	(3) mental abuse; (4) corporal punishment; (5) neglect; and (6) involuntary seclusion.			
R 0117	Personnel - Deficiency 410 IAC 16.2-5-1.4(b) (b) Staff shall be sufficient in number, qualifications, and training in accordance with applicable state laws and rules to meet the twenty-four (24) hour scheduled and unscheduled needs of the residents and services provided. The number, qualifications, and training of staff shall depend on skills required to provide for the specific needs of the residents. A minimum of one (1) awake staff person, with current CPR and first aid certificates, shall be on site at all times. If fifty (50) or more residents of the facility regularly receive residential nursing services or administration of medication, or both, at least one (1) nursing staff person shall be on site at all times. Residential facilities with over one hundred (100) residents regularly receiving residential nursing services or administration of medication, or both, shall have at least one (1) additional nursing staff person awake and on duty at all times for every additional fifty (50) residents. Personnel shall be assigned only those duties for which they are trained to perform. Employee duties shall conform with	R 0117

	written job descriptions.			
R 0121	Personnel - Noncompliance 410 IAC 16.2-5-1.4(f)(1-4) (f) A health screen shall be required for each employee of a facility prior to resident contact. The screen shall include a tuberculin skin test, using the Mantoux method (5 TU, PPD), unless a previously positive reaction can be documented. The result shall be recorded in millimeters of induration with the date given, date read, and by whom administered. The facility must assure the following: (1) At the time of employment, or within one (1) month prior to employment, and at least annually thereafter, employees and nonpaid personnel of facilities shall be screened for tuberculosis. The first tuberculin skin test must be read prior to the employee starting work. For health care workers who have not had a documented negative tuberculin skin test result during the preceding twelve (12) months, the baseline tuberculin skin testing should employ the two-step method. If the first step is negative, a second test should be performed one (1) to three (3) weeks after the first step. The frequency of repeat testing will depend on the risk of infection with tuberculosis. (2) All employees who have a positive reaction to the skin test shall be required to have a chest x-ray and other physical and	R 0121
