

Indiana CoreMMIS

In early 2016, the Indiana Health Coverage Programs (IHCP) information processing system, IndianaAIM, will be replaced with a new system called CoreMMIS, which stands for Core Medicaid Management Information System. CoreMMIS will be a more modern system that more accurately and efficiently adjudicates claims in alignment with IHCP coverage policies and national billing guidelines.

Along with CoreMMIS, a new provider interface called the Provider Healthcare Portal (Portal) will replace Web interChange. The Portal will have great new features such as online provider enrollment and the ability to upload supporting documents for electronic claim and prior authorization submissions. It will also allow providers to view IHCP members' benefit plan coverages and usage of service units relative to benefit limitations in real time.

WHAT CAN YOU DO IN THE PROVIDER PORTAL?

Through the new CoreMMIS and Provider Healthcare Portal, healthcare providers can:

- Submit Claims
- Check on the status of your claims
- Check on a patient's eligibility
- Plan their health coverage
- Request prior authorization

Managed Care Enrollment

- Enroll, check status, and update roles
- Update their procedures
- Manage their assigned Caremember's enrollment

Provider Education Opportunities

Web-based training on the NEW Portal is now available! To take advantage of the many new features available on the Portal, providers and their designated representatives, known as delegates, need to learn how to use the new system. Find out more on the Provider Healthcare Portal Training (www.indianamedicaid.com/general-provider-services/provider-education/provider-healthcare-portal-training.aspx) page.
