

# Attention: SNAP recipients

**Due to the partial U.S. government shutdown, February SNAP benefits were made available on EBT cards on January 16, 2019, for anyone eligible at that time.**

These benefits are intended for use in February. You will not receive additional benefits in the month of February. You should plan for your benefits to last through the entire month of February. Call 2-1-1 if you need additional help meeting your family's food needs.

Indiana retailers can still process SNAP/EBT during the shutdown. Reports of retailers not being able to take SNAP are technical issues relating to those retailers only.

New applications and case changes will continue to be processed as usual.
