

203-R-744 DISCOVERY OF KARST FEATURES WITHIN THE CONSTRUCTION LIMITS

*(Adopted 10-21-21)*

Karst features include, but are not limited to, voids in the ground, caves, sinking streams, springs, seeps, and sinkholes.

If a potential karst feature is discovered during construction, all work within 100 ft of the feature shall immediately stop and the Engineer shall be notified. The Engineer will suspend all work in this area in accordance with 104.02(b). The Engineer will notify the Department's Geotechnical Engineering Division and the Ecology and Waterway Permitting Group.

The Department will provide the treatment measures to address the karst feature. The karst feature shall be protected from sedimentation runoff in accordance with 205. Work shall not resume in the area until directed by the Engineer.
