The annual member payment will change to reflect the entire budget period. The monthly calculation circled below will reflect the current PAC owed for the month and may not equal the annual amount shown due to a changing budget. To view the entire budget period you can go to AEADJ with RID in PARMS.

AEADJ should be viewed to get an accurate view of PACs being charged since a PAC can change from month to month. If AEADJ is not available make sure to go back in history viewing AEBIP.

An example of a case with a husband and wife in the same case is below. Circled is the correct split amount for each spouse that matches. As you see the annual amount for each is different which may raise red flags. Reason for annual amount is below.

## Julie BP is 2/15-1/16

Husband was added to HIP conditionally on 2/10 and it split her PAC amount effective 3/1/15. The month of 2/1/15 before the change is added into the annual amount. The new budget period monthly now matches her husband since he was approved conditionally. If he doesn't pay, her PAC will go back up to the full Gross Power Account Payment above circled in Blue.

ANNUAL MEMBER PAYMENT	: 65	5.00	ANNUAL STATE			

James was authorized conditionally for HIP effective 3/1/15. Since he is conditional an AEADJ screen will not be present. The annual would be the \$5.44 multiplied by the 12 months. This will remain \$65 annual payment for him unless is an income change is calculated on his case within this budget period.
