Finding includes:

During an initial facility tour, on 4/21/2025 at 10:06 A.M., a black binder tilted, "Survey Results", located on the lower shelf of a table in the foyer was reviewed. The binder had survey results from June 8, 2023 and survey results prior to June 2023. The results for the most recent annual survey, conducted, on May 10, 2024, were not available in the binder for review.

During an interview, on 4/21/2025 at 2:43 P.M., the Assistant Executive Director indicated the most current and previous three years of surveys should have been available for review.

A policy for residents' rights was requested. The Director of Nursing indicated, on 4/22/2025 at 11:23 A.M., a policy was not available for residents' rights, and the facility followed the state regulation.

Based on observation, record review and interviews, the facility failed to ensure the most recent State survey results were available for review by residents and visitors. This deficient practice had the potential to affect 22 of 22 residents who resided in the building.

IV. How the corrective action(s) will be monitored to ensure the deficient practice will not recur i.e., what quality assurance program will be put into place;

The admin or designee will audit staff inservices monthly to ensure all staff have 6 hours of dementia training in their first 6 months and 3 hours annually thereafter.

The results of these audits will be reviewed in Quality Assurance Meeting monthly x6 months or until an average of 90% compliance or greater is achieved x3 consecutive months. The QA Committee will identify any trends or patterns and make recommendations to revise the plan of correction as indicated.

wash their hands after each direct resident contact for which hand washing is indicated by accepted professional practice.

Based on observation, interview and record review, the facility failed to wash hands prior to administering an insulin injection during 1 of 2 medication administration observations. (LPN 3)

Finding includes:

During an observation of an insulin injection on 4/21/2025 at 11:14 A.M., LPN 3 entered Resident 4's room and explained to the resident she was going to administer his insulin. LPN 3 applied gloves and wiped the tip of the insulin pen and then wiped Resident 4's upper left arm with another alcohol pad. LPN 3 then administered the insulin, removed her gloves and used hand gel to wash her hands.

LPN 3 failed to wash her hands before administering the insulin to Resident 4.

During an interview, on 4/20/2025 at 11:16 A.M., LPN 3 indicated she should have washed her hands prior to administering the insulin injection.
