

208-R-111 GORE AREA TREATMENT

(Revised 05-02-19)

The Standard Specifications are revised as follows:

SECTION 208, BEGIN LINE 3, INSERT AS FOLLOWS:

208.01 Description

This work shall consist of the final shaping and dressing of shoulders, ditches, and slopes by hand or machine methods, or both, to the required smoothness in accordance with these specifications and in reasonably close conformance with the elevations and cross sections shown on the plans or as directed. *This work shall also consist of grading in gore areas and placement of HMA mixtures as shown on the plans.*

SECTION 208, BEGIN LINE 59, DELETE AND INSERT AS FOLLOWS:

208.07 Method of Measurement

Grading of gore areas will be measured per each gore area graded. HMA mixtures required at gore areas will be measured by the ton. Finishing will not be measured for payment unless otherwise provided.

208.08 Basis of Payment

Grading in gore areas will be paid for at the contract unit price per each for grading of gore area. HMA mixtures required at gore areas will be paid for at the contract unit price per ton for HMA approaches.

Payment will be made under:

<i>Pay Item</i>	<i>Pay Unit Symbol</i>
<i>Grading in Gore Area</i>	<i>EACH</i>
<i>HMA for Approaches</i>	<i>TON</i>

Finishing ~~The cost of finishing shoulders, ditches, and slopes; all cut; all fill, including borrow; grading; and related earthwork for each gore area treatment will not be paid for directly. The cost thereof shall be included in the cost of other pay items.~~
