GENERAL NOTES

1. Distances shown are typical except minimum distances may be verified based on field conditions.

2. The spacing of channelizing devices on tangents shall be as follows:
   a. Where the posted speed limit is 50 m.p.h. or greater, the spacing shall be 100 ft.
   b. Where the posted speed limit is less than or equal to 45 m.p.h., the spacing shall be 50 ft.

3. The spacing of channelizing devices on tapers shall be numerically equal in feet to the posted speed limit in mph.

4. The flashing arrow sign shall not be placed on a sidewalk. The flashing arrow sign shall be placed at a distance of 1/3 from the beginning of the taper.

5. Temporary lane closures during daylight hours, cone or tubular markers may be used in lieu of drums.

6. Temporary pavement markings will not be required for temporary daylight lane closures.

7. Minimum pavement section for 1000 trucks per day or less shall consist of 180 #/yd of HMA Surface, on 330 #/yd of HMA Intermediate, on 935 #/yd of HMA Base, on all subgrade treatment. If the truck count for the crossover is greater than 1000 trucks per day, the required pavement section will be provided elsewhere in the plan.

8. Temporary highway illumination, when specified, shall be as detailed elsewhere in the plan.

9. Once the crossovers have been removed, this line shall be removed. If the pavement is to again be used for one-way traffic, the line shall be repainted yellow.

10. For Temporary Crossover Type B, this line shall be removed when the traffic pattern is switched.

11. The advisory speed plate will not be required when the existing posted speed limit is less than 56 mph.

12. Spacing of channelizing devices at this location shall be 50 ft.

13. The "Two-Way Traffic" (XMB-38) and "Do Not Pass" (X-41-8) signs shall alternate every 2540 ft. throughout the two-lane two-way operation.

14. For a bridge or culvert, this distance may be adjusted by the Engineer as required. However, it shall be as close to the minimum as possible.

15. Once the crossovers have been removed, this line shall be repainted broken white, if the pavement is to again be used for one-way traffic.

LEGEND

- Flagger
- Work area
- Flashing arrow sign
- Channelizing device
- Police car (optional)
- Construction sign and support

Temporary Pavement Marking
Removal of pavement markings and prismatic reflectors
Typical Sign Standard (Road Closure Sign Assembly)
Type III-A or Type III-B Bicicades as required
Double Headed Flashing Arrow Sign
Direction of Traffic

SURFACE AREA OF ONE TYPE A TEMPORARY CROSSOVER SYS
