SECTION I. Introduction

Managed Care Goals, Objectives and Overview

Overview of Indiana Health Coverage Programs

Indiana continues to engage in activities to improve the lives of its members through planning and initiatives concentrating on timely access to health care, quality and cost management in Medicaid managed care. This strategy includes an interdisciplinary, collaborative approach through partnerships with enrollees, other governmental departments and divisions, providers, contractors, managed care entities and academics, as well as community and advocacy groups.

The Indiana Family and Social Services Administration is the single state agency responsible for administering Medicaid programs. Per the U.S. Census Bureau, the population of Indiana in 2019 was 6.732 million. Per FSSA's Data and Analytics unit, the Medicaid enrollment in December 2020 was 1,749,589 of which 1,430,281 were in managed care. Thus, Medicaid provides vital health care to approximately one in four Hoosiers. In 2021, Indiana's health care coverage will include services through the Hoosier Healthwise program, Children's Health Insurance Program, Healthy Indiana Plan, Hoosier Care Connect or fee-for-service. Indiana's risk-based managed care programs include HHW, HIP and HCC. CHIP members may be served through RBMC or FFS.

The FSSA Office of Medicaid Policy and Planning's Quality and Outcomes Section is charged with oversight of the managed care entities through reporting, contract compliance and quality initiatives specific to the HHW, CHIP, HIP and HCC programs. The OMPP Quality and Outcomes staff provide oversight to the health plans by monitoring data and reporting, seeks opportunities to enhance the quality of care provided to members, and contract compliance monitoring and supervision. Data collection and reporting is facilitated through the health plans' quarterly and annual self-reporting and through the Enterprise Data Warehouse program-wide reports.

OMPP Quality and Outcomes staff utilize data reporting for ongoing quality initiatives to identify areas for improvement. The contracted health plans must meet contract requirements which include developing a Quality Management and Improvement Program for each line of state business to monitor, evaluate and act on aspects that impact the quality of care provided to members. Four important components of the QMIP are: the plan's Consumer Assessment of Healthcare Providers and Systems, Healthcare Effectiveness Data and Information Set, meeting the requirements of the National Committee for Quality Assurance and addressing opportunities for improvements identified in the External Quality Review. In addition to the plans' QMIP, each plan must annually conduct and submit to OMPP their CAHPS and HEDIS results and the NCQA rankings.

Since 82% of the delivery of health care in 2020 to Indiana Medicaid members is via a managed care model, it is Indiana's goal to ensure that the contracted health plans not only perform the administrative functions of a typical insurer, but also be adept at addressing the unique challenges and needs of low-income populations. The plans are also expected to manage and integrate care along the continuum of health care services. OMPP expects the contracted health plans to:

- Improve overall health outcomes
- Foster personal responsibility and healthy lifestyles
- Increase consumer knowledge of health care by increasing health care literacy as well as providing price and quality transparency.
- Improve access to health care services

- Engage in provider and member outreach regarding preventive care, wellness and a holistic approach to better health
- Develop innovative utilization management techniques that incorporate member and provider education to facilitate the right care, at the right time, in the right location

To ensure that these expectations are met, Indiana oversees the allocation of care throughout multiple means—administratively, fiscally and through the delivery of member services, provider services, service utilization, care management and claims payments. Medicaid Quality and Outcomes may use corrective action(s) when a contracted health plan fails to provide the requested services or otherwise fails to meet their contractual responsibilities to the state. It is the mission of the state to ensure that members receive services in an efficient and effective manner.

The five MCEs contracted with the state of Indiana are: Anthem Insurance Companies, Inc. (Anthem), Coordinated Care Corporation, Inc. d/b/a Managed Health Services, MDwise, Inc., CareSource, and UnitedHealthcare. Two MCEs, Anthem and MHS, have the HHW, HIP and HCC lines of business for risk-based managed care. Two MCEs, MDwise and CareSource, have the HHW and HIP lines of business for risk-based managed care. A fifth MCE, UnitedHealthcare, was selected and began administering the HCC program April 1, 2021. The MCEs are expected to achieve the goals and objectives set forth by OMPP and manage the care of members enrolled in the HHW, HIP and HCC programs.

OMPP has identified four global aims that equally support HHW, HIP and HCC goals and objectives. These are:

- 1) **Quality:** Monitor quality improvement measures and strive to maintain high standards
 - a) Improve health outcomes
 - b) Encourage quality, continuity, and appropriateness of medical care
- 2) **Prevention:** Foster access to primary and preventive care services with a family focus
 - a) Promote primary and preventive care
 - b) Foster personal responsibility and healthy lifestyles
- 3) **Cost:** Ensure medical coverage in a cost-effective manner
 - a) Deliver cost-effective coverage
 - b) Ensure the appropriate use of health care services
 - c) Ensure Utilization Management best practices
- 4) **Coordination/Integration:** Encourage the organization of patient care activities to ensure appropriate care
 - a) Integrate physical and behavioral health services
 - b) Emphasize communication and collaboration with network providers

History and Overview of IHCP's Risk-Based Managed Care Programs

Collectively, Hoosier Healthwise, Hoosier Care Connect, and the Healthy Indiana Plan share in ensuring members' access to primary and preventive care services by seeking to improve quality, continuity, and appropriateness of medical care. The historical timeline for Indiana's risk-based managed care program is contained in Appendix 1.

Hoosier Healthwise

Indiana established the HHW program in 1994 under the administration of OMPP. The state first introduced a primary care case management delivery system called PrimeStep. Two years later, Indiana added a risk-based managed care delivery system made up of MCE-contracted health plans, which are health maintenance organizations, authorized by the Indiana Department of Insurance, and contracted with OMPP. The historical timeline may be found in [Appendix 2](#).

HHW provides health care coverage for low-income families, some pregnant women and children. The program covers medical care including, but not limited to, doctor visits, prescription medicine, mental health care, dental care, hospitalizations, surgeries and family planning at little or no cost to the member or the member's family. Based on a Feb. 1, 2018, waiver approval, all newly pregnant women with incomes at or above 138% of the federal poverty level are served in the Healthy Indiana Plan. Pregnant members with incomes above 138% of the FPL continue to be served in Hoosier Healthwise.

HHW members are eligible for benefits either through Medicaid or through the Children's Health Insurance Program. CHIP health care coverage is for children up to age 19 and available to members who may earn too much money to qualify for the standard HHW coverage. A child may be covered in CHIP Package C by paying a low-cost monthly premium.

Hoosier Healthwise Strategic Objectives for Quality Improvements 2021

The development of the HHW quality strategy initiatives is based on identified trends in health care issues within the state of Indiana, attainment of the current quality strategy goals, close monitoring by OMPP of the managed care entities' performance and unmet objectives, opportunities for improvement identified in the external quality review and issues raised by external stakeholders and partners. OMPP has outlined initiatives for 2021 specific to the HHW program in Table 1. Some of these objectives have been monitored and maintained from previous years, while other measures are new for the 2021 quality strategy.

TABLE 1: 2021 Hoosier Healthwise Initiatives		
OBJECTIVE	METHODOLOGY	GOAL
<p>1. Improvements in Children and Adolescents Well-Care</p> <p>Percentage of members with well-child visits during first 21 years of life. HEDIS measures, well-child visits in the first 30 months of life and child and adolescent well-care visits for ages 3-21, using hybrid data.</p>	<p>OMPP utilizes HEDIS measures for tracking the percentages of well-child services in children and adolescents.</p>	<p>Achieve at or above the 90th percentile of the NCQA 2022 Quality Compass improvements in children and adolescent well-child W30 and WCV HEDIS measures.</p>

TABLE 1: 2021 Hoosier Healthwise Initiatives		
OBJECTIVE	METHODOLOGY	GOAL
2. Early Periodic Screening, Diagnosis and Treatment	OMPP utilizes HEDIS measures for tracking the percentages. OMPP is aligning its EPSDT program requirements with the American Academy of Pediatrics Bright Futures guidelines. OMPP anticipates the contracted health plans will provide follow-up and outreach to providers about the Bright Futures guidelines and provider toolkits.	OMPP monitors EPSDT compliance through MCE reporting of HEDIS prevention and screening, access/availability of care and utilization measures specific to children and adolescents. OMPP verifies compliance through the inclusion of several of these HEDIS measures as part of our HHW pay for outcomes program including well child visits (W30, WCV and CIS), annual dental visits and lead screening for children.
3. Completion of Health Needs Screen	Administrative reporting.	Achieve at or above the 60% for all new members completing the health needs screening within 90 days of enrollment.
4. Annual Dental Visit	OMPP utilizes HEDIS for tracking the percentage of members, aged 2-20 years, who had at least one dental visit during the measurement year.	Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass for member dental visits during the measurement year.
5. Lead Screening in Children	OMPP utilizes HEDIS for tracking the percentage of children 2 years of age who had one or more capillary or venous blood lead tests for lead poisoning by their second birthday.	Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass for lead screening in children.
7. Asthma Medication Ratio	OMPP utilizes HEDIS for tracking the percentage of children aged 5-11 years of age who were identified as having persistent asthma and had a ratio of controller medications to total asthma medications of 0.50 or greater.	Achieve at or above the 90th percentile of the NCQA 2022 Quality Compass for asthma medication ratio
8. Timeliness of Ongoing Prenatal Care (HEDIS)	OMPP utilizes HEDIS for tracking the percentage of women receiving timeliness of ongoing prenatal care.	Achieve at or above the 50th percentile of the NCQA 2022 Quality Compass for timeliness of prenatal care.

TABLE 1: 2021 Hoosier Healthwise Initiatives		
OBJECTIVE	METHODOLOGY	GOAL
9. Prenatal Depression Screening in Pregnant Women	OMPP utilizes HEDIS for tracking the percentage of women receiving prenatal depression screening in pregnant women	Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass for prenatal depression screening.

Healthy Indiana Plan

Indiana established the Healthy Indiana Plan in 2008 under the administration of OMPP. HIP is a health coverage program for adults between the ages of 19 and 64. HIP is a state-sponsored program and requires minimal monthly contributions from the participant. It offers health benefits including hospital services, mental health care, physician services, prescriptions and diagnostic exams.

The HHW and HIP programs were aligned in 2011 to function under a family-focused approach. The family-focused approach was intended to align these two programs and allow a seamless experience for Hoosier families to establish a medical home model for increased continuity of care. The programs remained two distinct programs with two waivers/demonstrations from the federal government.

OMPP gathered data in 2015 regarding the members identified as medically frail and established a baseline to determine if they are receiving necessary health care and to determine if there are access to care issues. OMPP received CMS approval for what was then known as “HIP 2.0” on Jan. 27, 2015, and began accepting applications for the program. Services began just days later, as the enhanced HIP program launched on Feb. 1, 2015. In addition to processing new program applications, the launch of HIP 2.0 included the conversion of members previously enrolled in the original HIP program as well as all non-pregnant adults enrolled in Hoosier Healthwise, Indiana’s traditional Medicaid managed care program. More than 222,000 individuals were enrolled in HIP 2.0 by the end of the first quarter of operations and, to date, HIP has continued to meet its enrollment goals with 622,130 individuals fully enrolled in HIP as of Dec. 31, 2020. All pregnant women with incomes 130% of the Federal Poverty Level and below were moved into the HIP program beginning in February of 2018 and are included in the enrollment numbers.

In 2021, HIP continues to emphasize personal responsibility and preventive health services. The historical timeline may be found in Appendix 3.

HIP Strategic Objectives for Quality Improvement 2021

Table 2 demonstrates the objectives specific to OMPP’s Healthy Indiana Plan. Some of these objectives have been monitored and maintained from previous years while other measures are new for the 2021 Quality Strategy Plan.

TABLE 2: 2021 Healthy Indiana Plan Initiatives

OBJECTIVE	METHODOLOGY	GOAL
<p>1. Access to Care HIP members shall have access to primary care within a maximum of 30 miles of the member’s residence and at least two providers of each specialty type within 60 miles of member’s residence.</p>	<p>The MCE must ensure that each member has an ongoing source of primary care appropriate to the member’s needs. Data is collected through administrative data.</p>	<p>90% of all HIP members shall have access to primary care within a minimum of 30 miles of member’s residence and at least two providers of each specialty type within 60 miles of member’s residence.</p>
<p>2. Access to Care HIP members shall have access to dental care within a maximum of 30 miles of the member’s residence and vision care within a maximum of 60 miles of the member’s residence.</p>	<p>The MCE must ensure that each member has an ongoing source of dental and vision care appropriate to the member’s needs. Data is collected through administrative data.</p>	<p>90% of all HIP members shall have access to dental care within a maximum of 30 miles of the member’s residence and vision care within a maximum of 60 miles of member’s residence.</p>
<p>3. POWER Account Roll-Over (HEDIS AAP) HIP members who obtain a preventive exam during the measurement year receive power account roll-over. Only codes and code combinations listed in the categories ‘Preventive Care Counseling Office Visit’ and ‘Alternative Preventive Care Counseling Visit’ apply to this measure.</p>	<p>OMPP utilizes HEDIS for tracking the percentage of HIP members who receive a qualifying preventive exam.</p>	<p>Achieve rate at or above the 75th percentile of the NCQA 2022 Quality Compass of members who received a preventative exam.</p>
<p>4. Prenatal Depression Screening in Pregnant Women</p>	<p>OMPP utilizes HEDIS for tracking the percentage of women receiving prenatal depression screening in pregnant women</p>	<p>Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass for prenatal depression screening.</p>
<p>5. Timeliness of Ongoing Prenatal Care</p>	<p>OMPP utilizes HEDIS for tracking the percentage of women receiving timeliness of ongoing prenatal care.</p>	<p>Achieve at or above the 50th percentile of the NCQA 2022 Quality Compass for the timeliness of prenatal.</p>
<p>6. Frequency of Post-partum Care</p>	<p>OMPP utilizes HEDIS for tracking the percentage of women who receive required post-partum visits.</p>	<p>Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass for required post-partum visits.</p>

TABLE 2: 2021 Healthy Indiana Plan Initiatives		
OBJECTIVE	METHODOLOGY	GOAL
7. Pregnant Women Smoking Cessation Increase the referral of pregnant women who smoke to the Indiana Tobacco Quitline for smoking cessation services.	Monthly Indiana Tobacco Quitline reports.	Achieve an increase in the percentage who are referred to and have one contact with the Indiana Tobacco Quitline.
8. Completion of Health Needs Screen	Administrative reporting.	Achieve at or above the 60% for all new members completing the health needs screening within ninety (90) days of enrollment.
9. Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse Dependence 7 day	HEDIS measure using administrative data	Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass.
10. Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse Dependence 30 day	HEDIS measure using administrative data	Achieve at or above the 75th percentile of the NCQA 2022 Quality Compass.

Overview of Traditional Medicaid Populations

The Indiana Traditional Medicaid population is comprised of those groups of members not currently enrolled in HHW, HIP or HCC. Native American populations also have access to traditional fee-for-service Medicaid should they choose not to be enrolled in a health plan.

Traditional Medicaid members do not receive managed care services as the traditional Medicaid model utilizes a fee-for-service arrangement in which physicians, hospitals and other providers contract directly with the state for services they provide.

The following are individuals covered under traditional Medicaid receiving fee-for-service benefits:

- Dually enrolled receiving Medicare and Medicaid benefits
- Persons receiving home- and community-based services waiver benefits
- Persons receiving care in a nursing facility or other state-operated facility
- Individuals in a specific Medicaid aid category, such as Refugee or the Breast and Cervical Cancer aid category
- Others not in risk-based managed care

Traditional Medicaid Strategic Objectives for Quality Improvement 2021

In 2021, OMPP will continue efforts to involve the traditional Medicaid population into the overall quality improvement efforts.

Table 3 demonstrates the objectives specific to OMPP’s Traditional Medicaid initiatives.

TABLE 3: 2021 Traditional Medicaid Initiatives				
OBJECTIVE	METHODOLOGY	2019 BASELINE	2020 RESULTS	GOAL
1. Breast Cancer Screening Percentage of women who had a mammogram to screen for breast cancer.	Administrative reporting through Enterprise Data Warehouse using HEDIS specifications.	30.53%	33.33%	Increase the 2021 rate by 3%.
2. Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse or Dependence (HEDIS FUA 7-Day)	Administrative reporting through Enterprise Data Warehouse using HEDIS specifications.	7.58%	12.12%	Increase the 2021 rate by 3%.

Hoosier Care Connect

In 2013 Indiana House Enrolled Act 1328 (HEA 1328) was passed by the Indiana General Assembly. This act tasked FSSA with managing care of the aged, blind and disabled Medicaid enrollees. In response, FSSA convened the ABD Taskforce comprised of staff from across key FSSA divisions and community stakeholders who worked in 2013 and 2014 to design the Hoosier Care Connect risk-based managed care program for individuals with significant needs. The historical timeline may be found in Appendix 5.

In 2020, the state of Indiana held a procurement to choose new managed care entities to serve the Hoosier Care Connect program. Through the Indiana Department of Administration procurement Anthem Insurance Companies, Inc. (Anthem), Coordinated Care Corporation, Inc. d/b/a Managed Health Services and UnitedHealthcare Community Plan were selected to administer the new contract which went live on April 1, 2021.

Hoosier Care Connect Strategic Objectives for Quality Improvement 2021

Overall goals for 2021 includes the completion of the health needs screens and comprehensive assessments, follow up within 30 days and seven days for members after a behavioral health hospitalization. Measures are intended to promote positive health outcomes. Table 4 demonstrates the 2021 objectives specific to the HCC program.

TABLE 4: 2021 Hoosier Care Connect Initiatives		
MEASURE	METHODOLOGY	GOAL
1. Adult Preventive Care (HEDIS)	OMPP is using the adult preventive care HEDIS measure for tracking preventive care.	Achieve at or above the 75th percentile for NCQA 2022 Quality Compass for members 20 years and older who had a preventive care visit.

TABLE 4: 2021 Hoosier Care Connect Initiatives		
MEASURE	METHODOLOGY	GOAL
2. Annual Dental Visit (HEDIS)	OMPP is utilizing the annual dental visit HEDIS measures for tracking annual dental visits.	Achieve at or above the 75th percentile for NCQA 2022 Quality Compass for members ages 2 to 20 years who had a dental visit.
3. Completion of Health Needs Screen (≥60%)	Administrative reporting	Achieve completion of a Health Needs Screen for > 60% of all members during the first 90 days of enrollment.
4. Completion of Comprehensive Health Assessment Tool	Administrative reporting	Achieve completion of a comprehensive health assessment for >79% for all members who are stratified into complex case management or the Right Choice Program following the initial screening, during the first 150 days of enrollment.
5. Improvement in Behavioral Health (HEDIS) Percentage of members who received follow-up within seven days of discharge from hospitalization for mental health disorders: with MRO	HEDIS-like measure based on specifications developed by OMPP, including Medication Rehabilitation Option HCPCS codes.	Achieve at or above 75th percentile for NCQA 2022 Quality Compass for members who receive follow-up within seven days of discharge from hospitalization for mental health disorders—with Medicaid rehabilitation option services.

Development and Review of Quality Strategy

The OMPP Quality Team monitors the trends in health care in the state of Indiana for all Medicaid members. Quality measures are re-evaluated and established annually in the MCE contracts as a component of statewide quality initiatives as well as pay for performance metrics. OMPP monitors the progress of the metrics with the goal of improving health care for Medicaid members served by the contracted health plans. Periodically, external stakeholders identify issues or initiatives for OMPP consideration and the impact on the state. For example, in 2014 an initiative targeted at smoking cessation and pregnant women was added as an incentive measure to the MCE contracts, which remains today. As a result of input from 2020, OMPP will continue in 2021 to utilize the HEDIS Follow-Up After Emergency Department Visit for Alcohol and Other Drug Abuse Dependence, 7-day and 30-day measures as pay for outcomes in the HIP program as part of the effort to focus on providing services to those members with alcohol dependency or substance use disorder. The Indiana Medicaid managed care programs are reviewed through a variety of forums. Input from those forums is used to review the Quality Strategy Plan and to make annual adjustments.

OMPP and the MCE executive staff have regular meetings to address topics applicable to all care programs. A review of each program’s accomplishments, paired with a fiscal analysis concerning program expenditures, allows OMPP to continue to progress through the strategic initiatives, making adjustments as necessary. Items identified in the executive meetings may be included in the Quality Strategy Plan as efforts to improve the delivery of health care, increase the quality of health care for those enrolled in Medicaid or improve fiscal responsibility.

The MCE quality directors include OMPP in monthly collaboration meetings to review and discuss their on-going Quality Improvement Projects, Quality Management and Improvement Program work plans

and strategic initiatives. The contracted health plans use the group for focused problem-solving, clarification, and partnership in quality reporting. These collaboration meetings will continue in 2021.

OMPP holds Quality Strategy meetings quarterly with these representatives to discuss the progress of quality improvement projects, quality subcommittee activities, and reports of outcomes measures. The health plans submit quality improvement projects for discussion at each quarterly meeting. The HHW, HIP and HCC health plans submit quarterly clinical quality measures reports in various areas, such as the following:

- Preventive Services and Chronic Care
- Prenatal and Postpartum Health Outcomes
- Children and Adolescents Preventive Care
- Behavioral Health
- Utilization Management
- Ambulatory Care

Individual initiative reports are presented to the Quality Strategy Committee by the MCEs. The role of the committee is to assist in the development and monitoring of identified goals and strategic objectives of the written Quality Strategy and to advise and make recommendations to OMPP. The quality unit reports to the OMPP Program Evaluation manager who reports directly to the OMPP Quality and Outcomes director. The OMPP Quality and Outcomes director reports directly to the Medicaid director. The OMPP Quality and Outcomes director is the sponsor of the Quality Strategy Committee. Currently, the members of the Quality Strategy Committee include representatives from:

- Office of Medicaid Policy and Planning
- Division of Mental Health and Addiction
- Indiana Department of Health
- Providers (pediatrician, adult health, behavioral health)
- Health plan quality managers
- Advocacy groups
- Consumers
- Providers
- Academia

The Quality Committee, comprised of the individuals from within the stakeholder groups, meets quarterly and focuses on specific topic areas. The Quality Committee supports, advises and informs OMPP on the performance and progress toward the initiatives identified in the Quality Strategy Plan. Table 5 provides the annual schedule of Quality Committee meetings for 2021.

TABLE 5: Annual Schedule of the Quality Strategy Committee and Subcommittees			
MEETING	DESCRIPTION	FREQUENCY	2021 DATES
Quality Strategy	Oversight of other focus groups, including neonatal and health services	Quarterly, 1-3 p.m.	3/30, 6/29, 9/21, and 12/7

TABLE 5: Annual Schedule of the Quality Strategy Committee and Subcommittees			
MEETING	DESCRIPTION	FREQUENCY	2021 DATES
	utilization issues and providing input for overarching Quality Strategy.		
Dental Advisory Panel	Focus: Improve oral health. Provide input on dental policy and provide clinical recommendations to improve oral health and overall health of members.	Biannually, 1:30 - 3 p.m.	6/11 and TBD

In 2019, the Quality Strategy Committee, and Health Services Utilization Subcommittee and Neonatal Subcommittees were combined into a single quarterly meeting. During 2020, MCE presentations focused on the development and implementation of strategies to increase the childhood immunization rates which fell dramatically due to COVID-19. Each MCE was required to provide a plan containing baseline rates, strategies to increase rates, and interventions to be implemented including a timetable for initiation and completion. Each MCE was then required to provide an update quarterly during subsequent meetings. Similar presentations continue through the 2021 quality meetings as well. During the December 2020 quality meeting the MCEs provided an overview of their diversity, inclusion, and health equity efforts. Other presentations and topics discussed during the quality meetings include the use of community health workers, updates on My Healthy Baby initiative, recommendations from the 2019 EQR, the 2020 P4Os and 2019 HEDIS results. Meeting topics during 2021 will include presentations by the MCEs and IDOH specific to blood lead testing and immunization efforts; infant mortality rate reduction strategies; dental services; quality reporting; and an overview of the MCE 2021 HEDIS results (for calendar year 2020).

As a result of this shared information, the stakeholders’ participation and cooperation is used to monitor, evaluate, share best practices, and improve performance. Committee members actively participate on behalf of the state of Indiana and the many Hoosiers reliant on quality health care. OMPP strives to continue raising the bar for health care and improve the quality of life for thousands of infants, children, adolescents, and adult Hoosiers across the state of Indiana. OMPP maintains an on-going review of movement within the strategic objectives through these quality committees.

The findings from the annual External Quality Review are used to monitor quality initiatives and identify areas for improvement. Initiatives may be identified for inclusion in the Quality Strategy Plan or for program modifications. The 2020 External Quality Review for the 2019 calendar year focused on themes across multiple facets. Focus studies for the 2020 EQR were:

- Validation of performance measures
- Validation of MCE performance improvement projects
- Examination of provider network adequacy at each MCE
- Optional EQR activity: Focus study on lead testing
- Optional EQR Activity: Focus study on the utilization and delivery of non-emergency medical transportation
- Optional EQR Activity: Focus study on claims adjudication and encounter submissions

Findings from the provider network adequacy and non-emergency medical transportation focus studies identified opportunities for improvement in MCE reporting to OMPP. Specific to network adequacy,

OMPP will provide clarity in the provider definitions for reporting including basis and methodology for counting providers, and the specifications on the categorization of providers. OMPP will add NEMT reporting requirements to determine the frequency and reason for trips that were requested but could not be filled due to lack of provider availability and member no shows.

SECTION II. Assessment

Quality and Appropriateness of Care

The MCEs are contractually required to maintain an administrative and organizational structure that supports effective and efficient delivery of services to members. Furthermore, Indiana is continually evaluating ways to increase cost-effectiveness. The overarching goal to improve access to care extends throughout the quality improvement efforts of OMPP and is embedded into the expectations of the contracted health plans.

National Performance Measure

The MCEs monitor, evaluate, and take action to identify and address needed improvements in the quality of care delivered to members in the HHW, HIP and HCC programs. This includes necessary improvements by all providers in all types of settings. In compliance with state and federal regulations, the contracted health plans submit quality improvement data, including data that meets HEDIS standards for reporting and measuring outcomes, to OMPP. This includes data on the status and results of quality improvement projects. Additionally, the MCEs submit information requested by OMPP to complete annual quality reports.

Monitoring and Compliance

The state conducts multiple monitoring activities to maintain oversight and allegiance to stated goals within this Quality Strategy. Monitoring activities include:

- Quality management and improvement program work plans
- Data analysis
- Enrollee hotlines operated by the state's enrollment broker
- Geographic mapping for provider network
- External quality review
- Network adequacy assurance submitted by plan
- On-site monitoring reviews
- Recognized performance measures reports

OMPP Quality and Outcomes staff oversees contract compliance by enforcing reporting requirements mandated within the MCEs' contracts. Each contracted health plan is required to document outcomes and performance results, as instructed within each program reporting manual, to demonstrate data reliability, accuracy and validity. The MCE Reporting Manual provide guidance from OMPP on required performance reporting for the health plans contracted to deliver services for HHW, HIP and HCC. The MCE Reporting Manual is tailored to the goals of each program and describe the reporting process, submission requirements, report descriptions, definitions and templates of all reports with an OMPP required format. The reports submitted in compliance with MCE Reporting Manual specifications are generally referred to as "periodic MCE reports."

In general, reports are submitted quarterly to monitor and compare clinical outcomes against targets, standards and benchmarks as established by OMPP. The OMPP Quality and Outcomes staff directly manages all contracted health plan reporting to ensure timely submissions. This management supports OMPP's capacity to align and increase oversight processes across the MCEs and the programs. OMPP Quality and Outcomes staff conducts a comparative review of the report submissions by the MCEs to ensure that key performance indicators, both operational and clinical, are effectively being identified, collected, validated, and analyzed. Quality and Outcomes conducts quarterly Reporting Meetings to discuss the MCEs' data submissions. Representatives from OMPP pharmacy, program integrity, contract compliance and operations meet to discuss the various reports submitted, analyze the data, identify discrepancies and develop feedback for the MCEs. Anomalies that are identified may also be targeted for discussion at the Quality Strategy Committee and/or the monthly on-site visit.

OMPP Quality and Outcomes sends a confirmation report to the plans confirming the receipt of required data along with any inquiries related to questionable data points. An analysis memo that reviews the finalized performance results, as well as the metrics which fail to meet specified targets, is returned to the plans. Processes have been developed and implemented to improve accountability, compliance and reliance on the operations and health outcome achievements of the state's contracted health plans.

While the contracted health plans are required to submit annual HEDIS and CAHPS data, OMPP also collects quarterly reports on a variety of quality indicators for preventive health, children and adolescents and mothers and newborns. This increased access to data has allowed OMPP to continually track and monitor performance on key quality indicators and steer the focus toward improvement activities.

Typically, OMPP Quality and Outcomes staff review and update the reporting manuals annually based on current needs of the programs and in conjunction with the contracted health plans. In 2019 the HHW, HIP, and HCC reporting manuals experienced a major overhaul with the implementation of streamlined the reporting processes and increased consistency in reporting for both the MCEs and OMPP. All reports were reviewed to determine whether they were needed for all programs, required alignment in terms of reporting periods and submission and, if reports should be deleted, revised, or created to capture more meaningful data.

OMPP incorporated multiple steps within the HHW, HIP and HCC report review processes to reinforce OMPP's commitment to receive quality data in a complete, timely and accurate manner. Validation of submitted data is crucial to ensure that performance analysis is based on sound information. OMPP Quality and Outcomes staff reviews data for contract compliance, adherence to established standards and comparisons between health plans as well as data for progress toward pay for outcomes measures and quality initiatives.

OMPP developed a Quality and Outcomes portal to provide a high-level description of key quality improvement processes and links to various resources to help interested parties see how Indiana's Medicaid program is performing. Quarterly and yearly reports from the MCEs are aggregated and synthesized on this site via a stoplight system to make performance easier to gauge. This portal can be accessed at: <https://www.in.gov/fssa/ompp/5533.htm>.

External Quality Review

OMPP contracted with Burns & Associates, Inc. to conduct the required External Quality Reviews for HHW, HCC, HIP and the Indiana's Children's Health Insurance Program in 2020. The HHW, HCC and HIP EQR takes place each summer, and the results are reported each fall. The CHIP EQR is conducted each winter, and the results are reported each spring. In Calendar Year 2020 B&A met with OMPP and agreed to conduct the following for CY 2019 experience:

- Validation of performance measures
- Validation of MCE performance improvement projects
- Examination of provider network adequacy at each MCE
- Optional EQR activity: Focus study on lead testing
- Optional EQR activity: Focus study on the utilization and delivery of non-emergency medical transportation
- Optional EQR activity: focus study on claims adjudication and encounter submissions

Results of the examination of provider network adequacy for each MCE verified that OMPP continues to ensure access to services for all HIP members. All MCEs continue to meet the goal of HIP member access to access to primary care within a maximum of 30 miles of the member's residence and at least two providers of each specialty type within 60 miles of member's residence. Areas for continued improvement on a county level exist for prenatal and postpartum care, addictions services and dental services.

Many of OMPP's monitoring and oversight activities address compliance with access to care and quality of services. The OMPP Quality and Outcomes has contracts with the MCEs to ensure adequate access and availability of health care services to Medicaid members. Contracts are written based on state and federal regulations. The following sections are extracted from the health plans' contracts.

Access Standards

Availability of Services

OMPP Quality and Outcomes requires the MCEs to develop and maintain a comprehensive network to provide services to its HHW, HIP and HCC members. The network must include providers serving special needs populations such as people who are aged, blind, or disabled. For its HHW population, the network must include providers serving children with special health care needs.

The MCEs' contractual obligations with OMPP are aimed at ensuring that covered services are available to Indiana Medicaid members and delivered in a culturally competent manner. The MCEs must have written provider agreements with providers in the networks. The MCEs are responsible for ensuring covered services are available and geographically accessible. The networks must provide adequate numbers of facilities, physicians, ancillary providers, service locations and personnel for the provision of high-quality covered services for all Indiana Medicaid members. The health plans must ensure that all their contracted providers are registered Indiana Health Coverage Program providers and can respond to the cultural, racial, and linguistic needs of its member populations. Each MCE is contractually obligated to meet the unique needs of its members, particularly those with special health care needs, within their networks. For members who may require out-of-network services, the out-of-network providers must be IHCP providers to receive reimbursement from the MCEs.

The contracted health plans encourage out-of-network providers, particularly emergency services providers, to enroll in the IHCP. Tribal Health providers are not required to participate with the health plan, and Native Americans enrolled in health plans are able to choose their Tribal Health provider whether in or out of network and those providers should be reimbursed the same as if they were in-network, under the same prior authorization requirements and at the same rate as in-network providers. The health plans must offer Tribal Health providers contracts with their network that consider the Indian Health Addendum, but Tribal providers are not be required to contract with health plans for their Native American patients to be served.

Each health plan must develop and have under contract its specialist and ancillary provider network prior to receiving enrollment. Hoosier Care Connect access requirements were changed as a part of the re-implementation of the program in 2021. New requirements for substance use disorder treatment and pediatric dentistry access were added as a result of community partner feedback.

Maintain and Monitor Network of Appropriate Providers

The MCEs are obligated to consider the following elements when developing, maintaining, and monitoring the provider networks:

- Anticipated enrollment
- Expected utilization of services, taking into consideration the characteristics and health care needs of HHW, HIP and HCC members
- Numbers and types of providers required, including training, experience, and specialization, to furnish the contracted services
- Numbers of network providers who are not accepting new members
- Geographic location of providers and members, considering distance, travel time, the means of transportation ordinarily used by members and whether the location provides physical access for members with disabilities

OMPP Quality and Outcomes reserves the right to implement corrective actions and will assess liquidated damages if the contracted health plan fails to meet and maintain the specialist and ancillary provider network access standards. OMPP monitors the health plans' specialist and ancillary provider network to confirm that the MCE is maintaining the required level of access to specialty care. OMPP reserves the right to increase the number or types of required specialty providers at any time.

Female Enrollee Direct Access to Women's Health Specialist

The MCEs are contractually required to provide female members with direct access to a women's health specialist within the network for covered care necessary to provide women's routine and preventive health care services. This is in addition to the female member's designated primary medical provider if that provider is not a women's health specialist. The health plans may also establish claims processing procedures that allow payment for certain women's health codes without prior authorization or referral.

Second Opinions

The managed care health plans must comply with all member requests for a second opinion from a qualified professional. If the provider network does not include a qualified provider for a second opinion, the health plan must arrange for the member to obtain a second opinion from a provider outside the network, at no cost to the member.

Adequate and Timely Coverage of Services Not Available in Network

With the exception of certain self-referral service providers and emergency medical care, the MCE may limit its coverage to services provided by in-network providers once the contracted health plan has met the network access standards and has received state approval to close the network. The health plan must authorize and pay for out-of-network care if the MCE is unable to provide necessary covered medical services within contractually required mileage standards. The health plan must authorize these out-of-network services in the timeframes established in the MCE contract and must adequately cover the services for as long as the health plan is unable to provide the covered services in-network. The health plan must require out-of-network providers to coordinate with the MCE on payment and reimbursement

to ensure that any cost to the member is no greater than it would be if the services were furnished in-network.

The managed care health plan may require out-of-network providers to obtain prior authorization from the contracted health plan before rendering any non-self-referral or non-emergent services to Contractor members. If the out-of-network provider has not obtained such prior authorization, the health plan may deny payment to that out-of-network provider. The health plan must cover and reimburse for all authorized, routine care provided to its members by out-of-network providers.

To ensure adequate and timely services are available to members, the health plan must make nurse practitioner services available to members. If nurse practitioner services are available through the contracted health plan, the contracted health plan must inform the member that nurse practitioner services are available. Members can use the services of out-of-network nurse practitioners if no nurse practitioner is available in the member's service area and within the MCE's network.

MCEs must make covered services provided by federally qualified health centers and rural health clinics available to members who are out-of-network if an FQHC or RHC is not available in the member's service area within the contracted health plan's network.

Out-of-Network Provider Coordination with MCEs for Payment

Payment of out-of-network providers for coordination varies by program. In Hoosier Healthwise and Hoosier Care Connect, the contracted health plan must reimburse any out-of-network provider's claim for authorized services provided to HHW and HCC members at a rate it negotiates with the out-of-network provider, or the lesser of the following: the usual and customary charge made to the general public by the provider or the established Indiana Health Coverage Programs amount equal to 98% of the Medicaid fee-for-service reimbursement rates that exist for participating IHCP providers at the time the service was rendered.

Health plans contracted to administer HIP must reimburse any out-of-network provider's claim for authorized services provided to HIP members at the Medicare rate, or if the service does not have a Medicare rate, 130% of the Medicaid rate for that service.

Provider Credentialing

Providers must first be enrolled as an IHCP provider prior to initiating credentialing with an MCE ([42 CFR 455](#)). All managed care health plans must have written credentialing and re-credentialing policies and procedures to ensure quality of care is maintained or improved and to assure that all contracted providers hold current state licensure and enrollment in the IHCP. The MCEs' credentialing and re-credentialing process for all contracted providers must meet the National Committee for Quality Assurance guidelines.

All new providers are required to follow the same provider enrollment process to ensure state and federal regulations are met. Federal regulations require state Medicaid agencies to screen providers and ensure they have not been excluded from participating in the Medicaid program. Once the enrollment process is completed, managed care entities receive a file from the fiscal agent with all the enrolled providers.

The contracted health plans must ensure that providers agree to meet all OMPP's and the MCEs' standards for credentialing PMPs and specialists and maintain IHCP manual standards, including:

- Compliance with state record keeping requirements
- OMPP's access and availability standards

- Quality improvement program standards

The MCEs' provider credentialing and selection policies must not discriminate against providers that serve high-risk populations or specialize in conditions that require costly treatment. The MCEs must not employ or contract with providers that have been excluded from participating in federal health care programs under [Section 1128](#) or [Section 1128A](#) of the Social Security Act.

MCEs must ensure that the network providers offer hours of operation that are no less than the hours of operation offered to their commercial members if the health plan also serves commercial members. The health plan must also make covered services available 24/7 when medically necessary. In meeting these requirements, the MCE must:

- Establish mechanisms to ensure compliance by providers
- Monitor providers regularly to determine compliance
- Take corrective action if there is a failure to comply

Each MCE must provide OMPP written notice at least 90 calendar days in advance of the contracted health plan's inability to maintain a sufficient network in any county.

Provider Incentive Program

MCEs are contractually required to comply with Section 1876(i)(8) of the Social Security Act and federal regulations, including: [42 CFR 438. \(3\)\(i\)](#); [42 CFR 422.208](#); and, [42 CFR 422.210](#). The health plans must supply to OMPP information on its plan as required in the regulations and with sufficient detail for OMPP to determine whether incentive plans comply with federal requirements regarding physician incentive plans. The health plans must provide information concerning its physician incentive plan, upon request, to its members and in any marketing materials in accordance with the disclosure requirements stipulated in the federal regulations. Similar requirements apply to subcontracting arrangements with physician groups and intermediate entities. Physician incentive plans must comply with the federal requirement to refrain from making any specific payment directly or indirectly to a physician or physician group as an inducement to reduce or limit medically necessary services furnished to an individual member. The health plans must also meet requirements for stop-loss protection, member survey and disclosure requirements under [42 CFR 438.6\(b\)](#).

Cultural Competency

- Data on race and ethnicity is sent to the MCEs via the 834 eligibility file. This information is to be utilized by the health plans to communicate effectively and appropriately with their population. The health plans must make all information available in English and Spanish and other prevalent languages, including American Sign Language, identified by OMPP, upon the member's request. Each health plan must identify additional languages that are prevalent among its membership. The MCE must also inform members that information is available upon request in alternative formats and how to obtain them. OMPP defines alternative formats as Braille, large-font letters, audio, prevalent languages, and verbal explanation of written materials. All materials must be approved by OMPP and be culturally appropriate. Verbal interpretation services must also be available and provided by the health plans upon request. The MCEs must also ensure that all its contracted providers can respond to the cultural, racial and linguistic needs of the populations that they serve.

Assurances of adequate capacity and services

All MCEs are contractually obligated to:

- Serve their expected enrollment
- Offer an appropriate range of services and access to preventive and primary care services for the population expected to be enrolled
- Maintain a sufficient number, mix, and geographic distribution of providers

OMPP requires each of the contracted health plans to submit network access reports. In 2019 OMPP revised and substantially enhanced the network access reporting by aligning the requirements to ensure consistency by all MCEs in reporting the number of providers and member access. The newly designed reporting requires each MCE to provide the unique count of providers under contract by provider specialty and county location. The reports now require the MCEs to utilize the IHCP Provider Type and Specialty that is assigned to the provider. For those specialties without a pre-defined IHCP Provider Type or Specialty, the MCEs are required to use the nationally recognized taxonomy code for the provider in assigning them to a specialty category. Each provider is to be counted once based on the county in which the rendering provider is located. The unique providers by county are then compared to the MCE's capitation payment file containing the total members enrolled with then in each line of business in the month of September. Enrollees are then segmented into one of the state's 92 counties. Each member is then tested to determine the distance that the member would need to travel to seek the services of each provider category listed on the report.

OMPP believes that enhanced reporting will provide a more accurate accounting of member access to the services they need. The MCEs will submit network access reports on an annual basis in October of each year and at any time there is a significant change to the provider network. OMPP reserves the right to expand or revise the network requirements due to changing provider or member enrollment, as it deems appropriate. OMPP stipulates that an MCE may not discriminate with respect to participation, reimbursement, or indemnification of any provider, solely based on such license or certification, who is acting within the scope of the provider's license or certification under applicable state law. However, the MCEs may include providers only to the extent necessary to meet the needs of the health plan's members. The MCEs may also manage provider enrollment to establish and maintain quality measures and control costs consistent with the health plan's responsibilities.

OMPP strives to maintain access to care for all members via several managed care contractual requirements. The MCEs are required to develop and implement provider incentive programs to assure the provision of services for all Medicaid members. They are obligated to ensure that a full spectrum of medical services is accessible to all Medicaid members including those in who reside in the rural areas of Indiana with emphasis on the specialty provider and hospital services. Another contractual requirement directs the MCEs to ensure that members have access to care via those physicians in academic medical centers. OMPP utilizes the network adequacy reports submitted by the MCEs on a regular basis to assess member access to services.

Acute Care Hospital Facilities

OMPP requires that all health plans provide a sufficient number and geographic distribution of acute care hospital facilities to serve the expected enrollment. Inpatient services are covered when such services are prescribed by a physician and when the services are medically necessary for the diagnosis or treatment of the member's condition.

Primary Medical Provider Requirements

To assure availability of primary medical providers for members around the state, OMPP's managed care contracts include provisions on PMPs:

- PMPs are allowed to contract with one or multiple health plans. A PMP may also participate as a specialist in another health plan. The PMP may maintain a patient base of individuals who are not members of HHW, HIP and/or HCC (e.g., commercial or traditional Medicaid members).
- The MCEs may not prevent the PMP from contracting with other MCEs.
- The health plans must ensure that each member has a PMP who is responsible for providing an ongoing source of primary care appropriate to the member's needs. PMPs must coordinate each member's physical and behavioral health care and make any referrals necessary. In HHW a referral from the member's PMP is required when the member receives physician services from any provider other than his or her PMP, unless the service is a self-referral service.
- The MCEs must provide access to PMPs within at least 30 miles of the member's residence. Providers that may serve as PMPs include internal medicine physicians, general practitioners, family medicine physicians, pediatricians, obstetricians, gynecologists, and endocrinologists (if primarily engaged in internal medicine). Due to the characteristics of needs for members who are aged, blind or disabled, in HCC any physician may be an individual's PMP.
- The health plan's PMP contract must state the PMP panel size limits, and the MCE must assess the PMP's non-HHW, HIP and HCC practice size when assessing the PMP's capacity to serve the health plan's Medicaid members. Gainwell, OMPP's fiscal agent, maintains a separate panel for those PMPs contracted with more than one health plan.
- The health plans must ensure that the PMP provides "live voice" coverage after normal business hours. After-hour coverage for the PMP may include an answering service or a shared-call system with other medical providers. The health plans must also ensure that members have telephone access to their PMP (or appropriate designee such as a covering physician) in English and Spanish 24/7.
- The MCEs must ensure that PMPs are maintaining the PMP medical care standards and practice guidelines detailed in the IHCP Provider Manual. The health plans must monitor medical care standards to evaluate access to care and quality of services provided to members and to evaluate providers regarding their practice patterns.

Specialist and Ancillary Provider Network Requirements

In addition to maintaining a network of PMPs, the MCEs must provide and maintain a comprehensive network of IHCP provider specialists and ancillary providers.

As with PMPs, specialist and ancillary providers may serve in all MCE networks. In addition, physicians contracted as a PMP with one health plan may contract as a specialist with other health plans.

The MCEs must ensure that specialists are maintaining the medical care standards and practice guidelines detailed in the IHCP Provider Manual. OMPP requires the health plans to monitor medical care standards to evaluate access to care and quality of services provided to members and to evaluate providers regarding their practice patterns.

OMPP requires the MCEs to develop and maintain a comprehensive network of specialty providers listed in Table 6 below. For providers identified with an asterisk (*), the contracted health plans must provide, at a minimum, two specialty providers within 60 miles of the member's residence. For providers identified with two asterisks (**), the contracted health plans must provide, at a minimum, one specialty provider within 90 miles of the member's residence.

TABLE 6: Network Provider Specialties	
SPECIALTIES	ANCILLARY PROVIDERS
Anesthesiologists*	Diagnostic testing*
Cardiologists*	Durable Medical Equipment providers

Speech therapists*	
Urologists*	

OMPP requires that the MCEs maintain additional network access standards for DME and home health providers:

- Two durable medical equipment providers must be available to provide services to the health plan’s members in each county or contiguous county.
- Two home health providers must be available to provide services to each health plan’s members in each county or contiguous county.

For 2021, OMPP will require additional network access specific to the HCC program. MCEs must ensure the availability of an adult general dentistry provider and pediatric dentistry provider within 30 miles of the member’s residence. MCEs must also ensure the availability of a medication assisted treatment provider within 30 miles of the member’s residence as part of their network of substance use disorder treatment providers.

In addition, the health plans must demonstrate the availability of a certain specialty providers. The MCEs must also contract with the Indiana Hemophilia and Thrombosis Center or a similar OMPP-approved, federally recognized treatment center. This requirement is based on the findings of the Centers for Disease Control and Prevention which illustrate that persons affected by a bleeding disorder receiving treatment from a federally recognized treatment center require fewer hospitalizations, experience fewer bleeding episodes and experience a 40% reduction in morbidity and mortality. The health plans must also arrange for laboratory services only through those IHCP-enrolled laboratories with Clinical Laboratory Improvement Amendments certificates.

Physician Faculty Access to Care

For 2021, OMPP’s PFAC reimbursement is intended to generally mirror the fee-for-service required payment arrangement for Medical School Faculty under the state plan. Eligible medical school physicians and practitioners are paid an enhanced rate for utilization and delivery of services to Medicaid members for the purpose of increasing the overall access to services by ensuring Medicaid members have access to care via physicians in academic medical centers. It is anticipated that this payment arrangement will enhance the quality strategy goals previously stated for Hoosier Healthwise, Healthy Indiana Plan and Hoosier Care Connect including increasing adult and child preventive care HEDIS measures to the 50th percentile, reducing emergency department use to below 80 visits per 1,000 members, and increase the timeliness of prenatal care PPC-AD Core Measure to 60% for pregnant women. The enhanced payment differential may be reduced, based on performance metrics listed in the state plan. OMPP will tie its provider performance under this payment arrangement to the following measures: percent of patients seen in clinics in less than seven days; median lag times for clinic visits for all specialties; median time for patients to see a provider within the emergency department; and percentage of patients who report they would recommend hospital or clinic. The performance targets were developed following a review of baseline historical data and national benchmarks. The state intends to re-evaluate performance targets annually during the duration of this arrangement.

TABLE 7: Additional 2021 Physician Faculty Access to Care Measures		
MEASURE	METHODOLOGY	GOAL
1. Percent of patients seen in clinics within seven days of requesting appointment.	Administrative reporting	More than 35% of patients are seen in clinics in fewer than seven days from the time the patient requests the appointment.
2. Median lag time for clinic visits for all specialties.	Administrative reporting	More than 55% of all new patients are seen within three weeks for specialty care visits.

TABLE 7: Additional 2021 Physician Faculty Access to Care Measures		
MEASURE	METHODOLOGY	GOAL
3. Median time for patients to see a provider within the emergency department.	Administrative reporting	Emergency department wait times are under 40 minutes
4. Percentage of patients who report they would recommend hospital or clinic.	Administrative reporting	More than 70% of patients would recommend the hospital or clinic

Institutions for Mental Disease

In 2016, OMPP, in accordance with [42 CFR 438.3\(e\)\(2\)](#), began to reimburse the MCEs for services provided to Members ages 19 to 64 years who experienced short-term stays of no more than 15 days in a calendar month in facilities designated as Institutions for Mental Disease facilities. Member access to mental health and substance use disorder services was therefore expanded by OMPP’s formal designation of twelve facilities as IMDs.

In December 2019, the Indiana Family and Social Services Administration received federal approval from the Centers for Medicare and Medicaid Services of a Medicaid waiver, to take effect on Jan. 1, 2020, that gives Indiana Medicaid the authority to pay for acute inpatient stays in institutions for mental disease for individuals diagnosed with a serious mental illness. Until then, Medicaid law prevented funding from being used for inpatient SMI treatment at any hospital, nursing facility or other institution with more than 16 beds. Through this new waiver, Indiana will be able to cover acute inpatient stays in IMDs for individuals whose primary diagnosis is a serious mental illness. Because approximately 25% of individuals with a serious mental illness also have a substance use disorder, this waiver will allow for consistency in their treatment.

According to Indiana Medicaid records, in state fiscal year 2019, only about half of Indiana’s traditional Medicaid members receiving inpatient psychiatric services accessed those services through an institution for mental disease. Approval of the waiver amendment will mitigate these barriers to access and will shift services from less appropriate settings to facilities like hospitals and larger mental health treatment facilities. Under this waiver, patients are able to receive longer, more appropriate inpatient stays, aiding in achieving stabilization and more successful transitions back into their homes and communities. The change is expected to ultimately drive down the costs associated with overuse of the emergency department for mental health problems and psychiatric crises as well as other costs caused by lack of access to appropriate care settings.

Non-Psychiatrist Behavioral Health Providers

OMPP requires that the health plans include psychiatrists in their networks as required above. In addition to the MCEs’ regular oversight of contracted community mental health centers, the health plans must utilize the results of state oversight reviews to inform contracting decisions, to monitor contracted CMHCs and to develop improvement plans with the affected CMHCs.

The health plans must meet specific network composition requirements for non-psychiatrist behavioral health providers:

- In urban areas, the MCEs must provide at least one behavioral health provider within 30 minutes or 30 miles

- Due to the availability of professionals, access problems may be especially acute in rural areas. In rural areas, the MCE must provide at least one behavioral health provider within 45 minutes or 45 miles. The health plan must provide assertive outreach to members in rural areas where behavioral health services may be less available than in urban areas.
- The health plans also must monitor utilization in rural and urban areas to assure equality of service access and availability. The following list represents behavioral health providers that should be available in each health plan's network:
 - Outpatient mental health clinics
 - Community mental health centers
 - Psychologists
 - Certified psychologists
 - Health services providers in psychology
 - Certified social workers
 - Certified clinical social workers
 - Psychiatric nurses
 - Independent practice school psychologists
 - Advanced practice nurses under IC 25-23-1-1(b)(3), credentialed in psychiatric or mental health nursing by the American Nurses Credentialing Center
 - Persons holding a master's degree in social work, marital and family therapy or mental health counseling

Coordination of Benefits and Continuity of Care

If a member is also enrolled in or covered by another insurer, the MCE is responsible for coordinating benefits to maximize the utilization of third-party coverage. The health plan must share information regarding its members, especially those with special health care needs, with other payers as specified by OMPP and in accordance with [42 CFR 438.208\(b\)](#) regarding coordination of care. In the process of coordinating care, the health plan must protect each member's privacy in accordance with the confidentiality requirements stated in [45 CFR 160](#) and [164](#), which address security and privacy of individually identifiable health information. The health plan is responsible for payment of the member's coinsurance, deductibles, co-payments, and other cost-sharing expenses. However, the MCE's total liability must not exceed what the contracted health plan would have paid in the absence of third-party liability, after subtracting the amount paid by the primary payer.

OMPP requires that each MCE coordinates benefits and payments with the other insurer for services authorized by the MCE that were provided outside the MCE's plan. Such authorization may occur prior to provision of service, but any authorization requirements imposed on the member or provider of service by the contracted health plan must not prevent or unduly delay a member from receiving medically necessary services. Each health plan remains responsible for the costs incurred by the member with respect to care and services which are included in the MCE's capitation rate and not covered or payable under the other insurer's plan.

In accordance with [IC 12-15-8](#) and [405 IAC 1-1-15](#), OMPP has a lien upon any money payable by any third party who is or may be liable for the medical expenses of a Medicaid recipient when Medicaid provides medical assistance. An MCE may exercise independent subrogation rights it may have under

Indiana law in pursuit or collection of payments it has made when a legal cause of action for damages is instituted by the member or on behalf of the member.

Coordination of Benefits: Hoosier Healthwise, Package A

If an HHW member is enrolled in or covered by another insurer, the MCE is fully responsible for coordinating benefits. If an HHW Package A member's primary insurer is a commercial HMO and the contracted health plan cannot efficiently coordinate benefits because of conflicts between the primary HMO's rules and the contracted health plan's rules, the MCE may submit to the enrollment broker a written request for disenrollment. The request must provide the specific description of the conflicts and explain why benefits cannot be coordinated. The enrollment broker will consult with OMPP and the request for disenrollment will be considered and acted upon accordingly.

Coordination of Benefits: Hoosier Healthwise, Package C

An individual is not eligible for HHW Package C if they have other health insurance coverage. If the MCE discovers that a HHW Package C member has other health insurance coverage, they must report the member's coverage to the state. OMPP requires the MCE to assist the state in its efforts to terminate the member from HHW Package C due to the existence of other health insurance.

The MCEs should coordinate with other insurance types such as worker's compensation insurance and automobile insurance.

Coordination of Benefits: HIP

An individual is not eligible for HIP if they have other health insurance coverage. If the MCE discovers that a HIP member has other health insurance coverage, they are required to coordinate benefits and must report the member's coverage to the state. OMPP requires each MCE to assist the state in its efforts to terminate the member from HIP due to the existence of other health insurance.

Coordination of Benefits: HCC

If an HCC member is enrolled in or covered by another insurer, the MCE is fully responsible for coordinating benefits. If an HCC member's primary insurer is a commercial HMO and the contracted health plan cannot efficiently coordinate benefits because of conflicts between the primary HMO's rules and the contracted health plan's rules, the MCE may submit to the enrollment broker a written request for disenrollment. The request must provide the specific description of the conflicts and explain why benefits cannot be coordinated. The enrollment broker will consult with OMPP, and the request for disenrollment will be considered and acted upon accordingly.

Special Needs

In accordance with [42 CFR 438.208\(c\)](#), OMPP requires each contracted health plan to allow members with special needs to directly access a specialist for treatment via an established mechanism such as a standing referral from the member's PMP or an approved number of visits. This provision is for members who are determined to need a course of treatment or regular care monitoring. Treatment provided by the specialist must be appropriate for the member's condition and identified needs.

In accordance with 42 CFR 438.208(c)(2), which specifies allowable staff, OMPP requires each MCE to have a health care professional assess the member through a comprehensive health assessment tool if the health screening identifies the member as potentially having a special health care need. When the further assessment confirms the special health care need, the member must be placed in the appropriate level of care coordination, either care management or complex case management. Each MCE must offer continued coordinated care services to members with special health care needs transferring into the

MCE's health plan from another health plan. Contractor activities supporting special health care needs populations must include, but are not limited to:

- Conducting the initial screening and a comprehensive health assessment to identify members who may have special needs
- Scoring the initial screening and comprehensive health assessment results
- Distributing findings from the health assessment to the member's PMP, OMPP and other appropriate parties in accordance with state and federal confidentiality regulations
- Coordinating care through a special needs unit or comparable program services in accordance with the member's care plan
- Analyzing, tracking, and reporting to OMPP the issues related to children with special health care needs, including grievances and appeals data
- Participating in clinical studies of special health care needs as directed by the state

Coverage and Authorization of Services

OMPP requires all MCEs to operate and maintain a utilization management program. The health plans may place appropriate limits on coverage on the basis of medical necessity or utilization control criteria, provided the services furnished can reasonably be expected to achieve their purpose. The health plans are prohibited from arbitrarily denying or reducing the amount, duration, or scope of required services solely because of diagnosis, type of illness or condition.

The MCEs must establish and maintain medical management criteria and practice guidelines in accordance with state and federal regulations that are based on valid and reliable clinical evidence or consensus among clinical professionals and consider the needs of the contracted health plans' members. Pursuant to [42 CFR 438.210\(b\)](#), relating to authorization of services, the contracted health plans must:

- Consult with contracting health care professionals in developing practice guidelines and must have mechanisms in place to ensure consistent application of review criteria for authorization decisions and consult with the provider that requested the services when appropriate
- Have sufficient staff with clinical expertise and training to interpret and apply the utilization management criteria and practice guidelines to providers' requests for health care or service authorizations for the contracted health plans' members
- Periodically review and update the guidelines, distribute the guidelines, or make them available to providers upon request and make the guidelines available to members upon request. Utilization management staff must receive ongoing training regarding interpretation and application of the utilization management guidelines
- Be prepared to provide a written training plan which shall include dates and subject matter, as well as training materials, upon request by OMPP

OMPP reserves the right to standardize certain parts of the prior authorization reporting process across the MCEs, such as requiring the MCEs to adopt and apply the same definitions regarding pended, denied, suspended claims, etc.

Each health plan's utilization management program policies and procedures must meet all NCQA standards and must include appropriate timeframes for:

- Completing initial requests for prior authorization of services

- Completing initial determinations of medical necessity
- Completing provider and member appeals and expedited appeals for prior authorization of service requests or determinations of medical necessity, per state law
- Notifying providers and members in writing of the contracted health plan's decisions on initial prior authorization requests and determinations of medical necessity
- Notifying providers and members of the contracted health plan's decisions on appeals and expedited appeals of prior authorization requests and determinations of medical necessity

OMPP requires each MCE to report its medical necessity determination decisions and must describe its prior authorization and emergency room utilization management processes. When the MCE conducts a prudent layperson review to determine whether an emergency medical condition exists, the reviewer must not have more than a high school education and must not have training in a medical, nursing, or social work-related field.

OMPP requires that each health plan's utilization management program:

- Include activities above and beyond traditional utilization management activities, such as prior authorization
- Integrate with other functional units as appropriate and support the Quality Management and Improvement Program
- Have policies, procedures, and systems in place to assist utilization management staff to identify instances of over- and under-utilization of emergency room services and other health care services.
- Have policies, procedures, and systems in place to identify aberrant provider practice patterns related to emergency room, inpatient services, transportation, drug utilization, preventive care and screening exams
- Utilize policies, procedures, and systems in place to ensure positive outcomes including active participation of a utilization review committee; evaluation of efficiency and appropriateness of service delivery; and incorporation subcontractor's performance data and facilitate program management and long-term quality and identify critical quality of care issues
- Connect members to disease management, care management and complex case management
- Encourage health literacy and informed, responsible medical decision making. For example, the health plan should develop member incentives designed to encourage appropriate utilization of health care services, increase adherence to keeping medical appointments and obtain services in the appropriate treatment setting. Each health plan is also responsible for identifying and addressing social barriers which may inhibit a member's ability to obtain preventive care.

OMPP requires that the health plan monitors utilization through retrospective reviews, identifies areas of high and low utilization and identifies key reasons for the utilization patterns. Each health plan must identify those members that are high utilizers of emergency department services and/or other services and perform the necessary outreach and screening to ensure the member's services are coordinated and that the member is aware of and participating in the appropriate disease management, care management or complex case management services. The health plan must also use this data to identify additional disease management programs that are needed. Any member with emergency department utilization at least three standard deviations outside of the mean for the population group is to be referred to care

management or complex case management. When identifying members who over-utilize services, the health plan may use Indiana's Right Choices Program, or they may refer members to care management or complex case management.

The health plans must monitor pharmacy utilization as identified when stratifying a member for care. Pharmacy services for HHW, HIP and HCC members continue to be managed by the MCE through their own pharmacy benefits managers. As a part of the utilization review, the health plans will assess a member's utilization as compliant with, contraindicated or in conflict with their diagnoses and health care needs. The OMPP Pharmacy team is currently collaborating with Indiana's MCEs to align their pharmacy medical necessity criteria with the Medicaid fee for service program. This project will establish uniform prior authorization criteria and processes among the MCEs.

As part of its utilization review, the health plans should monitor access to preventive care, specifically to identify members who are not accessing preventive care services in accordance with accepted preventive care standards such as those published by the American Academy of Pediatrics and the American College of Obstetrics and Gynecology. The MCEs should target education, incentives and outreach plans tailored to its member population to increase member compliance with preventive care standards and to decrease inappropriate use of health care.

To monitor potential under- or over-utilization of physical and behavioral health services, the MCEs submit a variety of utilization reports to OMPP. The health plans monitor the volume, type, effectiveness, and timeliness of their prior authorization requirements. The MCEs also provide OMPP with the rates of assessment utilizing the state-approved health needs screen as well as their own comprehensive health assessments. OMPP also receives quarterly reporting on how members are stratified, upon completion of assessment(s), into the appropriate level of care coordination including disease management, care management and complex case management. Health plans monitor use of services for their members assessed with special needs as well as members with a diagnosis of serious emotional disturbance, severe mental illness and/or substance abuse.

Structure and Operations Standards

Provider Selection: Provider Enrollment and Disenrollment

The contracted health plans must follow established procedures to enroll and disenroll providers, including PMPs. In enrolling and disenrolling providers, the MCEs may distinguish whether the provider participates in HHW, HCC and/or HIP programs. The Managed Care Policies and Procedures Manual provides detailed information on PMP and provider enrollment and disenrollment procedures. Once enrolled at the MCE, enrollment information is entered into CoreMMIS with the fiscal agent to complete the enrollment process.

If a PMP disenrolls from the HHW, HCC or HIP program, but remains an IHCP provider, the health plan must ensure that the PMP provides continuation of care for his/her HHW, HCC and/or HIP members for a minimum of 30 calendar days or until the member's link to another PMP becomes effective.

When a PMP disenrolls from HHW, HCC or HIP, the health plan is responsible for assisting members assigned to that PMP in selecting a new PMP within the network. If the member does not select another PMP, the contracted health plan assigns the member to another PMP in network before the original PMP's disenrollment is effective.

The health plan must make a good faith effort to provide written notice of a provider's disenrollment to any member who has received primary care services from that provider or otherwise sees the provider

on a regular basis. Such notice must be provided within 15 calendar days of the MCE's receipt or issuance of the provider termination notice.

Enrollee Information

Member Enrollment

Applicants for the HHW, HCC and HIP programs have an opportunity to select a health plan on their application. The health plans are expected to conduct marketing and outreach efforts to raise awareness of both the programs and their product. The enrollment broker is available to assist members in choosing a contracted health plan. Applicants who do not select a health plan on their application will be auto-assigned to an MCE according to the state's auto-assignment methodology.

New Member Materials

Within five calendar days of a new member's enrollment date, the MCE sends the new member a welcome packet. The welcome packet includes a minimum of a new member letter, explanation of where to find information about the health plan's provider network and a copy of the member handbook or member quick start guide. HHW, HCC and HIP members receive a member ID card within the same timeframe as the welcome packet. The member ID card includes the member's identification number and the applicable phone numbers for member assistance.

The welcome packet contains information about selecting a PMP, completing a health needs screening and the health plan's educational programs and enhanced services. For example, if the health plan incentivizes members to complete a health needs screen, a description of the member incentive is included in the welcome packet. For HIP members, the welcome packet includes educational materials about the POWER Account and POWER Account roll over as well as the recommended preventive care services for the member's benefit year.

Primary Medical Provider Selection

OMPP requires each MCE to ensure that each member has a PMP who is responsible for providing an ongoing source of primary care appropriate to the member's needs. Following a member's enrollment, the MCE must assist the member in choosing a PMP. If the member has not selected a PMP within 30 calendar days of the member's enrollment, the health plan assigns the member to a PMP. Unless the member elects otherwise, the member must be assigned to a PMP within 30 miles of the member's residence and the health plan considers any prior provider relationships when making the assignment. OMPP approves the health plan's PMP auto-assignment process prior to implementation, and the process must comply with any guidelines set forth by the state.

The member may make PMP changes at any time. If the member was auto-assigned a PMP, the member may change to another provider which s/he prefers. The member may also work with the MCE to find a new PMP if he or she moves or otherwise desires a change.

Providers that may serve as PMPs include internal medicine physicians, general practitioners, family medicine physicians, pediatricians, obstetricians, gynecologists, and endocrinologists (if primarily engaged in internal medicine). HCC allows any treating specialist to be a member's PMP due to the unique health needs of members.

Health Needs Screen

Since February 2011, each MCE has been required to conduct a health needs screen for new members. The health needs screen is used to identify the member's physical and/or behavioral health care needs, special health care needs, as well as the need for disease management, care management and/or complex

case management services. The health needs screen may be conducted in person, by phone, online or by mail. For 2021 some MCEs are utilizing kiosks located in retail businesses as well for members to be able to complete their health needs screen. All health plans use an OMPP-approved standard health screening tool. The Health Needs Screen may be supplemented with additional questions developed by the health plan or partnered with the health plan’s comprehensive health assessment tool. Any additions to the health screening tool must be approved by OMPP.

OMPP completed a revision of the required Health Needs Screen for 2020. In 2019 the OMPP Quality team completed an in-depth review on screening tools being utilized by 25 other state Medicaid agencies. Based on this review a decision was made to reduce the content of the Indiana HNS from 63 questions to 13 questions with the goals of increased member engagement, earlier completion of the necessary comprehensive health assessments, and increased numbers of members receiving care coordination services. These 13 questions focus on initial identification of member physical and behavioral health conditions, use of any medications, pregnancy status, smoking and vaping, and lead testing. One question focuses on the member’s possible need regarding various social determinants of healthy including housing, food insecurity, safety, and transportation. The MCEs provided OMPP with their specific mapping to each of the 13 questions including timeframes for the completion of referrals and assessments, assignment of risk scores and placement into care coordination. OMPP conducted routine reviews in 2020 to verify that each MCE was using this revised HNS and following their processes for all newly assigned members. A template containing the thirteen HNS questions is included below:

Question #	Question	Responses
1	Do you have any health concerns?	Yes
		No
2	Do you need help with any of your health concerns?	Yes
		No
3	Do you take any medications?	Yes
		No
4	Have you been seen by a doctor in the last six months?	Yes
		No
5	Have you been seen by a doctor in the emergency room in the last six months?	Yes
		No
6	Have you been a patient in the hospital in the last six months?	Yes
		No
7	Do you use or need anything to help you walk, talk, hear, see, bathe, toilet or eat?	Yes
		No
8	Do you feel down, anxious or have little interest in doing things?	Yes
		No
9	Do you use tobacco or vaping products of any kind?	Yes
		No

10	Do you worry about things like where you live? Getting food every day? Getting to the grocery or doctor appointments? Feeling safe?	Yes
		No
11	Have all children in the home been tested for lead poisoning?	Yes
		No
12 (females only)	Are you currently pregnant?	Yes
		No
13 (females only)	Have you had a baby in the last twelve months?	Yes
		No

The health needs screening must be conducted within 90 calendar days of a new member’s enrollment in the plan. The contracted health plan is encouraged to conduct the health screening at the same time it assists the member in making a PMP selection. Non-clinical staff may conduct the health needs screen. Data from the health screening or NOP assessment form, current medications and self-reported medical conditions will be used to meet the needs of individual members through disease management or care coordination. Each MCE may use its own proprietary stratification methodology to determine which members should be referred to specific care coordination programs, ranging disease management involving member education and awareness efforts to care management or complex case management.

The initial health screen is followed by a detailed comprehensive health assessment tool by a health care professional when a member is identified through the screening as having a special health care need or when there is a need to follow up on problem areas found in the initial health screening. OMPP also requires each health plan to conduct a subsequent comprehensive health assessment if a member’s health care status is multifaceted or has changed since the original screening. Possible overutilization of health care services as identified through claims review may also trigger a comprehensive health assessment.

The comprehensive health assessment may include, but is not limited to, discussion with the member, a review of the member’s claims history and/or contact with the member’s family or health care providers. These interactions must be documented and shall be available for review by OMPP. The MCE must maintain records of those members found to have special health care needs based on the health needs screen, including documentation of the follow-up comprehensive health assessment and contacts with the member, their family or health care providers. The detailed comprehensive health assessment is utilized to identify a member’s individualized needs and ultimately allows for stratification into the appropriate level of care coordination whether it be disease management, care management, or complex case management.

Children with Special Health Care Needs

OMPP requires each MCE to develop care plans to address the special needs populations and for provision of medically necessary, specialty care through direct access to specialists. The HHW managed care program uses the definition and reference for children with special health care needs as adopted by the Maternal and Child Health Division of the Indiana Department of Health and published by the American Academy of Pediatrics:

“Children with special health care needs are those who have or are at increased risk for a chronic physical, developmental, behavioral, or emotional condition and who also require health and related services of a type or amount beyond that required by children generally.”

The health needs screening tool will assign children to one of the Living with Illness Measures screen health domains based on the National Committee on Quality Assurance study design. The scoring for the LWIM screen identifies a child as potentially having a special health care need if the screening identifies needs in one or more of seven different health domains:

- Functional limitations only
- Dependency on devices only
- Service use or need only
- Functional limitations and a dependency on devices
- Functional limitations and a service use or need
- Dependency on devices and a service use or need
- Functional limitations, a dependency on devices and a service use or need

Member Disenrollment from contracted health plans

In accordance with [42 CFR 438.56\(2\)](#) regarding enrollment and disenrollment, each MCE may neither terminate enrollment nor encourage a member to disenroll because of a member's health care needs or a change in a member's health care status. A member's health care utilization pattern may not serve as the basis for disenrollment from the contracted health plan.

The MCE must notify the local county FSSA Division of Family Resources office within 30 calendar days of the date it becomes aware of the death of one of its members, giving the member's full name, address, Social Security Number, member identification number and date of death. The MCE will have no authority to pursue recovery against the estate of a deceased Medicaid member.

Confidentiality

The MCE must ensure that member medical records and all other health and enrollment information that contain individually identifiable health information, is used and disclosed in accordance with the privacy requirements set forth in the Health Insurance Portability and Accountability Act Privacy Rule (see [45 CFR parts 160](#) and [164](#), subparts A and E, which address security and privacy of individually identifiable health information). OMPP requires that each MCE comply with all other applicable state and federal privacy and confidentiality requirements and have a plan for creating, accessing, storing, and transmitting health information data in a manner that is compliant with HIPAA standards for electronic exchange, privacy and security requirements.

OMPP requires that each health plan's information system is compliance with the HIPAA Transaction and Code Set requirements for electronic health information data exchange, National Provider Identifier requirements and Privacy and Security Rule standards. The MCEs' electronic mail encryption software for HIPAA security purposes must be as stringent as the state's security level. The MCEs' IS plans for privacy and security shall include, but not be limited to:

- Administrative procedures and safeguards ([45 CFR 164.308](#))
- Physical safeguards ([45 CFR 164.310](#))
- Technical safeguards ([45 CFR 164.312](#))

Grievance Systems

OMPP requires each MCE to establish written policies and procedures governing the resolution of grievances and appeals. The grievance system must include a grievance process, an appeal process, expedited review procedures, external review procedures and access to the state's fair hearing system. The MCEs' grievances and appeals system, including the policies for record keeping and reporting of grievances and appeals, must comply with state and federal regulations.

The health plans' appeals process must:

- Allow members, or providers acting on the member's behalf, 60 days from the date of action notice within which to file an appeal
- Ensure that oral requests seeking to appeal an action are treated as appeals. However, an oral request for an appeal must be followed by a written request, unless the member or the provider requests an expedited resolution
- Maintain an expedited review process for appeals when the contracted health plan or the member's provider determines that pursuing the standard appeals process could seriously jeopardize the member's life or health or ability to attain, maintain or regain maximum function

In accordance with [IC 27-13-10.1-1](#) and [IC 27-8-29-1](#), each health plan must maintain an external grievance procedure for the resolution of decisions related to an adverse utilization review determination, an adverse determination of medical necessity or a determination that a proposed service is experimental or investigational. An external review does not inhibit or replace the member's right to appeal a contractor decision to a state fair hearing.

The MCE must provide specific information regarding member grievance, appeal and state fair hearing procedures and timeframes to members. This information is included in the MCE welcome packet and is available upon request. The MCE must also supply providers and subcontractors information on member grievance, appeal and state fair hearing procedures and timeframes at the time they enter a contract with the MCE.

Sub-Contractual Relationships and Delegation

According to IC 12-15-30-5, subcontracts, including provider agreements, cannot extend beyond the term of the contract between the MCE and the state. A reference to this provision and its requirements must be included in all provider agreements and subcontracts.

The MCE is responsible for the performance of any obligations that may result from the contract. Subcontractor agreements do not terminate the legal responsibility of the MCE to the state to ensure that all activities under the contract are carried out. The MCE must oversee subcontractor activities and submit an annual report on its subcontractors' compliance, corrective actions, and outcomes of the contracted health plan's monitoring activities. The MCE will be held accountable for any functions and responsibilities that it delegates.

The MCE must comply with [42 CFR 438.230](#), which contains federal subcontracting requirements, and the following subcontracting requirements:

- The health plan must obtain the approval of OMPP before subcontracting any portion of the project's requirements. Subcontractors may include, but are not limited to a transportation broker, behavioral health organizations, pharmacy benefits managers and physician-hospital organizations.

- All subcontractors must fulfill all state and federal requirements appropriate to the services or activities delegated under the subcontract.
- The health plans must have policies and procedures addressing auditing and monitoring subcontractors’ data, data submissions and performance. The contracted health plans must report contractor performance accurately and completely by integrating subcontractors’ financial and performance data (as appropriate) into the contracted health plans’ information system to confirm contract compliance.

OMPP reserves the right to audit MCEs’ subcontractors’ self-reported data and change reporting requirements at any time with reasonable notice. OMPP may require corrective actions and will assess liquidated damages, as specified in Contract Exhibit 2, for non-compliance with reporting requirements and performance standards.

If the health plan uses subcontractors to provide direct services to members, such as behavioral health services, the subcontractors must meet the same requirements as the health plan. The health plan must demonstrate its oversight and monitoring of the subcontractor’s compliance with these requirements. The health plan must require subcontractors providing direct services to have quality improvement goals and performance improvement activities specific to the types of services provided by the subcontractors.

Measurement and Improvement Standards

Table 8 indicates the 2021 OMPP Quality and Outcomes Quality Measures which apply to the HHW, HIP and HCC programs. These Pay for Outcomes goals are listed by managed care program. OMPP continues a commitment to quality improvement and closely monitors the health care program goals working closely with the contracted health plans to ensure quality improvement.

TABLE 8: 2021 P4O Goals by Program		
HEDIS CODE	STATE REPORTS	DESCRIPTION
Hoosier Healthwise P4O Goals		
	Report 0512	Health Needs Screen
W30	Report 0401	Well-Child Annual in the First 30 Months—Six or More Visits
WCV	Report 0401	Child and Adolescent Well-Care Visits—3 to 21-years of age
CIS	Report 0401	Childhood Immunization Status
LSC	Report 0508	Lead Screening for Children
AMR	Report 0402	Asthma Medication Ratio
ADV	Administrative data	Annual Dental Visit
PND-E	Administrative data	Prenatal Depression Screening

	Report 0512	Health Needs Screen
	Report 0513	Comprehensive Health Assessment Tool
ADV	Administrative data	Annual Dental Visits
AAP	Report 0402	Adult Ambulatory and preventive care

Practice Guidelines

Health plans develop or adopt practice guidelines based on valid and reliable clinical evidence and/or through consensus of health care professionals in the field. These practice guidelines are evaluated according to the needs of Indiana Medicaid members and are periodically reviewed and updated. Periodically, the health plans meet to consult on best practices and effective interventions. Practice guidelines are distributed to providers through the plans’ provider relations representative visits and/or mailings and may be available on plans’ websites.

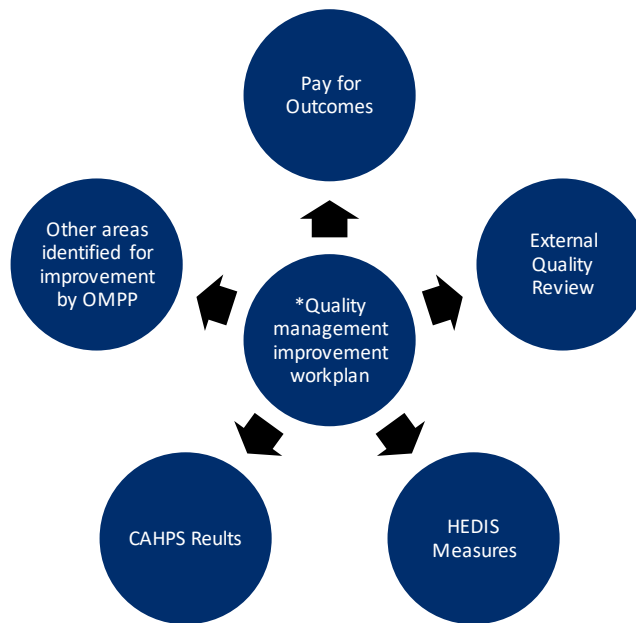

Quality Assessment/Performance Improvement

The state places great emphasis on the delivery of quality health care to HHW, HIP and HCC members. Performance monitoring and data analysis are critical components in assessing how the health plans maintain and improve quality of care delivered across Indiana. Each reportable measure monitored by OMPP is either a HEDIS specification or is a state initiative. OMPP works with the health plans to establish common definitions and understanding across plans for consistency in meeting HEDIS specifications and/or meeting state needs. MCE reporting is monitored monthly, quarterly and annually. Data is compared to contract specifications, HEDIS measures and between plans. During quarterly Quality Strategy Committee meetings, MCE performance data is shared. Specific priorities of each health care program have been identified and are presented in a dashboard format comparing the health

plans’ performance. OMPP uses a confirmation report process to provide feedback periodically to the health plans on individual values.

Evaluation of reporting standards, definitions and templates is a continuous process. As HEDIS revisions occur, OMPP makes reporting adjustments to reflect current national benchmarking practices. As Indiana initiatives evolve, reporting changes are made further refine the data and ensure contract compliance. Concurrently, the development and implementation of overarching quality strategy initiatives reflects HEDIS measures and state data reporting.

OMPP identified Pay-for-Outcomes measures by program. As illustrated in Table 8, a performance measure may apply to one or more health care programs. Annually, drafts of the next year’s Quality Management and Improvement Work Plans and Quality Improvement Project plans are submitted to OMPP for review and approval. The QIPs are the equivalent of the CMS-required Performance Improvement Plan. OMPP continues to work with the health plans to identify sources of input to the QMIP. The diagram below illustrates a minimum of six sources: the External Quality Review, HEDIS outcomes, CAHPS outcomes, Pay for Outcomes results and other identified areas for improvement. Gaps in any of these sources should be addressed in the health plan’s QMIP as well as any additional areas identified by OMPP.

**All gaps in any of the above areas should be addressed in the QMIP.*

The MCEs are required to develop an individualized QMIP for each of their Medicaid lines of business, although a specific PIP may be utilized across multiple programs. The MCEs develop and submit draft QMIPs and PIPs by October 31 for the prospective year. OMPP provides feedback to the MCEs as needed prior to implementation of the QMIP on January 1. Since 2016, OMPP has increased the focus on the measurement and effectiveness of the QIP interventions identified by the plans to achieve the desired improvement. OMPP provided technical assistance as needed and feedback to the plans specific to whether the identified interventions were measurable. Technical assistance and guidance were provided to the MCEs in the form of review and recommendations for their 2020 and 2021 QIPs.

To assess quality strategy effectiveness and to determine strategies for the following year, the health plans review and monitor current member service utilization. Monitoring is conducted through data mining at the MCE level, reviewing data reports from the state fiscal agent Gainwell and referrals from

providers. Individuals with extensive utilization are further assessed for appropriateness in Indiana's restricted card program, the Right Choices Program, or for disease management, care management or complex case management programs. Individuals who underutilize appropriate health care services are encouraged to participate in preventive care services, and their PMPs are provided gaps in care reports to increase the utilization of preventive care.

Health need screens are used to identify individuals with special health care needs. HHW, HCC, and HIP MCEs provide disease management, care management and complex case management programs targeting individuals with special health care needs.

OMPP has outlined 22 quality-related incentives measures in 2021. The outcome measures are composed of withhold measures and bonus measures. Targets for HEDIS measures are reviewed annually and updated when new NCQA benchmarks become available. The state recognizes that performance improvement is an ongoing process and intends to retain targets for at least two years. This allows for a longer timeframe for initiatives to take shape. At the end of 2020, performance measures were reviewed and revised, dropped or added to create targets more appropriate for meeting the needs of the Medicaid population and current state initiatives. Contract amendments occur on an annual basis, or more frequently as needed, if program changes occur. The Pay-for-Outcomes program is reviewed and updated as needed during the annual contract process.

The contracted health plans may receive additional compensation for achieving or exceeding established metrics for Pay-for-Outcomes measures. Such additional compensation is subject to the health plans' complete and timely satisfaction of its obligations under the state fiscal year 2021 contract. This includes timely submission of the contracted health plans' HEDIS Report for the measurement year, the Certified HEDIS Compliance Auditor's attestation, the Consumer Assessment of Healthcare Providers and Systems report as well as timely submission of other reports detailed in the MCE Reporting Manual.

Consumer self-report surveys allow OMPP to gather data from the unique perspective of the Medicaid consumer. Like many other state Medicaid agencies, OMPP has elected to use CAHPS® to assess member satisfaction. OMPP has required the use of the CAHPS® since measurement year 2004. Each health plan is required to submit a final report from the survey vendor to OMPP by July 31 of each calendar year. Survey participants are contacted during the months of January to May each year. Members are required to be a health plan member at the time of the survey and for at least five of the six prior months.

A health plan may, at the discretion of OMPP, lose eligibility for compensation under the Pay-for-Outcomes program if:

- OMPP has suspended capitation payments or enrollment to the contracted health plan
- OMPP has assigned the membership and responsibilities of the contracted health plan to another participating managed care organization
- OMPP has assumed or appointed temporary management with respect to the contracted health plan
- The contracted health plan's contract has been terminated
- The contracted health plan has, in the determination of the director of the Office of Medicaid Policy and Planning, failed to execute a smooth transition at the end of the contract term, including failure to comply with the contracted health plan's responsibilities set forth in the scope of work

- Pursuant to the contract, OMPP has required a corrective action plan or assessed liquidated damages against a contracted health plan in relation to its performance under the contract during the measurement year

OMPP may, at its option, reinstate a health plan's eligibility for participation in the Pay-for-Outcomes program once the contracted health plan has properly remediated all prior instances of non-compliance and OMPP has satisfactory assurances of acceptable future performance.

OMPP works diligently to organize monitoring and reporting systems. One aspect of the OMPP quality improvement program is the monthly on-site monitoring visit with each contracted health plan. OMPP completes an in-depth review of various operational, reporting and quality topics at the on-site visit. A monthly on-site monitoring tool is prepared by OMPP Quality and Outcomes staff based on a selected topic of focus and sent to each health plan at the first of the month. The purpose of the monthly on-site monitoring tool is to gain practical insight into the current daily operational practices, reporting results and internal quality assurance programs relative to the current month's chosen topic. The health plan returns the monthly on-site monitoring tool to OMPP with written responses to topic inquiries and other detailed quality and operational documentation for review by OMPP Quality and Outcomes. Requested data for review often consists of policies and procedures, trending and collection data, member/topic examples and other specific information. OMPP Quality and Outcomes completes a detailed review of the supporting documentation submitted by the contracted health plan. Based on this detailed review, OMPP Quality and Outcomes prepares the agenda and a set of drill-down questions that are sent to the health plan in advance of the on-site visit. At the on-site visit, OMPP Quality and Outcomes staff discusses the health plan's performance as it relates to the operational, reporting and quality expectations. The health plans have an opportunity to provide additional topic information and ask questions to gain a better understanding of the state's expectations and suggestions for improvement.

The on-site visit offers an opportunity for the health plans and OMPP Quality and Outcomes staff to discuss other issues not included on the agenda. Upon conclusion of the monthly on-site monitoring visits, OMPP Quality and Outcomes staff prepares and sends a feedback tool to each health plan that summarizes specific on-site visit information, action items and discussion of other high-level issues. The on-site visit is an integral part of the process to ensure that the contracted health plans are operating according to their contractual obligations. During the COVID-19 public health emergency, the Quality team has met virtually with the MCEs as part of the onsite requirement. The MCEs are asked to complete systems demonstrations and provide individual case reviews for members during these virtual meetings.

State-Defined Performance/Quality Improvement Projects

OMPP requires standard processes for submission of QMIP Work Plans and Performance/Quality Improvement Projects from the contracted health plans.

- QMIP Work Plan template: contracted health plans are required to use a standard template for submission of QMIP Work Plans. This standardized template is a helpful tool for reviewing the draft work plans as well as the quarterly progress updates submitted by the contracted health plans.
- QIPs: contracted health plans may use either the OMPP developed standard template or their own formatted document for submission of their QIPs. This allows for greater transparency into the development, implementation, review, and quarterly update of each MCE's QIPs.

For 2021, OMPP required all MCEs to develop a QIP specific to increasing the rates of completion for the Health Needs Screen. All MCEs were also required to create a QIP with interventions related to: increasing the speed of engagement with care or case management for members with a recent ER visit

related to substance abuse; increasing the number of individuals with a substance use disorder diagnosis who are engaged in care or case management; and increase the percent of individuals who has an ER visit with a principal diagnosis of alcohol or other drug abuse or dependence who have a follow-up visit within seven or 30 days (HEDIS FUA measure).

Table 9 exhibits identified Performance/Quality Improvement Project topics of focus for 2021 for HHW, HIP and HCC.

TABLE 9: Performance/Quality Improvement Projects for 2021			
PLAN	HOOSIER HEALTHWISE	HEALTHY INDIANA PLAN	HOOSIER CARE CONNECT
Anthem	Follow-up after hospitalization (seven days) Health needs screen care management engagement	Follow-up after er visit for alcohol and other drug abuse (seven FUA days) Follow-up after hospitalization (seven days) Health needs screen Care management engagement	Follow-up after er visit for alcohol and other drug abuse (seven FUA days) Follow-up after hospitalization (seven days) Health needs screen Care management engagement
MDwise	Increasing engagement with care management for members with substance use disorder including those with a recent emergency room visit related to substance use disorder/ensuring seven- and 30-day follow-up after emergency room services (FUA) Well-child visits during the first 30 months (W30)	Increasing engagement with care management for members with substance use disorder including those with a recent emergency room visit related to substance use disorder/ensuring seven- and 30-day follow-up after emergency room services (FUA) Health needs screen Post-partum timeliness (PPC)	
MHS	Care management for members with substance use diagnosis following discharge from ER. Health needs screen	Care management for members with substance use diagnosis following discharge from ER. Health needs screen	Care management for members with substance use diagnosis following discharge from ER. Health needs screen

PLAN	HOOSIER HEALTHWISE	HEALTHY INDIANA PLAN	HOOSIER CARE CONNECT
CareSource	Improve new member health needs screen (completion) improve lead testing rates for children ages 12-24 months through provider-focused strategies Reduce potentially preventable emergency department utilization Improving outcomes for substance use through timely member engagement in care-case management	Improve new member health needs screen Improving outcomes for substance use through timely member engagement in care-case management	
United Healthcare	Due to being a newly contracted MCE beginning 4/1/2021, UnitedHealthcare did not submit QIPS for 2021.		

MCE Health Information Systems

OMPP requires all MCEs to operate and maintain an information system sufficient to support the HHW, HCC and HIP program requirements and capable of collecting and transmitting required data and reports to OMPP in the format specified by OMPP. Each contracted health plan maintains an information system that collects, analyzes, integrates, and reports data. Contracted health plans report data to OMPP on:

- Utilization management: health needs screens, comprehensive health assessments screenings, prior authorization, care management, complex case management, disease management, services utilization, pregnancy identification
- Member services: member helpline, member portal, grievances, hearings and appeals, Consumer Assessment of Healthcare Providers and Systems
- Provider reports: claims disputes, credentialing, enrollments and disenrollments, geographic access, compliance
- Quality management and improvement: quality management and improvement work plan, program integrity report, quality improvement projects, HEDIS
- Financial reports: Third Party Liability, medical loss ratio, and benefit costs
- Clinical reports: newborns, well child visits, preventive exams, health screenings, ambulatory care, emergency department and inpatient utilization, follow up after hospitalization, and inpatient readmissions

The contracted health plans are obligated to maintain an information system with capabilities to perform the data receipt, transmission, integration, management, assessment, and system analysis tasks. Data from the MCEs is used to complete monthly and quarterly reports as required by OMPP. Also, data is utilized internally to assess member's service utilization and prioritize for engagement with case/care/disease management programs. Periodically, OMPP requests member-level data from the plans to monitor quality initiatives.

OMPP requires that all contracted health plans develop information system contingency plans in accordance with [45 CFR 164.308](#), which relates to administrative safeguards and to comply with [42 CFR 438.242](#) relative to data. Contingency plans must include: Data Backup plans, Disaster Recovery plans and Emergency Mode of Operation plans. Application and Data Criticality analysis and Testing and Revisions procedures are also required to be addressed within the Contractor's contingency plan documents.

SECTION IV. Improvement and Interventions

Improvements

OMPP's Quality Strategy Plan for 2021 builds upon the plans from 2019 and 2020. There is a continued focus on preventive health care for all programs as well as HHW and HIP priorities on healthy moms and healthy children to ensure that quality health care is provided to all IHCP members. While each MCE has identified quality improvements for 2021, there are several initiatives in place that encompass all Medicaid programs. The interventions listed in Table 10 are at the forefront of planning and implementation of this Quality Strategy. Ongoing monitoring will provide OMPP with quality-related data for future monitoring and planning.

Some of the interventions that encompass all Medicaid programs are tracked through the Pay-for-Outcomes measures described by OMPP within this document.

Table 10 displays all cross-cutting interventions for the managed care programs.

TABLE 10: Cross-Cutting Interventions for all Managed Care Programs		
INTERVENTION	PROCESS	STAKEHOLDERS
Outcome-Based Contracting	<ul style="list-style-type: none"> • Pay-for-Outcomes • Maintain and improve current metrics • Reporting that matches the state’s goals • Monitor enrollment in the Right Choices program • Assure member access to care 	OMPP Contracted Health Plans
Prenatal/Postpartum Care Initiatives	<ul style="list-style-type: none"> • Notification of pregnancy monitoring • Smoking cessation initiatives for pregnant women • Monitoring women’s access to care • Partnership with the IDOH My Healthy Baby project 	OMPP Contracted Health Plans IDOH providers
Improve health care for Indiana’s Children/EPSDT	<ul style="list-style-type: none"> • Increase percentage of children and adolescents receiving well-care • Develop protocol for provider adherence to in-depth physical and mental health screenings • Ongoing provider education, monitoring and outreach • Monitor collaboration efforts between mental health services, PRTF and Money Follows the Person services 	OMPP contracted health plans Gainwell DMHA EPSDT

Improving access to prenatal care and case management of high-risk pregnancies by improving the process for notification of pregnancy programs	<ul style="list-style-type: none"> • Monitor the improvements in the notification of pregnancy process 	OMPP Contracted Health Plans IDOH Providers

Intermediate Sanctions

Indiana health plan contracts include provisions for failure to perform remedies. Non-compliance remedies include written warning, formal corrective actions, withhold of payments, suspending enrollments, immediate sanctions and contract termination. These remedies provide OMPP with an administrative procedure to address issues. To assure quality care for members, OMPP monitors quality and performance standards through several means including reporting and monthly on-site monitoring visits. OMPP works collaboratively with the contracted health plans and holds them accountable for maintaining and improving Medicaid programs. The disposition of any corrective action depends upon the nature, severity and duration of a deficiency or non-compliance.

Pay for Outcomes

For contract year 2019, Table 11 describes MCE performance results for HHW upon which payout percentages are based.

State Health Information Technology

FSSA continues to work toward achievement of the Health Information Technology for Economic and Clinical Health goals and objectives under the Medicaid Promoting Interoperability Program (formally the Electronic Health Records Incentive Program). By advancing health information technology and multi-statewide health information exchanges in Indiana through supporting the design, development, testing and implementation of core infrastructure and technical solutions, FSSA will promote health information exchange among Medicaid-eligible professionals and eligible hospitals. OMPP does and will continue to benefit greatly from this type of data sharing and coordination.

The Implementation Advance Planning Document and State Medicaid HIT Plan for 2021 will focus on many initiatives, including the following:

- Community-wide approaches to opioid treatment and the Indiana Medicaid long-term care patients projects spearheaded by Purdue Healthcare Advisors
<https://pha.purdue.edu/news/purdue-fssa-partner-to-bring-new-care-models-process-improvements-and-technology-systems-to-four-indiana-communities-to-improve-opioids-addiction-treatment-and-hospital-transitions-from-long-term-care/>
- Purdue Healthcare Advisors at Purdue University continues its work in guiding Medicaid-eligible, Indiana health care providers toward the PI standards associated with EHR systems. Providers eligible to benefit from this assistance are those participating in the PI programs under Medicaid or Medicare (must be actively billing Indiana Medicaid for services) and who are practicing in any of the following:
 - ✓ Small groups/independent practices
 - ✓ Federally qualified health centers
 - ✓ Community health clinics
 - ✓ Rural health clinics
 - ✓ Community mental health centers
 - ✓ Ambulatory practices employed by a critical access hospital
- Indiana completed an HIE Assessment/Maturity Model analysis by Brilljent to establish our current and target HIE states. Post Assessment activities include developing a governance model, engaging HIE stakeholders, performing gap analysis, and leveraging public and private sector resources to strengthen the sustainability and effectiveness of HIE activities in Indiana.
- Continued implementation by the Indiana Department of Health of a public health promoting interoperability hub that consists of modernization and upgrades to systems used to perform real time bidirectional communication and query capabilities, a centralized knowledge base for all information (including training and outreach for Medicaid providers and facilities), as well as security risk assessments of internal and external systems that transmit, store and utilize PI data.

OMPP continues to share data with and utilize data from internal and external partners. A project currently in place to allow data exchange between OMPP and the Department of Child Services to enhance service coordination was initiated in 2020 and will continue to move forward in 2021.

MCE information systems are used to collect and submit data to the state to validate performance. State staff directly manages all health plan report submissions. This direct management supports and deepens the OMPP's capacity to align and increase oversight processes across the health plans and the Medicaid programs. Through the course of this alignment, a full comparative review of the report submissions by

the contracted health plans takes place to ensure that key performance indicators, both operational and clinical, are effectively being identified, collected, validated and analyzed. Reporting dashboards are presented to the Quality Strategy Committee and to sub-committees for review. The role of the Committee is to assist in the development and monitoring of the identified goals and strategic objectives of the written Quality Strategy and to advise and make recommendations to OMPP.

While the MCEs are required to submit annual HEDIS data, OMPP also collects quarterly reports on a variety of quality indicators for preventive health, children and adolescents and mothers and newborns. The increased access to data allows OMPP to continually track and monitor performance on key quality indicators and steer the focus toward improvement activities. Yearly, OMPP revises the MCE reporting manual to keep the manual relevant to the quality and oversight needs of OMPP.

During 2021, OMPP will continue to monitor and work with the MCEs, the state fiscal agent, and the EDW to identify and decrease the limitations within their specific health information systems that prevent encounter claims from being provided and loaded in a timely and accurate manner.

In 2018 OMPP began an initiative of determining the best process by which to provide data to CMS on the Adult Quality Measures. In December 2019, OMPP reported (for the first time) to CMS on the Adult Quality Measures. The AQM data is calculated following CMS instructions in the **Consolidated Implementation Guide** and the **Technical Specifications and Resource Manual**. Data is collected for enrollees in managed care and fee-for-service members. Rates were calculated across all reporting health plans for 16 HEDIS measures. For 2020 OMPP submitted rates for 17 Adult Core Quality Measures to CMS, sourced from both HEDIS and AHRQ measures. OMPP utilized the lessons learned from the 2019 submission to accurately define members to be included in the denominators and numerators for all measures. OMPP met the goals of enhancing the quality of data and number of measures in the 2020 submission. Future goals will include further data enhancement as well as identification of additional data sources to allow for reporting on additional measures.

SECTION V. OMPP 2021 Initiatives

Standard Monitoring Compliance for 2021

Normal duties for monitoring compliance and ensuring quality health care is delivered to members will continue in 2021.

Hoosier Healthwise

The primary aim of the HHW program is to provide comprehensive health care coverage for uninsured Hoosiers to improve overall health, promote prevention and encourage healthy lifestyles. A strong focus is on healthy moms and healthy babies to improve birth outcomes. Families have access to health care through the same PMP for each member whenever possible. Continuity of care for family members provides enhanced opportunities for health care to all members of the household.

Healthy Indiana Plan

The primary aim of the HIP program is to provide adults access to a health care plan that empowers them to take charge of their health and prepares them to move to private insurance as they improve their lives. HIP provides incentives for members to be more health conscious by accessing preventive health care and encourages appropriate use of the emergency room.

Hoosier Care Connect

The primary aim of HCC in 2015 was to transition eligible members who are age 65 and over or who had blindness or a disability to a coordinated care program where their multiple health needs could be coordinated. This program also includes current and former wards and foster children. In 2021 health needs screens and comprehensive health assessments will continue to be monitored as pay for outcome measures as they remain instrumental in identifying individual member needs, coordinating care, improving quality outcomes and maintaining consistency of care for these vulnerable members.

Right Choices Program

The primary aim of the Right Choices Program is to assist risk-based managed care and fee-for-service members in obtaining the right care at the right time in the right place for each member. Within this model, RCP members may be restricted to one PMP, and one pharmacy. This allows all care to be managed by the member's PMP to ensure the member is receiving appropriate care. The health plans evaluate members for potential enrollment in the program when members are identified as not utilizing health care services appropriately such as, multiple emergency room visits, pharmacy visits and physician visits that are not medically necessary. The program's design is to assist RCP enrollees by creating a medical home to support the member in obtaining the appropriate care at the right time in the right place.

For 2021 the focus of the Right Choices Program will include a monthly analysis of pharmacy claims identifying those members who have utilized opioid and controlled substances at a rate higher than the standard mean. This information will be uploaded into a single portal that can be accessed by MCE and OMPP staff as needed for review and analysis of Medicaid member usage.

Initiatives for 2021

In addition to normal duties for monitoring compliance and ensuring quality health care is delivered to members, OMPP will undertake the following initiatives to enhance and mature oversight infrastructure and compliance processes.

Policy Governance

The OMPP Coverage and Benefits team within the Clinical Outcomes Section continues to facilitate the structured Policy Consideration process to advance a value-driven program, focusing on cost effective improvements to the health of the Indiana Health Coverage Programs population. The Policy Consideration process was designed to give internal and external stakeholders the ability to request changes and updates to the Medicaid coverage policies. This process defines how requests are submitted and reviewed by the office. Submitted requests go through a rigorous research and review process before policy changes are/can be made.

Monitoring and Reporting Quality

The OMPP Quality and Outcomes staff works collaboratively with internal stakeholders (e.g., functional sections outside of Quality & Outcomes) and the MCEs to improve the oversight and reporting processes by ensuring that all contracted health plans are measuring, calculating and reporting in the same manner. Quality team staff reviewed the health plans' proposed 2021 QMIP Work Plans and QIPs. QMIP Work Plan progress is monitored during On-site Monitoring Visits.

Under the alignment of programming described in this quality strategy, the OMPP Quality and Outcomes Section will continue to collaborate to identify areas needing improvement, such as pharmacy and program integrity, and determine a collaborative approach to monitoring and reporting.

Health Equity

In 2020, FSSA began developing a comprehensive effort to identify the causes of health disparities in Indiana and to create targeted strategies for reform. The Office of Healthy Opportunities furthers FSSA's mission and vision by identifying and reducing impact of social determinants of health on the clients we serve, recognizing that factors like access to food, stable housing and education may limit someone from reaching their full human potential. By serving our clients holistically, FSSA can begin to remove barriers and positively impact health outcomes for vulnerable populations. The Office of Healthy Opportunities is led by the newly hired Chief Health Equity and ADA Officer, who is charged with addressing issues of social equity, with an emphasis on supporting communities of color and persons with disabilities. She will work with the various FSSA divisions to expand the scope of that work to include policy evaluation, metrics development and community engagement.

Beginning in 2021 as part of OMPP's health equity initiative, a focus on infant mortality will be implemented with the goal of improving transparency and accountability recognizing that health disparities account for preventable mortality in minority populations. This initiative will allow OMPP to expand our health equity commitment beyond the annual infant mortality data and analysis that is currently being completed.

A detailed presentation on Indiana Medicaid's 2018 infant mortality rate was provided by OMPP staff during the December 2020 Quality meeting. The study analyzed infant mortality cases for babies eligible for Medicaid from claims captured in the FSSA Enterprise Data Warehouse. Due to the timing of claims run out, data from 2018 was presented and compared to 2017. The study examined maternal age, diagnosis, prenatal care and race.

The infant mortality rate for Indiana Medicaid in 2018 was 7.22 (per 1,000 births) and showed a decreasing rate of 1.52, or 85 total fewer infant deaths, compared to the previous year. Indiana Medicaid’s infant mortality rate was slightly higher than Indiana’s 2018 overall infant mortality rate of 6.8. The data presented in this section of the Quality Strategy Plan is specific to Indiana Medicaid.

Maternal age remained constant with the maternal age in 2018 at 26.95 years and 26.18 in 2017. Most infant mortality cases (30.90% in 2017 and 29.89% in 2018) were of babies who passed within the first 30 days of life. The average age at death changed from 2017 at 71.2 days to 54.2 days in 2018.

TABLE 14: Infant Mortality in Medicaid		
MEASURE	2018	2017*
Infant mortality rate (rate per 1,000 births)	7.22	8.74
Number of live Medicaid births	37,558	40,720
Number of infant deaths	271	356
Average age in days of infant at death	54.2	71.2
Percentage of deaths within first 30 days of birth	29.89%	30.90%

*2017 is represented by data from Q4 2016-Q3 2017

Birthweight is a significant factor in the health of an infant. The percentage of all Indiana live Medicaid births with low birth weight (less than 2,500 grams) in 2018 was 9.96%, an increase of 2.21% from 2017 and slightly higher than the National Average Medicaid of 9.5%.

TABLE 15: Child Core Measures for Medicaid and CHIP				
CHILD CORE MEASURE	DESCRIPTION OF MEASURE	2018	2017*	NATIONAL MEDICAID RATE 2018
Developmental Screening in the First 36 Months of Life	Percentage of children screened for risk of developmental, behavioral and social delays using a standardized screening tool	16.42%	13.40%	41%
Prenatal and Post-Partum Care	Percentage of deliveries that received a prenatal care visit as a member of the organization in the first trimester, on the enrollment start date or within 42 days of enrollment in the organization	86.14%	90.27%	73.3%
Low Birth Weight	Percentage of live Medicaid births that weighed less than 2,500 grams in the state during the reporting period	9.96%	7.75%	9.5%

Tobacco use continues to be a concern for Indiana Medicaid mothers and babies; in 2018 32.47% of Medicaid mothers used tobacco. Tobacco use and mental health diagnosis were found to be co-occurring. In 2018 14.71% women used tobacco during their pregnancy and experienced a mental health condition. 9.19% of pregnant women either smoked or had a mental health condition in 2018. Comparatively, pregnant women who neither smoked nor had a mental health condition comprised 76.10%. In 2018, 20.43% of mothers in infant mortality cases were diagnosed with a mental health condition prior to their infant’s death; of those 49.12% had more than 1 mental health diagnosis. Most mental health diagnoses were related to substance abuse followed by nonpsychotic disorders and mood disorders.

TABLE 16: Tobacco Use and Mental Health in Infant Mortality Cases, 2018			
MENTAL HEALTH DIAGNOSIS	TOBACCO USE	NUMBER OF WOMEN	PERCENTAGE OF CASES
Yes	Yes	40	14.71%
Yes	No	17	6.25%
No	Yes	8	2.94%
No	No	207	76.10%

Another area of great concern is the amount and timing of prenatal care received. In an average uncomplicated pregnancy, one could expect a pregnant mother to receive a total of approximately 29 prenatal visits, however, the average total number of visits in Indiana Medicaid infant mortality cases in 2018 was 9. Of mothers with an infant death 26.94% had no prenatal care, 22.88 % had 6-10 prenatal visits and 9.59% had 21 or more prenatal visits.

TABLE 17: Prenatal Care in Medicaid Infant Mortality Cases		
MEASURE	2018	2017
Average Number of Prenatal Visits for Pregnancy	9	10.86
Number of Mothers with No Prenatal Visits	73	117
Percent of Mothers with No Prenatal Care	26.94%	32.87%

**2017 is represented by data from Q4 2016-Q3 2017*

A normal un-complicated pregnancy would typically consist of 28-29 prenatal care visits. Table 18 represents the number of prenatal care visits in infant mortality cases for 2018.

TABLE 18: Prenatal Care in Medicaid Infant Mortality Cases in 2018		
NUMBER OF PRENATAL CARE VISITS	NUMBER OF WOMEN	PERCENT OF WOMEN
0 Prenatal Visits	73	26.94%
1-5	40	14.76%
6-10	62	22.88%
11-15	45	16.61%
16-20	25	9.23%
21 or more	26	9.59%

TABLE 19: Prenatal Care Visits in a Normal Non-Complicated Pregnancy	
Every 4 weeks until 28 weeks	7 Visits
Every 2 weeks until 36 weeks	18 Visits
Weekly until delivery	3-4 Visits
Total Prenatal Care Visits	28-29 Visits Total

OMPP monitors health plans timeliness of ongoing prenatal care and referrals to the Indiana Tobacco Quitline, a state funded free phone-based counseling service that helps Indiana smokers quit, with Pay for Performance programs to facilitate improvement in these measures. Health plans also must submit document reviews and case study demonstrations related to the coordination of care for pregnant women enrolled in the respective health plans. Out of the 271 infant mortality cases in 2018, 89 of those mothers were enrolled to a managed health plan for less than one month, 30 mothers were enrolled for less than three months but more than one, and 28 mothers were enrolled for four to six months of their pregnancy. 45.76% of women were enrolled with their health plan for 7 or more months of their pregnancy.

TABLE 20: Length of Managed Care Enrollment for Mothers in Infant Mortality Cases, 2018	
MATERNAL MONTHS	NUMBER OF WOMEN INSURED ON MANAGED CARE
0 months	89
1-3 months	30
4-6 months	28
7-9 months	124

Maternal demographic information contained in the Indiana Medicaid claims demonstrated health disparities for African American/Black and Hispanic/Latinx populations. Maternal race information was successfully pulled from claims for 201 out of 271 cases for 2018. The percent of infant mortality cases in 2018 from African American/Black mothers was 30.84%, for Hispanic/Latinx mothers 8.46% and for White mothers 58.71%. Hispanic/Latinx women under 18 and African American/Black women ages 18-25 are overrepresented in infant mortality cases. The percent of infant mortality cases from 2017 to 2018 decreased the most (1.91%) in African/American women.

TABLE 22: Percent of Infant Mortality Cases by Maternal Race

MATERNAL RACE	PERCENT CHANGE	% OF INFANT MORTALITY CASES IN 2018	% OF INFANT MORTALITY CASES IN 2017
White	(0.79%)	58.71%	59.50%
African American/Black	(1.91%)	30.84%	28.93%
Hispanic/Latinx	(1.04%)	8.46%	9.50%

The average number of prenatal visits for African American/Black women was 11, 10 for Hispanic/Latinx women and 12 for White women. The overall average number of prenatal visits with maternal race included was 12.

TABLE 21: Prenatal Visits by Maternal Race in Infant Mortality Cases, 2018

NUMBER OF PRENATAL VISITS	WHITE	AFRICAN AMERICAN/BLACK	HISPANIC/LATINX
0 Visits*	5.08%	3.23%	0.00%
1-5 Visits	16.10%	25.81%	23.53%
6-10 Visits	26.27%	32.26%	41.18%
11-15 Visits	23.71%	22.58%	5.88%
16-20	16.10%	4.84%	11.76%
21 or More	5.08%	1.61%	17.65%

*Maternal race was not available for 65 women who did not seek prenatal care

Maternal diagnoses by race were also examined. Of the women studied, African American/Black women had a higher-than-average rate of diagnoses of excessive vomiting, anemia, diabetes, current preterm complications, high risk pregnancy. Hispanic/Latinx women had higher than average instance of anemia, diabetes, preterm complications, and potential structural complications of pregnancy. White women had higher rates of obesity, tobacco and substance use. The average rate of diabetes for all Medicaid women in infant mortality cases in 2018 was 8.46%, however the average rate for White women was 6.78%, compared to higher-than-average rates of 11.29% for African American/Black women and 11.76% for Hispanic/Latinx women.

TABLE 23: Maternal Diagnosis by Race in Infant Mortality Cases, 2018				
MATERNAL DIAGNOSIS	ALL RACES	WHITE	AFRICAN AMERICAN / BLACK	HISPANIC/LATINX
Tobacco	42.79%	51.69%	33.87%	33.87%
Smoking > 10/day	23.88%	27.97%	19.35%	17.65%
Substance Use Disorder	11.94%	15.25%	8.06%	5.88%
Anemia	22.89%	20.34%	27.42%	23.53%
Preeclampsia	13.43%	12.72%	16.13%	11.76%
Diabetes	8.46%	6.78%	11.29%	11.76%
Obesity	20.90%	24.58%	16.13%	11.76%
Respiratory Disease	13.93%	12.71%	17.74%	11.76%
Multipara	11.94%	11.02%	16.13%	5.88%
Excessive Vomiting	17.91%	16.10%	25.81%	5.88%
Current Preterm Complications	43.28%	41.53%	46.77%	52.94%
Current Preterm Labor	33.33%	32.20%	30.65%	52.94%
Potential Structural Complications of Pregnancy or Delivery	30.85%	29.66%	27.42%	52.94%

The results of this study were shared and discussed with each MCE. Further work will be conducted to collaborate with the MCEs and the Indiana Department of Health in lowering the rates of infant mortality with specific attention to lowering the rates of underserved populations. OMPP will continue to monitor services to pregnant HIP women and the subsequent birth outcomes using the same metrics as previously used in HHW. Additionally, OMPP will measure the number of pregnant women in both HHW and HIP who receive prenatal depression screenings. OMPP will continue to use this data to not only identify HIP quality initiatives in 2021 but also to deepen partnerships with other state agencies such as the Indiana Department of Health’s Maternal and Child Division to decrease infant mortality in the state of Indiana.

In 2019 OMPP began work with the Indiana Department of Health, the Indiana Family and Social Services Administration and the Indiana Department of Child Services on the My Healthy Baby Program. This initiative built a network of services and supports for moms and babies with a goal of creating healthier outcomes for both. The goal of this program is to identify Medicaid members early in their pregnancies and connect them with a home visitor who provides personalized guidance and support to the woman during her pregnancy and continuing through at least the first six to 12 months after her baby’s birth. OMPP collaboration efforts have included making changes to the presumptive eligibility application to inform women about the program and establishing a data feed between IDOH and FSSA containing the demographic information on pregnant women identified through presumptive eligibility. In 2020, My Healthy Baby services were expanded into 22 targeted Indiana counties identified as having the highest rates and risk for infant mortality. OMPP will continue collaboration efforts specific to this initiative in 2021.

In December of 2019, CMS selected Indiana's Family and Social Services Agency as one of ten states to be awarded a five-year \$50,000,000 Maternal Opioid Misuse Model grant. For this cooperative grant

OMPP will serve as a liaison between FSSA and the MCEs and will provide quality expertise. The MOM model was developed to improve the quality of care, reduce adverse health outcomes, and reduce expenditures for pregnant and postpartum Medicaid beneficiaries with Opioid Use Disorder as well as their infants. The MOM grant aims to increase access to evidence-based treatments, provide continuous screening and referrals for health-related social needs and create sustainable coverage and payment strategies that support ongoing coordination and integration of care. The MOM Model provides the opportunity for health care providers to improve care for mothers and infants affected by the opioid crisis by engaging providers in specialized training initiatives. The model is aimed at enhancing health plan care coordination and integration of care. By supporting the coordination of clinical care and integration of other services critical for health, wellbeing, and recovery, the MOM Model has the potential to improve quality of care and reduce the cost of providing medical care to mothers and infants. The MOM Model is one of several statewide initiatives to reduce maternal and infant mortality rates. Indiana will use these grant funds over the next five years to transition into the new model of care, and then full implementation of the plan will be realized in years three through five.

Smoking Cessation

The Indiana Health Coverage Programs has enhanced its coverage of tobacco cessation drug treatment through the pharmacy benefit. Effective March 1, 2019 prior authorizations will no longer be required for exceeding 180 days of tobacco cessation therapy. Other enhancements to the program include allowance of preferred agents, including Chantix, to be used as first-line therapy and the ability to use Chantix concurrently with other nicotine replacement therapy. The goal of the program is to significantly improve the health of Medicaid members and to reduce the disease and economic burden that tobacco use places on them.

OMPP will continue to work closely with the IDOH Indiana Tobacco Quitline. The Indiana Tobacco Quitline is a free phone-based counseling service that helps Indiana smokers quit. OMPP in collaboration with IDOH, has facilitated increased quality of the monthly Quitline reports provided to the MCEs. OMPP and IDOH meet monthly to discuss any issues and trends with the reporting data. This partnership has resulted in a greatly increased accuracy of the reports being submitted to the MCEs, allowing for enhancement of their smoking cessation programs. The MCEs provided detailed information on their smoking cessation initiatives and incentive programs during the April 2020 Quality Onsite meeting. In turn, IDOH has implemented their new vaping initiative that began statewide in 2020. OMPP and IDOH will continue this close and beneficial collaboration through 2021 with the continuation of monthly meetings between representatives from the two agencies.

MCE Alignment

A core of OMPP's updated mission is to increase efficiency and reduce administrative burden for both members and providers participating in Indiana Medicaid. In 2021, OMPP will continue to work on our strategic initiative of aligning MCE activities so provider and member experiences among the four MCEs are more uniform.

In late 2019, OMPP kicked off the work on this strategic initiative by aligning managed care practices around emergency department payment and MCE substance use disorder authorization letters.

In response to the COVID-19 pandemic, OMPP revised the prior authorization requirements for many services to eliminate burden on hospitals, long term care, and mental health facilities and hasten the transition of members between levels of care. OMPP required alignment between Fee for Service and all MCEs in adherence to all COVID-19 related policies.

The OMPP Pharmacy team is currently collaborating with Indiana's MCEs to align their pharmacy medical necessity criteria with the Medicaid fee for service program. This project will establish uniform prior authorization criteria and processes among the MCEs.

Substance Use Disorder

OMPP implemented the substance use disorder waiver in 2018 with the goal of providing a compendium of services for those members dealing with addictions to ensure they receive the right level of services when needed. An OMPP and Division of Mental Health and Addiction SUD and Serious Mental Illness workgroup will host a substance use provider conference in the summer of 2021 to provide education on practice standards and serve as a forum for providers to ask questions and have concerns addressed. A similar conference was held in 2019 and had over 200 provider attendees.

Adult Quality Measures

Work on this project will continue with the goal of enhancing the quality of the data and number of measures for the 2021 Adult Quality Measures submission to CMS.

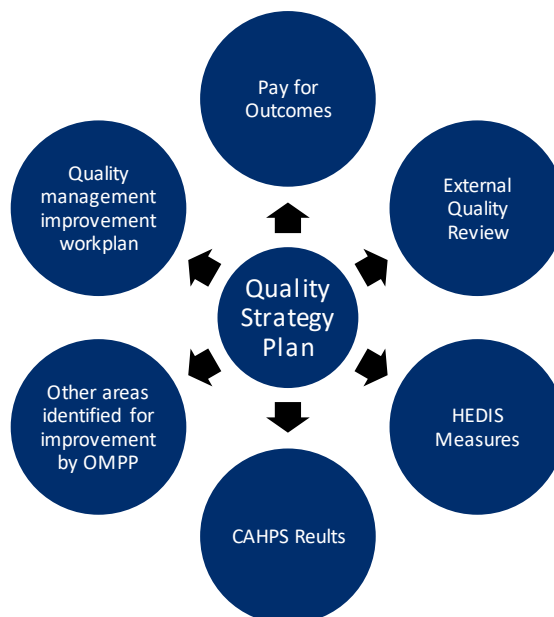

Section VI. Conclusion

There are ongoing initiatives which describe the state’s monitoring, measuring, and reporting process in a transparent fashion. The state of Indiana strives to demonstrate the overall commitment to quality of services available to our Medicaid recipients.

Indiana continues to utilize data from six primary sources in developing the Quality Strategy Plan. These six sources include Indiana’s annual External Quality Review, the MCEs’ HEDIS measures, the MCEs’ CAHPS survey results, the Quality Management Improvement Work Plans, OMPP contractual pay for outcomes results, and any other areas identified for improvement via MCE reporting, on site meetings or other data and analytics provided to OMPP.

Collaboration among the health plans, state agencies, providers, advocacy groups and OMPP is representative of the state’s dedication to performance and quality. Throughout the process of developing and narrowing the focus for improvements in 2021, OMPP gathered input for this Quality Strategy from a variety of staff and stakeholders. Additionally, the Quality Strategy Committee and its sub-committees will drill down further to sculpt the focus of the strategic objectives described in this Quality Strategy Plan to monitor outcomes and plan for future endeavors.

The IHCP 2021 Quality Strategy Plan will be presented to the Quality Strategy Committee and will be made available through a public posting on the state website.

Appendix I: Risk-Based Managed Care Historical Timeline

- 1994** Began with PCCM delivery system
- 1996** Enrollment into MCE contracted health plans was optional
- 1998** Expanded to include CHIP Package A (Medicaid Expansion up to 150% FPL)
- 2000** Expanded to include CHIP Package C (Separate state-designed benefit package; to 200% FPL)
- 2005** Enrollment into MCE contracted health plans became mandatory statewide, PCCM discontinued
- 2007** New MCE contracted health plans contract cycle; Behavioral health “carved-into” MCE capitation rates
- 2007** Expansion of pregnancy-related coverage (Package B) from 150 to 200 % FPL
- 2007** Indiana Check-up Plan legislation signed into law authorizing the Healthy Indiana Plan and a Request for Services is released to procure health plans; Initial 1115 Demonstration Waiver Application submitted to CMS and is approved in December; DFR began processing applications
- 2008** Expansion of CHIP Package C from 200 to 250 % FPL
- 2008** Implementation of HIP
- 2008** Enrollment into HIP began
- 2009** HIP waitlist began. Waitlist opened in November of 2009 and 5,000 individuals on waitlist invited to apply for the Healthy Indiana Plan
- 2009** Implementation of Open Enrollment (Plan Lock-in); Notification of Pregnancy; Pharmacy carve-out implemented.
- 2011** Implementation of the POWER account debit card; HIP opens 8,000 slots and waitlist members are invited to apply
- 2011** HIP and Hoosier Healthwise aligned under a family-focused approach.
- 2013** House Enrolled Act 1328 (HEA 1328) was passed by the Indiana General Assembly. This act tasked FSSA with managing care of the aged, blind and disabled Medicaid enrollees. In response, FSSA convened the ABD Taskforce comprised of staff from across key FSSA divisions.
- 2014** HIP-ESP is folded into the HIP program
- 2015** HIP modified with Pharmacy, Dental and Vision services carve-in
- 2015** Hoosier Care Connect implemented on April 1. Pharmacy, Dental and Vision services are carved-in
- 2015** Care Select program expired in August after complete integration of the Hoosier Care Connect program
- 2016** RFP completed for the HHW and HIP programs with contracts awarded to Anthem, MDwise, MHS and CareSource, effective 1/1/17
- 2017** Pharmacy and Dental services carved-in for HHW

Appendix II: Hoosier Healthwise Historical Timeline

- 1994** Began with PCCM delivery system
- 1996** Enrollment into MCE contracted health plans was optional
- 1998** Expanded to include CHIP Package A (Medicaid Expansion up to 150% FPL)
- 2000** Expanded to include CHIP Package C (Separate state-designed benefit package; to 200% FPL)
- 2005** Enrollment into MCE contracted health plans became mandatory statewide, PCCM discontinued
- 2007** New MCE contracted health plans contract cycle; Behavioral health “carved-into” MCE plans’ capitation
- 2007** Expansion of pregnancy-related coverage (Package B) from 150 to 200 % FPL
- 2008** Expansion of CHIP Package C from 200 to 250 % FPL
- 2009** Implementation of Open Enrollment (Plan Lock-in); Notification of Pregnancy; Pharmacy carve-out implemented.
- 2011** HIP and Hoosier Healthwise aligned under a family-focused approach.
- 2016** RFP completed for the HHW and HIP programs with contracts awarded to Anthem, MDwise, MHS and CareSource effective Jan. 1, 2017
- 2017** Pharmacy and Dental services carved-in for HHW

Appendix III: Healthy Indiana Plan & Enhanced Services Plan Historical Timeline

- 2007** Indiana Check-up Plan legislation signed into law authorizing the Healthy Indiana Plan and a Request for Services is released to procure health plans; Initial 1115 Demonstration Waiver Application submitted to CMS and is approved in December; DFR began processing applications
- 2008** Enrollment into HIP began
- 2009** HIP waitlist began. Waitlist opened in November of 2009 and 5,000 individuals on waitlist invited to apply for the Healthy Indiana Plan
- 2011** Implementation of the POWER account debit card; HIP and Hoosier Healthwise aligned under a family-focused approach; HIP opens 8,000 slots and waitlist members are invited to apply
- 2014** HIP-ESP is folded into the HIP program
- 2015** HIP 2.0 takes on a new focus for individuals to be more accountable with their health care choices
- 2016** RFP completed for the HHW and HIP programs with contracts awarded to Anthem, MDwise, MHS and CareSource, effective Jan. 1, 2017
- 2018** HIP waiver approval received from CMS. Additional areas of focus in HIP to include expanded incentives program that offers outcome-based incentives to members specific to tobacco cessation, substance use disorder treatment chronic disease management and employment related incentives
- 2019** Gateway to Work is fully implemented requiring some HIP members to participate in job opportunities, attend school, volunteer or participate in other qualifying activities
- 2020** Gateway to Work is suspended
- 2021** CMS approves HIP waiver for 10 years

Appendix IV: Care Select Historical Timeline

- 2007** Start of Care Select program in the Central Region
- 2008** Auto-assignment began in the Central Region
- 2008** Rollout of Care Select program in other regions
- 2008** Auto-assignment of remaining members
- 2008** Inclusion of wards and fosters in Care Select
- 2009** Auto-assignment of wards and fosters in Care Select
- 2010** Auto-assignment of remaining HCBS waiver members into Care Select
- 2010** Redesign of Care Select
- 2014** Redesign of Care Select, adding COPD as a disease state
- 2015** Care Select Program expires after implementation of Hoosier Care Connect

Appendix V: Hoosier Care Connect Historical Timeline

- 2013** House Enrolled Act 1328 (HEA 1328) was passed by the Indiana General Assembly. This act tasked FSSA with managing care of the aged, blind and disabled Medicaid enrollees. In response, FSSA convened the ABD Task Force (Task Force) which was comprised of staff from across key FSSA divisions.
- 2015** Hoosier Care Connect implemented on April 1. Pharmacy, Dental and Vision services carved-in to managed care.
- 2015** Complete integration of Hoosier Care Connect occurs August 1.
- 2017** Anthem and MHS remain in HCC. MDwise departs the program.
- 2021** RFP completed for the Hoosier Care Connect programs with contracts awarded to Anthem, MHS and UnitedHealthcare, effective April 1, 2021.
