Re: Element Level Bridge Inspection Training

This July, INDOT will be hosting two training courses both of which will satisfy the element level training requirements. Both of the courses will be held at the INDOT facility located at 7105 Brookville Road, Indianapolis Indiana.

The first training course has no restrictions for attendance except for prerequisite training. This is the two week bridge inspection course titled *Safety Inspection of In-Service Bridges*. The NHI course number is FHWA-NHI-130055. All participants must have met one of the three prerequisite requirements. A course completion certificate of the prerequisite training must be turned in on the first day of class. Registration for this training is available on line at www.nhi.fhwa.dot.gov. This training will be held July 14th – 25th.

The second training course is available for existing team leaders and will be limited to one team leader per consulting firm. Second and third applicants will be accepted and selected based on available seating. This training is a two day course presented by the FHWA Resource Center. This training will be held July 30th-31st. To register for this training, please contact Susan Hines at shines@indot.in.gov. Please use the subject heading July Training.
