- Sites will need to provide their own temperature monitoring device to monitor storage temperatures.

### Upon Arrival of the Vaccine

- Arrives frozen at −25°C to -15°C (−13°F to -5°F).
- 10 vials in each carton (100 doses).
- Contains either 10 dose vials or 15 dose vials.
- Full case contains 12 cartons (1,200 doses).
- Vaccine Carton dimensions are 5.5” x 2.2” x 2.5”.

- Upon Arrival of the Vaccine

- Arrives frozen at −25°C to -15°C (−13°F to -5°F).
- 10 vials in each carton (100 doses).
- Contains either 10 dose vials or 15 dose vials.
- Full case contains 12 cartons (1,200 doses).
- Vaccine Carton dimensions are 5.5” x 2.2” x 2.5”.

- Upon Arrival of the Vaccine

- Arrives frozen at −25°C to -15°C (−13°F to -5°F).
- 10 vials in each carton (100 doses).
- Contains either 10 dose vials or 15 dose vials.
- Full case contains 12 cartons (1,200 doses).
- Vaccine Carton dimensions are 5.5” x 2.2” x 2.5”.
Upon arrival, inspect the shipment immediately for signs of damage.

Check the TagAlert temperature monitoring device by pressing the blue Start/Stop button.

If the left arrow points to a green checkmark, the vaccine is ready to use.

If the right arrow points to a red X, store vaccine at proper temperature and label DO NOT USE.

Transfer the vaccine cartons to the freezer or fridge for storage.

Call the manufacturer phone number listed on the back immediately.
MODERNA STORAGE & HANDLING

1. Freezer
   - Store as frozen liquid at -25°C to -15°C (-13°F to 5°F) for up to 6 months.
   - Do not store on dry ice or below -40°C (-40°F).

   Protect the vaccine from exposure to light by storing vials in the original carton.

2. Refrigerator
   - Store vials at 2°C to 8°C (36°F to 46°F) up to 30 days.
   - Do not refreeze thawed vials.
   - Store punctured vials at 2°C to 25°C (36°F to 77°F) for a maximum of 12 hours.
   - Discard any punctured vials after 12 hours. Dispose of any vials with unused vaccine as medical waste.
3. **Room Temperature**

- Store at room temperature 8°C to 25°C (46°F to 77°F) for up to 24 hours.
- Do not refreeze thawed vials.

**Temperature Monitoring Guidelines**

**Option 1:** Check and record the min/max temperatures of the storage units each day using a temperature monitoring device.

**Option 2:** If your temperature monitoring device does not automatically record min/max temperatures, record the temperature at the start and end of each workday.
There are two options for thawing vials:

**Option 1**
1. Transfer frozen vials to refrigerator and thaw 2.5 to 3 hours at 2°C to 8°C (36°F to 46°F), then thaw for an additional 15 minutes at room temperature.
2. Vials may be stored in refrigerator for up to 30 days at 2°C to 8°C (36°F to 46°F).

**Option 2**
1. Thaw at room temperature 8°C to 25°C (46°F to 77°F) for 1 to 1.5 hours if using immediately.
2. Vials may be held at room temperature for no more than 24 hours.

**Note:** 15 dose vials will take longer to thaw while 10/11 dose vials will take less time.
Prepare the following supplies per one 10-Dose Vial Moderna COVID-19 Vaccine (100mcg/0.5mL dose):

- 10 dosing syringes/needles (1mL syringe/IM injection needle)
- Alcohol swabs and appropriate PPE as needed

Prepare the following supplies per one 15-Dose Vial Moderna COVID-19 Vaccine (100mcg/0.5mL dose):

- 15 dosing syringes/needles (1mL syringe/IM injection needle)
- Alcohol swabs and appropriate PPE as needed

**Note:** Before drawing up the dose screen the patient and provide the EUA.
MODERNA VACCINE ADMINISTRATION

Before Administration

- Visually inspect each dose in the dosing syringe prior to administration. The vaccine will be an off-white suspension, it may contain white or translucent particles. Do not administer if the vaccine is discolored.

- Verify the final dosing volume of 0.5mL.

- Swirl the vaccine vial gently between doses. Do not shake.

During Administration

- Administer a single 100 mcg/0.5mL dose at first visit.

- Use appropriate gauge needle for body type (23-25 gauge).

- Administer intramuscularly in the deltoid muscle.

After Administration

- Discard all used materials in appropriate medical waste receptacles/sharps containers.
- Provide COVID-19 vaccine record card to patient noting the date and time for second dose.
- Monitor patient for 15 minutes and report any adverse reaction on VAERS.
- Give the second 100mcg/0.5mL dose 28 days after the first dose.

The second dose must be Moderna COVID-19 Vaccine; it is not interchangeable with other COVID-19 vaccines.
