CNA Training Waivers

Over the weekend, the Indiana Department of Health issued two new emergency orders designed to help ease the current CNA staffing crisis and increase the emphasis on COVID-19.

The first order – Order to Facilitate Nurse Aide Training During the COVID-19 Public Health Emergency – temporarily reduces the total hours of required CNA training from 105 to 75, the CMS minimum. It also requires 24 hours of in-facility training (including all mandated “supervised practical training”) and specifies that three hours of training must be COVID-focused.

The second order – Order to Expedite Certified Nurse Aide Training for Personal Care Attendants and Temporary Nurse Aides During the COVID-19 Public Health Emergency – temporarily authorizes abbreviated CNA training for persons who already are Personal Care Attendants (PCAs) or Temporary Nursing Aides (TNAs) under orders issued earlier this year. Importantly, this shortened training recognizes prior PCA/TNA training and grants credit for 49 hours of in-facility work experience as a PCA or TNA. (Important note: CMS has authorized Indiana to proceed with this training but final review by Central Office is still pending. For that reason, we recommend that programs wait until we get a final thumbs-up – expected within two weeks – before utilizing this abbreviated training.)

The state Department of Health understands facilities may still have trouble finding and hiring CNAs even with the benefit of these orders. Accordingly, the Department remains willing to consider additional CNA training flexibilities where warranted on a case-by-case, fact-specific basis.
Another CNA Training Note

Beyond issuing these emergency orders, the Indiana Department of Health has reinterpreted one of its rules in a way that should give CNA training programs additional relief. Effective immediately, some or all of the required 30 hours of classroom instruction may be conducted online. In addition, the Department will not require pre-approval of new online or hybrid instruction so long as it receives advance or concurrent email notice of any change at ISDHLCTrainingPrograms@isdh.in.gov. This reinterpretation will remain in effect following expiration of the public health emergency.

Anyone who has questions about the new emergency orders, the rule reinterpretation, or any other aspect of CNA training may contact Jan Kulik (jkulik@isdh.in.gov) or Nancy Adams (nadams1@isdh.in.gov).
