NOTES:
1. Existing subgrade over this distance shall remain in place.
2. The minimum pavement sections shall be as follows:
   - HMA: 50 kg/m² HMA Surfaces, Type A, B, C or D on
     variable HMA Intermediate, Type A, B, C or D
   - Asphalt: 50 kg/m² asphalt surfaces
3. If underdrains are present, they shall be purged at the bottom of
   all trench sections. See Standard Drawing 715-1900 for pipe
   installation details.

L = Pavement removal and pavement replacement (m);
   for new pipe, measured along roadway centerline for pipe parallel to
   roadway centerline, measured perpendicular to pipe centerline.

R = Overall diameter or span (mm)
H = Overall diameter or rise (mm)
d = Vertical distance from centerline to profile grade (m)
