NOTES:

1. See Standard Drawings E 706-TBTT-01 through -03 for concrete bridge railing transition type TBT details.

3. This section of railing is part of the concrete bridge railing and shall be filled with the concrete railing on the bridge. The minimum length of this section shall be equal to the thickness of the mudwall, but the actual length of this section will depend on the position of the concrete bridge railing transition type TBT along the bridge approach slab, as shown on the plans. See Standard Drawing E 706-BCBR-01 for concrete bridge railing dimensions.
