## **AI Pilot**

As of October, Verida has been piloting an artificial intelligence (AI) call center resource called Vee. The initial functionality is to check the status of trips, cancel trips and allow members to ask basic questions. The goal is to provide members with a user-friendly option for assistance without the need for a live agent. Live agents are still available to members who prefer this option. Testing began in July after FSSA review. All calls with Vee are monitored and have indicated favorable results thus far.

## **Verida Performance Oversight: Clarissa Loveall Matos**

Ms. Matos presented on the oversight activities that FSSA has completed thus far in contract year 2. It was shared that FSSA monitors the Verida contract through various methods and details were given about each one listed below.

3. Reviewing of weekly, monthly, and annual reports

Ms. Matos provided more information regarding on-site audits, stating that they consist of desk reviews which include documentation review and live demonstrations. Topics for on-sites are pulled from the contract and reporting. It was also stated that annually an on-site audit is completed regarding program integrity and claims processing.
