NOTES:

1. See Standard Drawings E 706-BCBR-01 or 02 for concrete railing details.

2. Location of transverse joints in reinforced concrete moment slab and railing shall be same as in adjoining PCCP.

4. Increased depth of moment slab thickness greater than 15".

5. Thickness of reinforced concrete moment slab shall match that of adjoining PCCP, but not less than a 12" minimum.

6. The detail shown on this drawing shall be used within the limits of MSE wall only.
