

### Appendix M: Hospital Audit Tool: Risk Assessment of OB Hemorrhage

Process measure – Document how often a new approach is occurring.

Review 20 vaginal and cesarean randomly selected deliveries monthly – or – review 80% of all deliveries monthly if delivery volume is <500 deliveries annually.

Examples:

- Hemorrhage Risk Assessment:
  - Numerator = Number of charts with hemorrhage risk assessment on admission documented
  - Denominator = Total number of audited charts
  - Goal: 100% of patients have risk assessment on admission - See sample hospital audit tool that follows
- Quantification of Blood Loss:
  - Numerator = Number of charts with QBL by volume and weight measures
  - Denominator = Total number of audited charts
  - Goal: 100% of patients have blood loss assessed by QBL

HOSPITAL AUDIT TOOL: RISK ASSESSMENT FOR OB HEMORRHAGE

Topic: Risk Assessment for obstetric hemorrhage is documented in the chart at admission

Goal: 100% of women are assessed for risk of obstetric hemorrhage on admission
