

Members not Eligible for Medicare

Indiana is increasing the income eligibility threshold for full aged, blind or disabled (ABD) Medicaid coverage to 100 percent of the federal poverty level (FPL). Non-Medicare eligible individuals that qualify under the aged, blind or disabled category and have income at or below that level (shown in green below) may be eligible for full Medicaid benefits. These currently enrolled members do not need to take any action. Currently enrolled members with incomes that fall in the range shown in blue below are urged to apply for federal Marketplace plans at www.healthcare.gov.

¹ The income limit for full ABD Medicaid eligibility is 100% of the 2014 FPL for single and married individuals. There is a maximum allocation of \$361 for each qualified dependent.

² The federal Marketplace will use the 2013 FPL to calculate eligibility for subsidies through 2014. Available subsidies vary by income level, please consult the Marketplace at www.healthcare.gov for more information.

³ The federal marketplace will use the 2013 FPL for all of 2014. Therefore, the FPL for the marketplace is slightly less than the 2014 FPL used by Medicaid.
