

Brief Bio of Mark D. Bowman, P.E., Ph.D.

Mark Bowman has BSCE and MSCE degrees from Purdue University and a PhD from the University of Illinois at Urbana Champaign. He joined the faculty at Purdue University in 1980. He has extensive experience in structural behavior and design of bridge structures through his teaching, research and committee activities. He has taught several courses on both structural analysis and the design of steel and reinforced concrete bridge structures, and he has been involved in a lead role in the development and teaching of the Bridge Engineering class at Purdue University. He has been active in conducting several research projects for INDOT over a broad range of different topics that vary from laboratory experimental testing of individual members to field monitoring and structural evaluation of full bridge structures.
