to advance equity and fulfill the essence of the federal law, the Indiana Department of Education used a per-pupil formula with two components (K-12 students only):

1) Foundation Grant (\$850) - The formula assigns each school \$850 per pupil regardless of a student's socioeconomic status.

2) Complexity Grant (\$700) - In addition to the \$850 per pupil foundation grant, a school will receive an additional \$700 for each student identified as low-income (at or below 185% of the federal poverty threshold).

These planning allocations are based on state enrollment data. Eligible schools that fell below \$10,000 or for which the Department does not currently have enrollment data are automatically allocated a minimum of \$10,000. Each eligible school will submit real-time enrollment data as a component of the required application to participate in this program. More details on the application and submission timeline will be forthcoming.

School ID	School Name	Accreditation	Overall Enrollment	Low Income Students	Foundation \$850	Complexity \$700	Total	Per Pupil

A352	Gateway Woods School	Third Party Accreditation	<p>While these schools are eligible to receive services and supports through the EANS program, the Indiana Department of Education does not have enrollment data to calculate an allocation. These schools will be given an opportunity to update enrollment data with the Department if and when they submit an application to participate in the program. Each school will be notified when the application window opens and will be given ample opportunity to submit data to the Department if they wish to participate in the program.</p>
