### **November 2007 Indiana Employment Report**

INDIANAPOLIS (December 21, 2007) –Indiana’s seasonally-adjusted unemployment rate continues to be the lowest among the six-state Midwest region, according to the monthly employment report released today by the Indiana Department of Workforce Development.

Indiana’s unemployment rate increased slightly in November moving from 4.6 percent to 4.7 percent. The state’s 4.7 percent unemployment rate is the same as the national rate, which was unchanged at 4.7 percent.

Total non-farm employment in the state virtually unchanged from October, and is up 8,400 from one year ago, according to the monthly payroll survey. Total employment was estimated to be 2,989,000.

#### **Employment Report Highlights (Local Area Unemployment Statistics – LAUS)**

*Seasonally Adjusted.* According to the monthly LAUS survey, the number of people estimated to be unemployed in Indiana for November was 150,848, up slightly from 146,539 in October and down from 155,751 one year ago. Indiana’s unemployment rate was 4.7 percent in November 2006.

Indiana’s seasonally adjusted rate of 4.7 percent continues to be the lowest in the six-state Midwest region. The November rates reported for the region were Illinois at 5.2 percent, Kentucky at 5.0 percent, Michigan at 7.4 percent, Ohio at 5.6 percent and Wisconsin at 5.1 percent.

*Non-Seasonally Adjusted.* On a non-seasonally adjusted basis, Indiana’s unemployment rate increased from 4.2 percent in October to 4.4 percent in November. Nationally, the rate for November increased from 4.4 percent to 4.5 percent. Other Midwestern states’ non-seasonally adjusted rates for November were Illinois at 4.8 percent, Kentucky at 4.6 percent, Michigan at 6.9 percent, Ohio at 5.3 percent and Wisconsin at 4.8 percent.

#### **Jobs Report Highlights (Current Employment Statistics – CES)**

Seasonally adjusted employment was essentially unchanged over the month. The service sectors added 900 jobs to partially offset losses in construction and manufacturing. Total non-farm employment is up 8,400 compared to one year ago.

The top three supersectors experiencing the greatest growth in jobs in the state over the year are construction, up 1.8 percent, information, up 1.5 percent and natural resources and mining, up 1.4 percent.

The top three Metropolitan Statistical Areas (MSA) with the greatest growth in jobs over the year are Columbus, up 2.9 percent, Lafayette, up 2.0 percent and Evansville, up 1.2 percent.

The Department recommends looking at these employment trends and data on a long term basis.

### Midwest States Unemployment Rate Trend, Seasonally Adjusted

	Nov '06	Jan '07	Oct '07	Nov '07
U.S.	4.5	4.6	4.7	4.7
Indiana	4.7	5.1	4.6	4.7
Illinois	4.0	4.6	5.3	5.2
Kentucky	5.6	5.6	5.6	5.0
Michigan	7.1	6.9	7.7	7.4
Ohio	5.5	5.3	5.9	5.6
Wisconsin	4.7	4.9	5.2	5.1

The Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with Indiana's 26 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs and closures and operates a statewide job placement service.

### **Technical notes for the news media**

The Department of Workforce Development is now issuing one monthly employment report, combining data from the two separate reports and news releases previously released. All of the data and tables previously available in both reports/news releases is now available through the above data links and is available on the Department's Labor Market Information web site, (<http://www.hoosierdata.in.gov>).

This report contains information from two surveys conducted in cooperation with the federal government about changes in the U.S. labor force. **Jobs** statistics measure the number of positions (jobs) in U.S. businesses created or lost over a specified period of time, and come from government surveys of *payroll* records. For this reason, these statistics do not capture information about changes in the number of self-employed persons, business owners, and farm workers. **Employment** statistics come from surveys of U.S. *households*, and distinguish whether individuals in those households are working (employed) or not working (unemployed). These statistics include the self-employed, business owners, and farm workers. (Note: Individuals are counted as being employed only once, even if they hold more than one job.) The unemployment rate is calculated from these statistics.

In calculating unemployment rates, two different types of numbers are provided. The first, known as the non-seasonally adjusted rate, estimates employment and unemployment without taking into account the effects of seasonal trends. In calculating the seasonally adjusted rate, or employment that follows more or less a regular pattern each year, holiday, summer and other types of seasonal employment is factored out of the estimate. These adjustments make it easier to observe the cyclical and other non-seasonal movements.

The state's unemployment rate is compiled in conjunction with the U.S. Bureau of Labor Statistics and is derived primarily from a national survey of about 60,000 households. Of that number, approximately 1,000 Indiana households are polled each month. It is conducted during the week of the 12<sup>th</sup> day of the month. The labor force is calculated as the number of people 16 years and older who were either employed or were able and available to work.

The Department of Workforce Development believes that employment statistics are the best measure of the status of a state, regional, or local labor force, because it measures people working rather than positions created, and because it includes the self-employed (including business owners) and farm workers.

The next monthly employment report, for December 2007, is scheduled for release on January 18, 2008.

# LABOR FORCE ESTIMATES

CPS BENCHMARK: 2006

§ § § §

EMPLOYMENT BENCHMARK: 2006

THESE ESTIMATES ARE PREPARED IN COOPERATION WITH THE U. S. BUREAU OF LABOR STATISTICS (BLS) AND HAVE BEEN ADJUSTED TO THE CURRENT POPULATION SURVEY (CPS) FOR USE IN ALLOCATING FEDERAL FUNDS. BECAUSE OF IRREGULAR FLUCTUATIONS IN MONTH TO MONTH CHANGES, THE READER SHOULD USE CAUTION WHEN VIEWING THESE ESTIMATES AS INDICATORS OF ECONOMIC CHANGE.

- NOTES: 1) UNEMPLOYMENT RATES ARE COMPUTED FROM UNROUNDED DATA.  
2) COUNTY DATA MAY NOT ADD TO TOTALS DUE TO ROUNDING.  
3) ESTIMATES FOR THE LATEST YEAR ARE SUBJECT TO REVISION EARLY THE FOLLOWING CALENDAR YEAR.

\*Starting with January 2005 data, new MSA definitions are used. These will be revised back to 2000

\*Also starting with January 2005, new methodology is being used. It will be used back to 2000
