

The Future of GIS: State and National Perspectives

The Future of GIS in Indiana

- GIO
- Geographic Information Council
- An Active and Engaged GIS Community

The Future of GIS in Indiana

- Continued support of Statewide GIS data development projects
 - Ortho
 - LiDAR
 - Data Sharing
 - NHD et.al.
 - Promoting bottom>top, and top>bottom data flow (including funding)
- Geospatial support of Community Resiliency
- Open Data
 - (open data versus protected online distribution)

The Future of GIS in Indiana

- Increased role of regional GIS groups
- State-to-state partnerships, especially in a siloed federal environment

The Future of GIS Nationally

- Funding, funding, funding????
- How will federal agencies work geospatially with each other and with state partners?
- National Geospatial Act
- NSGIC is at a cross road

The Future of GIS
