CONSTRUCTION MEMORANDUM 22-05

TO: District Deputy Commissioners
District Construction Directors
District Technical Services Directors
District Area Engineers, Project Engineers/Supervisors
District Project Management Director, Project Management Director
District Traffic Engineers, District Testing Engineers
District LPA Coordinators, Field Engineers, Division of Materials and Tests

FROM: Gregory G. Pankow, P.E., Director 
Division of Construction Management and District Support

SUBJECT: Subgrade Treatment for Full Depth Patching

INDOT adopted Type ID subgrade treatment for full depth patching designs in January 2021. However, a compaction issue with Type ID has been discovered in patching sections inaccessible to rollers. Therefore, Subgrade Treatment Type 1C, Type II with the addition of Type IB geogrid, or Type IV shall be used to replace Type ID subgrade treatment for full depth patching. The Contractor may select which alternate type to use. This change is mandatory for lengths which are not accessible to a roller and optional for others.

This change is effective immediately and shall be documented by way of a zero-cost change order on all impacted contracts.

Any questions should be directed to your Construction Management Field Engineer.
