(k) The facility must immediately consult the resident ' s physician and the resident ' s legal representative when the facility has noticed:

(1) a significant decline in the resident ' s physical, mental, or psychosocial status; or

(2) a need to alter treatment significantly, that is, a need to discontinue an existing form of treatment due to adverse consequences or to commence a new form of treatment.

Based on record review and interview, the facility failed to notify a resident's family about a change in condition related to a new wound requiring treatment for 1 of 3 residents reviewed for wounds. (Resident C)

Finding includes:

Resident C's record was reviewed on 3/29/23 at 9:10 a.m. The resident was admitted to the facility on 1/30/23 and discharged on 3/2/23.

Diagnoses included, but were not limited to, amnesia and osteoarthritis. The resident resided on the locked memory care unit.

A Progress Note, dated 2/26/23, indicated the resident had bleeding noted on his left lower leg. The area was cleaned and treatment applied. There was no documentation what type of

change in status occurs. Staff to also notify the family of all new orders received from MD.

Director of Nursing, Resident Care Coordinator, and Memory Care Director will read/audit all progress notes daily ensuring that all orders are carried out and all notifications are completed indefinitely.

treatment was applied or that family had been notified.

A Progress Note, dated 2/27/23, indicated the area on left lower leg appeared as if skin had sloughed off, the area was 10 cm (centimeters) x 5 cm. The area was cleaned and a new dressing applied, the Nurse Practitioner was notified. There was no documentation the family had been notified.

Interview with the Director of Nursing (DON), on 3/29/23 at 11:50 a.m., indicated the family had not been notified of the new wound. The DON was not aware of that until after the resident was discharged and the family had called the facility. The nurse involved had been reeducated about family notification.

The current policy, "Change in Resident Status," indicated, "...3. a. The facility must immediately consult the resident's Physician and the resident's legal representative with the facility has noticed:...A need to alter treatment significantly, that is, a need to discontinue an existing form of treatment due to adverse consequences or to commence a new form of treatment...."

osteoarthritis. The resident resided on the locked memory care unit.

A Progress Note, dated 1/30/23, indicated the resident had a wound on his left lower leg measuring 3 centimeters (cm) x 1.5 cm and would need wound care to address.

There was no Physician's Order for wound treatment.

A Progress Note, dated 2/3/23, indicated a referral had been sent to home health agency for wound care. The request was denied due to insurance issues on 2/7/23. On 2/7/23 a referral was sent to another home health agency for wound care. The referral was also denied.

A Progress Note, dated 2/5/23, indicated wounds on the resident's lower leg remained. The area was washed with saline, patted dry, triple antibiotic ointment and sterile gauze were applied.

A Progress Note, dated 2/9/23, indicated the MD had looked at the resident's leg and provided an order for bacitracin (antibiotic ointment) and an ABD (dry dressing) to be applied daily.

A Physician's Order, dated 2/9/23, indicated to apply A&D ointment (a skin protectant) and ABD covering daily.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR MEDICARE & MEDICAID SERVICES

The Medication Administration Record (MAR) indicated A&D ointment (a skin protectant) had been applied on 2/10, 2/11, 2/12, 2/13, 2/14 and 2/15/23 to the wound. Bacitracin was not on the MAR.

A Progress Note, dated 2/10/23, indicated the wound was washed with saline, and bacitracin and ABD were applied.

A Progress Note, dated 2/13/23, indicated the wound was washed with saline, antibiotic ointment was applied to the wound, and A&D ointment was applied to the surrounding skin, the wound was covered with ABD and compression stockings had been applied.

A Progress Note, dated 2/15/23, indicated the wound had healed.

A Progress Note, dated 2/26/23, indicated the resident had bleeding noted on his left lower leg. The area was cleaned and treatment applied. There was no documentation what type of treatment was applied.

A Progress Note, dated 2/27/23, indicated the area on left lower leg appeared as if skin had sloughed off. The area was 10 cm x 5 cm. It was cleaned and new dressing applied, the Nurse Practitioner (NP) was notified.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
CENTERS FOR MEDICARE & MEDICAID SERVICES

There was no Physician's Order documented for treatment of the new wound.

Progress Notes, dated 2/28, 3/1 and 3/2/23, indicated the dressing was dry and intact. There was no further documentation in Progress Notes or the MAR that wound care had been provided to the area. The resident was discharged on 3/2/23.

Interview with the Director of Nursing (DON) on 3/29/23 at 11:50 a.m., indicated there was supposed to be a standing order from the NP for wound care, but it had not been entered on admission. The standing order was for A&D ointment and dry dressing daily. The order given on 2/9/23 was for A&D ointment and ABD daily, the nurses should not have been applying antibiotic ointment. She indicated the NP had been notified on 2/27/23 of the new wound and had given a verbal order to resume previous treatment. That order had also not been entered, and there was no documentation of wound care.

This state residential finding relates to Complaint IN 00404476.
