### Indiana Department of Health Update

- **Facility Lab Testing Opportunities**

---

The Indiana Department of Health's goal is for every long-term care facility to establish a relationship with a primary and secondary laboratory for COVID-19 testing. The labs identified in the **attachment** have indicated they have excess capacity and would be interested in partnering with LTC facilities for resident/employee testing. This is not a complete list, and you are encouraged to maintain any previous relationship you may have with a testing lab. We ask that you please identify a backup in case the primary lab experiences delayed turnaround times in providing results.
