Will I have to set up an account, apply for an exemption, or pay any fees if I am not connected to water or sewer?

NO.

Only the customers who have a water and/or sewer main installed along their property line will be given the notice to apply for a connection or an exemption.

Only the customers who physically connect to the water and/or sewer systems will need to have an account set up and be responsible for any fees and a monthly bill.

All other property owners living within the District boundaries do not need to do anything.
