

INDOT maintains unit price summaries which contain the high, low and average unit bid prices for every pay item included in an awarded INDOT Project during the prior year. The average unit prices should be used for all Life Cycle Cost Analysis (LCCA) and Cost of Ownership calculations, however, adjustments to unit prices may be warranted based on project specific conditions/quantities. Contact INDOT Pavement Engineer assigned as project reviewer with any questions.

Use the most recent unit prices located at: <http://www.in.gov/dot/div/contracts/pay/>
