

Infection Prevention Program

September 2025

Who we are

- Part of the Infectious Disease Epidemiology and Prevention Division under the Healthcare-Associated Infections and Antimicrobial Resistance Epidemiology program
- Comprised of individuals with advanced degrees and extensive bedside and managerial experience
- Led by a program manager and includes four infection preventionists covering three regions which encompass the state of Indiana

What we do

- Primary work is related to the Centers for Disease Control and Prevention's Infection Control Assessment and Response tool across various healthcare settings, including long-term care facilities, acute care hospitals, long-term acute care hospitals, dialysis centers, dental offices, correctional facilities, and more
- Goal is to collaborate with and support healthcare facilities in enhancing their infection prevention and control practices by sharing best practices and resources

Contact us

- Your regional infection preventionist (contact information is available on the Infection Prevention Program's regional map)
- Infection Prevention Program Manager Janene Gumz-Pulaski at 317-499-3877 or jgumzpulaski@health.in.gov
