Get support to live life *your way*

The Indiana Family and Social Services Administration will launch a new program in summer 2024 for Hoosiers aged 60 and over who receive Medicaid (or Medicaid and Medicare) benefits. The State's goal is to support older Hoosiers so they can age in the location of their choice. The program will let qualifying Hoosiers pick a health plan. And that plan will help them get high-quality services and support they need to live independently.

PathWays is about helping older Hoosiers get support *their way*, so they can live life *their way*.

Indiana PathWays for Aging helps qualifying older Hoosiers understand their Medicaid (or Medicaid and Medicare) benefits. They can also get help with care coordination and their supports.

Some PathWays members may qualify for long-term support. That support may include:

- Transportation to medical appointments
- In-home healthcare
- Help preparing meals
- Help with personal care
- Training for family caregivers
- Caregiver respite
- Nursing and assisted living facilities
