NOTES
1. Transverse joints shall be constructed perpendicular to the centerline with a maximum spacing of 18'-0" unless otherwise specified.

2. The configuration of the preformed elastomeric joint seal shall be a 3/16" to 5/8" wide seal with at least a five cell internal design. The seal height shall be 6/16" to 13/16" in uncompressed stage.

3. For transverse construction joints, the initial saw cut may be eliminated.
