COMPOSITE REPLACEMENT PAVEMENT

NOTES:

1. Existing subgrade over this distance shall remain in place.
2. The thickness of the replacement PCCP shall match that of the existing concrete pavement.
3. The minimum pavement sections shall be as follows:
   - HMA: 90 laps/m² Advanced HMA Surfacing, Type A, B, C or D on variable HMA Intermediate, Types A, B, C or D
5. If subdrainage is present, they shall be kept as per Standard Drawing 719-UNDR-01.
7. New subbase type shall match the existing subbase type and thickness.

L = Pay limit of pavement removal and pavement replacement (m);
   for cross pipe, measured along roadway centerline for pipe parallel to roadway centerline, measured perpendicular to pipe centerline.

Bc = Overall diameter or span (mm)

Hc = Overall diameter or rise (mm)

d = Vertical distance from baseline to profile grade (m)
