The following report is meant to provide local health departments, hospital administrators, health professionals and residents with a general understanding of the burden of influenza-like illness (ILI). Data from several surveillance programs were utilized to produce this report. For further information about the data presented in this report, please call the ISDH Surveillance and Investigation Division at 317-233-7125.

Key Points:
- The current percentage of ILI reported by the emergency department surveillance (ED) system (1.57 %) and the sentinel surveillance system (.92%).
- During week 48, 37% (7/19) specimens were positive for influenza. Six were positive influenza A H3 and one was positive influenza B.
- One specimen that tested negative for influenza tested positive for Enterovirus NOS.
- No influenza-associated deaths were reported this week. Indiana has reported one influenza death for the 2012/2013 season.
- During week 48, 0 Indiana school (K-12) reported that their absenteeism rate was 20% or higher.

Percent of patients who presented at an emergency department (ED) with a chief complaint relating to influenza-like illness – Indiana, 2001/12 & 2010/2009, 2009/10, 2008/9 seasons (EDs currently reporting = 113)
Data obtained from the ISDH Public Health Emergency Surveillance System (PHESS).

† PHESS data is very timely, so the data reported is for the most current week.

Sentinel reported influenza-like illness by sentinel type and reporting week with number of reporting sites Indiana, 2012/13 season.*

Percent of patients who presented at sentinel provider clinics with symptoms relating to influenza-like illness – Indiana, and a three year baseline average, 2009/2010 season excluded due to the pandemic*†

(Number of sentinel provider clinics who reported this week = 33)

*Data obtained from the ISDH Sentinel Influenza Surveillance System. This data is subject to change as sentinel sites can back-date their weekly reports.

† Sentinel data has limited timeliness, so the data reported is for the week before the most current week. This data is subject to change as sentinel sites can back-date their weekly reports.

*Data obtained from the ISDH Sentinel Influenza Surveillance System.
Sentinel reported influenza-like illness (ILI) by age category for the most current week reported – Indiana, 2012-13 season.
