

FIELD OFFICE INTERNET SERVICE

The Contractor shall provide internet service for the field office computer by one of the following methods in order of availability.

- (1) Broadband (cable or DSL)
- (2) Cellular
- (3) High speed dial-up

Field office internet service shall include all work to establish, install and maintain the service, including connection to the field office computer and installation of any required software on the computer. The service shall be maintained throughout the term of the pay item for field office.

Field office internet service will not be measured separately for payment.

The cost of field office internet service shall be included in the cost of the field office.
