

Candida auris Reporting Algorithm

IDOH Recommendations

Patient should be placed in enhanced barrier contact precautions (without confirmed IDOH lab result). Use [EPA List P](#) products to disinfect environment and patient rooms. Flag patient's chart for quick identification in case of readmission. Ensure an [interfacility transfer form](#) is utilized when a patient is transferred. Screen roommates for *C. auris* colonization, if applicable.

The *Candida auris* reporting form

can be filled out and submitted to IDOH with lab results, AST reports, and H&P. This 1-page document highlights information required by IDOH to close a *C. auris* case investigation. This form helps streamline the reporting process for healthcare facilities. The *Candida auris* reporting form is available on [IDOH's Candida auris webpage](#).
